## CONSTITUTION AND ADMINISTRATION OF THE UNIVERSITY.

The Constitution, powers and functions of the University are defined in "The University Act, 1901."

The management of the property, finances and academic business of the University is intrusted to the Board of Trustees, the Senate, Convocation, the University Council, and the Council of University College. The functions of these various bodies are exercised subject to supervision and control by the Crown as hereafter explained.

1. THE CROWN.—The supreme authority is vested in the Crown. The Lieutenant-Governor of Ontario is the Visitor of the University (as well as of University College) on behalf of the Crown, and his visitorial powers may be exercised by commission under the Great Seal. All annual appropriations made by the Board of Trustees are subject to the approval of the Lieutenant-Governor in Council. All expenditures of endowment must be similarly authorized, and are subject also to ratification by the Legislative Assembly. The Crown exercises also a veto power as to certain statutes of the Senate and by-laws, rules and regulations of the Board of Trustees. Appointments in the University (as well as in University College) are made by the Crown, after such examination, inquiry and report as are considered necessary.

2. THE BOARD OF TRUSTEES.—The Board of Trustees consists of nine members, viz., the Chancellor, the Vice-Chancellor, the President of the University, the Principal of University College, and five persons appointed by the Lieutenant-Governor in Council. The Board of Trustees is a body corporate with a common seal and power to hold lands for the purposes of the University and University College. All the property and effects of the University (as well as of University College) are vested in the Board of Trustees in trust. The Board has general powers with regard to the management, control and government of the property, endowments and income of the University and College, subject to the control of the Crown. In the discharge of its functions the Board makes by-laws, rules and

regulations regarding the investment of the funds, the selling and leasing of University properties, the letting of contracts, the appointment and removal of the Bursar and his assistants, clerks, and other officers and servants of the University, the fixing of salaries, the fees to be paid by students, the annual appropriations and the transaction of other business.

3. THE SENATE.—The Senate consists of three classes of members: (1) *Ex officio* members; (2) Appointed members; and (3) Elected members. The *ex officio* members are the Minister of Education, The Chancellor, the President of the University, the Principal of University College, the president or head of each federated university or college, the deans of the faculties of Arts, Law, Medicine, and Applied Science and Engineering, and all past Chancellors and Vice-Chancellors. The appointed members consist of three representatives appointed by the professors and associate-professors in Arts and Law, two by the professors and associate-professors in Medicine, two by every federated college, one by every federated university, one by University College, one by the Law Society of Upper Canada, and one by each affiliated institution (subject, however, in the latter case to certain restrictions). The elected members at present number twenty-six, and represent the graduates of the University of Toronto in Arts (twelve members), in Medicine (four members), in Law (two members), the graduates of the federated University of Victoria (five members), the graduates in Applied Science and Engineering (one member), and the High School teachers of the Province (two members)—the graduates in Medicine and Law of Victoria University voting along with the graduates of the University of Toronto in the same faculties.

The body thus composed is renewed once in three years, when all except the *ex officio* members must retire, being eligible, however, for re-appointment or re-election. The chairman of the Senate is the Chancellor, who is the elected representative of the whole body of graduates, or in his absence the Vice-Chancellor, who is elected by the Senate from among its members at its inaugural meeting after the triennial dissolution.

Library.

The functions of the Senate regard the general management of the academic work of the University, including the courses of studies, the prescription of curricula in the various faculties and schools, the publication of the Calendars of the University and University College, the examinations for degrees, scholarships, prizes, and certificates of honor, the granting of degrees, and the promotion of the interests and welfare of the University in cases not otherwise provided for by law. The Senate is empowered to make provision for the affiliation of any college, school or other institution established in the Province for the promotion of science or art, or for instruction in law, medicine, engineering, agriculture, or other useful branch of learning, and for the dissolution of such affiliation or the modification or alteration of the terms thereof.

It may also report to the Visitor on the general condition and progress of the University, and has power to inquire and report concerning the conduct, teaching, and efficiency of members of the Faculties of the University of Toronto and of University College.

4. CONVOCATION.—Convocation consists of the whole body of graduates of the University, in all faculties. Except indirectly through its elected representatives, no part of the management of the University is exercised by it as a whole. It elects the Chancellor, and, in divisions according to faculty, it elects members of Senate as its representatives in Arts, Medicine, Law, and Applied Science and Engineering. Any question relating to University affairs may be discussed by it, and a vote taken. The result of such discussion is communicated to the Senate, which must consider the representation made, and return to Convocation its conclusion thereon.

5. THE UNIVERSITY COUNCIL.—This body consists of the President, the senior Professor in each department of the several faculties of the University, the Principal of University College, the Principal of each federated university or federated college and the Librarian of the University. The Council has power to deal with all matters affecting the

discipline of students, to impose reasonable fines and to control all student societies or associations. It is also empowered under certain conditions to determine the time-tables, lectures and laboratory work of the University, to grant dispensations from the lectures and laboratory work of the University and Colleges, and to authorize such lecturing or teaching in the University by others than the duly-appointed professors and teachers as may be deemed expedient, and to prevent all lecturing or teaching not so authorized.

6. THE COUNCIL OF UNIVERSITY COLLEGE.—This body is composed of the Principal and the Professors and Associate-Professors of the College. It has committed to it the direction and management of the College with full authority over and entire responsibility for the discipline (including the imposition of reasonable fines) of the undergraduates in relation to the lectures and other instructions of the professors, lecturers and other teachers of the College; and no lecturing or teaching of any kind can be carried on in the College by any other than the duly-appointed professors or teachers without the authority of the Council.

7. FEDERATED INSTITUTIONS.—The following institutions are federated with the University, viz., Victoria University, Knox College, Wycliffe College, and St. Michael's College. The President or other head of each is *ex officio* a member of the Senate and of the University Council. In addition, Knox, Wycliffe, and St. Michael's Colleges each appoint two other representatives on the Senate. Victoria University appoints one other, and its graduates elect five more representatives. All regular students matriculated in the University who are enrolled in University College or Victoria University and who enter their names with the Registrar of the University are entitled to free instruction in Arts in the University. But this provision does not include exemption from laboratory fees, nor does it apply to post-graduate instruction. When a federated college, by arrangement with the University Council, teaches any part of the Arts course the trustees may make a reduction in the fees of students taught in such College.

Biological Building.

## GENERAL INFORMATION FOR STUDENTS.

---

### **Discipline.**

All students attending courses of instruction in the University of Toronto are responsible to the University Council for proper and orderly conduct within the University class-rooms, buildings, and grounds. The Council has authority to impose fines, and to use all other appropriate means of discipline.

### **The Library.**

The University Library occupies a separate building erected almost wholly by private benefaction, and completed in 1892. Besides a fire-proof book-room with a storage capacity of 100,000 volumes, it contains a reading-room capable of seating upwards of 200 readers, a periodical-room, seven departmental libraries, offices, cloak-rooms, and conversation-rooms. The building is heated by steam throughout, thoroughly ventilated, and supplied with electric light. The library contains at present upwards of 65,000 volumes, together with upwards of 7,000 unbound pamphlets. It is provided, as far as the income permits, with the standard and current literature of all subjects taught in the University. In the departments of the natural and physical sciences it includes the principal journals and transactions of societies. In the departments of language and literature, the works of all authors of primary or secondary importance from the origins of each literature to the present time are available, as well as the principal philological and literary periodicals. Corresponding facilities are provided in the departments of philosophy, history and political science. The library is a circulating one for members of the Faculty, and a library of reference for students. The latter, however, are allowed under certain conditions the use of books at home

outside of library hours, and students engaged in special work, which requires the consultation of books of reference, are allowed access to the stack-room by the librarian on the recommendation of the professors. The departmental libraries are in charge of the professors in each department, and contain special reference collections of books. These rooms are used for the instruction of advanced students, who may at the discretion of their professors use the rooms and the books contained in them for private study. The conversation-rooms, situated in the basement, are intended for the use of students who wish to withdraw for the purpose of discussion or combined study, to avoid disturbance of the reading-room proper, where absolute quiet must be observed. Besides the general library, there is also a special collection of periodicals and monographs situated in the Biological Building, and another in connection with the psychological laboratory for the use of the students and staff engaged in practical work.

### **Laboratories.**

The Physical Laboratory, established in 1878, is situated in the Western part of the main University Building, and consists of a set of rooms for elementary work, together with a number of special laboratories. The apparatus in the former is suitable for preliminary exercises in reading and constructing scales, and for the simpler experiments in Mechanics, Geometrical Optics, Heat, Sound, and Electricity. The special laboratories are equipped for the use of advanced Arts students taking the honor course in Physics, and for senior students in Engineering. The collection of apparatus includes balances by Collot and Cœrtling, cathetometer and dividing engine by Dumoulin-Froment, comparator by Troughton and Sims, clock by Dent, chronograph and clock-fork by Kœnig, exhaustion and compression pumps by Bianchi, Golaz, Alvergniat, and Carré. In the Heat Laboratory the collection includes the Golaz apparatus designed to repeat the classical experiments of Regnault. The equipment of the

Chemical Building.

Acoustical Laboratory is exceptionally complete, and includes all the more important instruments constructed by Kœnig, amongst them being the large forks with which his original experiments on beats were made. The Optical Room is provided with heliostat by Duboscq, Jamin's universal circle with accessories by Lutz, Gouy's spectroscope by Lutz, optical bench for diffraction and interference experiments by Lutz, Norremberg's polariscope, microscopes by Natchet and Zeiss, etc. The Electrical Laboratory is furnished with electrometers, galvanometers, resistance coils, magnetometer, dip-circle, voltmeters, ammeters, etc., for the most part constructed by Carpentier of Paris. The Laboratory is also well equipped for photographic work and for the ordinary operations of glass-blowing. In connection with the Laboratory is a well-equipped workshop in charge of a skilled mechanic who makes the necessary repairs, and constructs many of the new instruments added to the collection. Special arrangements may be made by graduate students for pursuing original investigations in the Laboratory.

The Psychological Laboratory, which was established in 1892, is situated in the west wing of the main University Building, in close proximity to the Physical Laboratory, the apparatus of which is available for some of the work in Psychology. The Laboratory is well equipped for investigations in Psychophysics, Psychological Optics and Acoustics and time relations of mental phenomena. There is in connection with the Laboratory a small library containing the periodicals and the special literature of Experimental Psychology. On account of the increased number of undergraduates and graduates in the Philosophical Department, and especially in order to facilitate the independent research of the graduates, it was found necessary in 1896 to extend the Psychological Laboratory by the addition of the rooms adjoining the Ethnological Museum and in 1900 by the addition of the rooms in the two upper storeys of the first house of the Residence.

The Biological Building contains laboratories both for

general and special work. On the ground floor are laboratories for Physiology and Physiological Chemistry. On the first floor there are, in addition to the large laboratory for general purposes, laboratories for Morphology, Bacteriology, Physiological Botany, a photographic room, and a store-room for chemical re-agents. The large laboratory mentioned above is used for the practical instruction of students of the First and Second years in Arts and Medicine. The Morphological Laboratory for students of the Third year has accommodation for twenty-two students, while for students of the Fourth year accommodation is furnished in the two large laboratories of the ground floor, one of which, specially designed for Physiology, is at present used also for morphological work, and the other fitted up for practical instruction in Physiological Chemistry. The Morphological Laboratories are provided with microscopes and all apparatus used by the students in morphological work, and they contain, stored in glass cases, a large number of models and museum preparations for the illustration of animal and vegetable Morphology. The Bacteriological Laboratory is provided with apparatus to illustrate the Biology of Bacteria. The Physiological Laboratory is provided with a fairly complete outfit of apparatus for demonstrations in Physiology. This apparatus is used for illustrating the lectures in Physiology delivered to the students of the First and Second years in Arts and Medicine, but is also employed by students in advanced Physiology (of the Fourth year Arts) in repeating for themselves all the important experiments dealt with in the advanced lectures on the subject. The apparatus for lecture purposes includes a projection microscope by Zeiss for electric light. The photographic room in connection with the laboratories is supplied with all the apparatus used in photography as applied to the various kinds of biological work.

The Chemical Building was completed in 1895. It contains, in addition to two lecture-rooms with accommodation for 300 and 100 students respectively, special laboratories for qualitative analysis, quantitative analysis, organic preparations,

Elementary Physical Laboratory.

physical chemistry, gas analysis, combustion and furnace operations, and for the prosecution of original investigation. The total number of working places in these laboratories exceeds 200.

The Laboratory for Mineralogy and Geology is accommodated temporarily in the west wing of the Biological Building. Assay-furnaces and other appliances for the practical work of the Department are provided.

### **Museums.**

The University Biological Museum forms the central portion of the Biological Building. The equipment of the Museum is now so far advanced as to permit of its being opened to the public. It is primarily intended as an educational Museum for the students taking biology as part of their University work, and is arranged in such a way as to facilitate the most elementary as well as the most advanced studies. Each specimen is furnished with a printed label indicating the most salient points which it is designed to illustrate, but it is anticipated that the Museum will also be of great interest to the general public.

The public entrance to the Museum is approached from the west façade of the Biological Buildings, while the students gain access to the rooms through the eastern wing, in which the laboratories are situated. The interior of the Museum, which occupies two floors, is sub-divided into four rooms, seventy-five by twenty-five feet in size, amply lighted by handsome windows on the north and south sides. Three of these rooms are devoted to Animal Biology, while the fourth, which is to be arranged for the illustration of Vegetable Biology, is temporarily fitted up for the accommodation of the Ferrier collection of minerals.

The public entrance opens into the north ground floor room, the wall cases in which contain stuffed specimens of the various orders of Mammals, while the free-standing cases between the windows illustrate the comparative anatomy and development

of that class. All the show cases are constructed of iron and plate glass, those destined for the exhibition of smaller specimens standing on wooden storage cases, built of cherry and cedar, and containing skins and other specimens for private study. The south ground floor room is devoted to the remaining vertebrate classes, the wall cases containing stuffed specimens of birds, reptiles, batrachians and fishes, and the smaller cases between the windows containing specimens illustrating the comparative anatomy and development of these classes.

A handsome staircase decorated with busts of distinguished biologists connects the ground floor with the first floor; a number of wall cases in ascending series contains a small collection of fossils from all parts of the world, as a graphic illustration of the relative position of the fossiliferous strata, and of their characteristic remains, while the first floor is devoted to the display and storage of specimens of the Invertebrata.

The Ethnological Museum is situated in the second storey of the main University Building. It contains that part of the ethnological collection which was saved from the fire of 1890, together with the additions which have been made since that time. There is a fair collection of skulls, including ancient Egyptian and Roman skulls and models of the Neanderthal, Cro-Magnon, and other famous skulls. There are also interesting palæolithic implements from the English and French Drift, and the beginning of a good collection of stone implements from various parts of Canada. As the aborigines of this country are rapidly disappearing, it becomes increasingly important to preserve as many objects as possible illustrating their ethnological characteristics. Many friends of the University are in a position to contribute to the ethnological collection, and it is hoped that they will do what they can to aid in its completion.

### University Publications.

Under the general title of "University of Toronto Studies," a publication in the interests of scholarship and research is issued, containing selected papers by members of the Univer-

sity. It is supported by a small grant from the provincial government. The committee of management represents the Faculties of the University, University College, Victoria University, and the School of Practical Science. The President of the University is Chairman of the committee, and the Librarian is general editor of the publication. Each series is under the special editorship of the professor to whose department the series relates, and his name is the guarantee of the value and originality of the papers published on his recommendation. From the nature of the publication, there is no regularity of issue, but as papers are accepted and recommended for publication, they are published to the extent of the funds available, without regard to any consideration except that of their value as contributions to the literature of learning.

For list of studies published to May, 1901, see Appendix, p. 32.

### **Public Lectures.**

In addition to the regular courses of instruction, a number of public lectures on special subjects of interest are delivered annually under the auspices of the University, on Saturday afternoons, by members of the Faculty and others whose services are given voluntarily in this work. The lectures cover a large variety of topics, and those delivered hitherto have been numerous attended by the public, as well as by the students of the University. For the list of subjects and lectures during 1900-1901, see Appendix, p. 35.

### **Student Societies.**

Various societies and associations have been organized for the promotion of social intercourse, literary and scientific activity, music and athletics. For list of officers of these societies, see Appendix, p. 36.

### **Gymnasium and Athletic Grounds.**

The University Gymnasium was completed and equipped in 1893. In 1894, additions were made to the front of the

building in which the Gymnasium is situated, consisting of a large hall for public meetings and committee-rooms. This additional accommodation is available for the work of the various student societies and for academic purposes. Applications for the use of rooms, accompanied by a list of officers and a copy of the constitution of the society making application, must be made to the President at the beginning of the session, or from time to time as occasion requires. Arrangements have also been made by which recognized societies may obtain the use of committee-rooms on application to the janitor of the building.

The Gymnasium is fully provided with the best and most modern appliances for physical culture, and contains a running track, shower baths and swimming bath, besides the necessary dressing-rooms and other conveniences. A competent instructor in Gymnastics is in constant attendance to superintend and direct the exercises of students. In addition to the lawn in front of the main University Building and the campus in the rear, a large plot of ground on Devonshire Place has been prepared and set apart as an Athletic Field. By this addition the facilities for football, cricket, tennis and other out-door athletic sports are doubled, as compared with previous accommodation; and by these grounds, in conjunction with the Gymnasium, ample opportunity is afforded to all students for healthful exercise and physical development. To assist in meeting the expenses of the Gymnasium, a nominal annual fee is imposed on those who avail themselves of its advantages. The supervision of all athletic matters has been intrusted by the Council to an Athletic Association, consisting of members appointed from the Faculty and representatives of the students. All applications of clubs for the use of grounds must be made annually to this Board. All such applications must be accompanied by a list of officers. In the case of new clubs, the list of officers must be accompanied by particulars as to the organization and objects of the club making application. For table of gymnasium hours, see Appendix, p. 40.

A diploma in gymnastics and physical drill is granted to those who fulfil the requirements of the curriculum prescribed therefor by the Senate. (See p. 278.)

### **Undergraduate Union.**

Through the efforts of the faculty, graduates, undergraduates and friends of the University, this organization was established during the session of 1900-1901. It has for its object the promotion of social intercourse among the students of the various faculties, colleges and schools. Apartments for the accommodation of the Union have been provided in a portion of the building formerly occupied by the College Residence.

### **Dining Hall.**

In October, 1900, the Dining Hall formerly belonging to the College Residence was re-opened. Under the management of a representative committee, students are provided with meals at moderate rates. Full particulars may be obtained at the Dining Hall Office in the Dean's House.

### **Lodging and Board.**

Lodging and board are readily obtainable in numerous private boarding-houses within convenient distance of the University, at a cost of from three dollars upwards for comfortable lodging with board; or rooms may be rented at a cost of from one dollar per week upwards, and board obtained separately at moderate rates. A list of accredited boarding-houses is kept by the Secretaries of the Young Men's Christian Associations of University College and Victoria University, and students are recommended to consult them with reference to the selection of suitable accommodation.

## INFORMATION FOR STUDENTS IN ARTS.

---

### Degrees.

The degree of Bachelor of Arts is conferred on those persons who have completed the prescribed courses of study, and passed the required examinations. The courses of study extend over a period of four years, and are divided into General and Honor courses. A corresponding distinction is made in the degree conferred. Attendance on lectures is compulsory, unless a dispensation is granted owing to special circumstances. The degree of Master of Arts is conferred on Bachelors of Arts of at least one year's standing, on the presentation of an approved thesis in one of the departments of study in Arts. Provision is also made for admission *ad eundem gradum* in the case of both degrees. The curriculum of study prescribed for the degree of Bachelor of Arts will be found on pp 66-126. For further details, see also pp. 130-156. The degree of Doctor of Philosophy is conferred upon Bachelors of Arts of at least two years' standing, who have complied with the requirements prescribed by the Senate, see pp. 127-129.

### Entrance

Candidates for the degree of Bachelor of Arts may enter this Faculty either by Junior Matriculation or Senior Matriculation (the examination of the First year). The certificate of the Department of Education is accepted *pro tanto* at both of these examinations. The subjects of Latin; English; History; Mathematics; and any two of Greek, French, German, Elementary Experimental Science, are required of all candidates at Junior Matriculation. The subjects of English; Latin; any two of the following languages, viz., Greek, French, German, Hebrew. Ancient History; Mathematics; and Physics or Biology are

required of all candidates at Senior Matriculation. Additional work in the various subjects is prescribed for honor standing. The Junior Matriculation examination for the Province of Ontario is held in July, and applications must be sent to the Education Department before 24th May. A Junior Matriculation examination is also held in June, at various centres outside the Province of Ontario (see below). The Senior Matriculation examination is held in May and June, and Supplemental examinations for both Junior and Senior Matriculation are held in September, applications for all such examinations being sent to the Registrar of the University of Toronto. All applications must be accompanied by the prescribed fee, namely, two dollars for Part I. of the Junior Matriculation examination, five dollars for Part II. (or five dollars for the whole examination in case Parts I. and II. are taken at the same time), fifteen dollars for Senior Matriculation. Provision is also made for admission *ad eundem statum*, the fee being ten dollars. The July Junior Matriculation examination is held at the University of Toronto and at the various High Schools and Collegiate Institutes throughout the Province of Ontario. The June Junior Matriculation examination is held at such centres outside the Province of Ontario as may be determined from time to time. The May Senior Matriculation examination is held at the University of Toronto, and the June Senior Matriculation examination is held at the University of Toronto and at such other centres as may be determined from time to time. The Supplemental examinations are held at the University of Toronto only. For details see p. 70, etc.

### Instruction.

Instruction is given in the various subjects of the Arts course by the Arts Faculty of the University of Toronto, the Faculty of University College, and the Arts Faculty of Victoria University. In the division of the work of instruction between these faculties the subjects are assigned as follows:—To the Faculty of the University of Toronto: Mathematics,

Physics, Mineralogy and Geology, Biology, Chemistry, History of Philosophy, Logic and Metaphysics, Comparative Philology, Phonetics, Italian, Spanish, Modern History, Political Economy and Constitutional History, Constitutional and International Law, Roman Law, General Jurisprudence, and History of English Law; and to the Faculty of University College, as also to that of Victoria University: Latin, Greek, Ancient History, English, French, German, Oriental Literature, Ethics. Instruction in certain options allowed to theological students of federated institutions is given in Victoria University, Knox College, Wycliffe College, and St. Michael's College. St. Michael's College also co-operates with the University in the work of instruction in Modern History and Philosophy.

### **Examinations.**

In addition to the Matriculation examination mentioned above, candidates proceeding to the degree of Bachelor of Arts are required to pass an annual examination, held in the month of May, in all the subjects of their course of study. In the First and Second years a report is required from the professor or lecturer in all subjects of the General course, except Chemistry, Natural Science, and Physics, based upon the attendance of candidates and their proficiency during the year. This report is incorporated with the results of the May examination, of which it constitutes an essential part. Candidates for honors in Physics, Chemistry, Biology, Mineralogy and Geology, and Psychology, before proceeding to the annual examination, must present a certificate of having attained honor standing in the practical work of the subject during the year. For details see pp 60-66.

### **Scholarships, Prizes and Medals.**

A large number of scholarships are awarded in the University of Toronto upon the result of competitive examinations. Through the generosity of the Ex-Chancellor, Mr. Edward Blake, and others, twenty-nine scholarships are offered annually at Matriculation for proficiency in the

subjects of the examination on the whole, and also for proficiency in one or more branches of learning. In nearly all cases these scholarships include free tuition throughout the undergraduate course, being made dependent, however, upon the maintenance of a certain standard of scholarship by the winner after Matriculation. With the exception of one scholarship with special conditions, they range in value from \$105 to \$230. In addition to the above, various undergraduate scholarships are offered for competition in Mathematics, Physics, Philosophy, Natural Science, Chemistry and Mineralogy, and Political Science. These scholarships range in value from \$50 to \$75, and are tenable for one year. A scholarship of \$60 in Political Economy, and one of £150 sterling in either Physics or Chemistry, are offered for post-graduate competition, the former annually and the latter every second year. Prizes in books are offered in Italian, and Mineralogy and Geology. Medals are awarded in Mathematics, Physics, Natural Science, in the work of the General Course, and in certain of the Honor departments with English. For details, see pp. 56-65.

### **Fellowships.**

Tutorial Fellowships are offered in Mathematics, Chemistry, and Biology. They are of the value of \$500, and are open to graduates of the University only. The Fellows are appointed annually, and are eligible for reappointment for a period not exceeding three years in all. Fellowships are also offered in Political Science and Philosophy. For details, see p. 65.

## INFORMATION FOR STUDENTS IN MEDICINE.

---

### Session 1901-1902.

The fifteenth session since the re-establishment of the Medical Faculty of the University of Toronto will commence on Tuesday, 1st October, 1901. The opening lecture will be delivered by Professor J. F. W. Ross, in the Biological Department at 8.30 p.m.

### Degrees.

The Degree of M.B. is given to students who have matriculated and who have completed the prescribed course of study and passed the examinations required. The curriculum for the degree of M.B. will be found on pp. 222-230. The Degree of M.D. is conferred on Bachelors of Medicine of at least one year's standing who have presented an approved thesis or who have passed an examination as prescribed on p. 228.

### Entrance.

Candidates for a degree must pass the Junior Matriculation Examination, unless (1) they possess a degree in Arts, not being an Honorary Degree, from any Dominion or British University; or, (2) have already matriculated in the Faculty of Arts or in the Faculty of Law in this University; or (3) have been registered as Matriculates in the College of Physicians and Surgeons of Ontario. Candidates may delay Matriculation until any time before the Second examination for the degree of M.B., but if possible candidates should matriculate before commencing their medical studies. For subjects of examination at Junior Matriculation, Pass and Honor, see p. 76.

### Instruction.

The course of instruction given by the Faculty of Medicine prepares students primarily for the degree of M.B., and for the

license of the Ontario College of Physicians and Surgeons, but it fulfils the requirements of other Canadian and British Universities and it aims at giving the student such a training in the sciences as is now exacted of all those who desire to obtain any British medical qualification in addition to a Canadian one.

All the lectures and demonstrations of the First and Second years are given in the Biological, Physiological, Chemical, Physical, and Anatomical laboratories and lecture-rooms of the University.

Lectures and demonstrations in the subjects of the Third and Fourth years are given in the building of the Medical Faculty, on the corner of Gerrard and Sackville streets, opposite the Toronto General Hospital. More than two-thirds of the instruction in the Third and Fourth years is given in the wards and in the Pathological and Clinical laboratories.

Clinical instruction is given in the Toronto General Hospital, and the Mercer Eye and Ear Infirmary, the Burnside Lying-in Hospital, the Hospital for Sick Children, St. Michael's Hospital and other medical charities of Toronto. The facilities for clinical instruction have been very greatly improved, and the student has the fullest opportunities for making a thorough examination of all the cases of disease which are found in the wards and out-patient rooms of the hospitals. The students are arranged in small classes (of from twelve to fourteen) in order to facilitate this, and to enable the clinical teachers to give as much personal instruction as possible to each student.

The Faculty has in the General Hospital a laboratory for Clinical Pathology and Chemistry, which has been furnished with microscopes and all apparatus required for the examination of pathological fluids and specimens; and students, when they act as clinical clerks, will be admitted to all the privileges of the laboratory.

In the Department of Anatomy, the arrangements for instruction are now unsurpassed. In addition to other methods

of illustrating Anatomy, there will be courses in which the projection microscope will be employed to demonstrate to large classes the relational structure of the different parts of the body as exhibited in frozen sections. In *Materia Medica* it is also proposed to make the course of instruction conform to the most advanced methods.

The Faculty has spared no expense in making the arrangements for medical instruction perfect, and is convinced that these, added to the unrivalled facilities offered by the University laboratories for the study of Chemistry, Physics, Biology, Anatomy, Histology and Physiology, will furnish the fullest opportunities to the student for acquiring a medical education of the most advanced and most progressive character.

Attention is directed to the recent establishment of a Museum of Hygiene.

### **Examinations.**

In addition to the Matriculation examination, candidates are required to pass four examinations, which must be taken in the following order: the First at the end of the first session; the Second at the end of the second session; the Third at the end of the third year; and the Final at the end of the fourth session.

### **Medical Council Requirements.**

A student desirous of obtaining a license to practise medicine in Ontario must pass the July Matriculation Examination of the University of Toronto, including the subjects Physics and Chemistry, which entitles him to be registered as a medical student. A Fifth year of study is now demanded by the Ontario Medical Council. To meet this requirement a course of instruction will be arranged; students taking this course will have the opportunity of doing special work in the Hospitals and laboratories, and they will be permitted to attend whatever didactic lectures they may desire.

For all information not covered by this announcement, the intending student should apply to Professor A. Primrose, Biological Department, University of Toronto.

## INFORMATION FOR STUDENTS IN APPLIED SCIENCE

---

### Degrees.

The degree of Bachelor of Applied Science is conferred on such candidates as have completed the course of study prescribed and passed the examinations required. The curriculum for the degree of B.A.Sc. will be found on p. 234. Bachelors of Applied Science may, after three years spent in professional work, present themselves for the degrees of Civil Engineer (C.E.), Mining Engineer (M.E.), Mechanical Engineer (M.E.), or Electrical Engineer (E.E.), as the case may be, subject to the rules and regulations established by the University. (See p. 235.)

### Entrance.

Students may enter the Regular Course in any Department, either (a) by presenting certificates of having passed the Matriculation Examination in any University in His Majesty's Dominions, or in all the subjects of such Matriculation Examination except Greek and Latin, or the High School Leaving Examination of the Province of Ontario, or (b) by presenting certificates of having had at least one year's experience in some recognized engineering, architectural or manufacturing work or business, and passing an examination in Arithmetic, Algebra, Euclid and English.

### Instruction.

There are five regular Departments of Instruction, in each of which Diplomas are granted, viz.: 1, Civil Engineering (including Sanitary Engineering); 2, Mining Engineering; 3, Mechanical and Electrical Engineering; 4, Architecture; 5, Analytical and Applied Chemistry.

The instruction given in each of these departments is designed to give the student a thorough knowledge of the scientific principles underlying the practice in the several professions, and also such a training as may make him immediately useful when he commences active professional work.

The regular course in each department is of three years' duration, and leads to the Diploma of the School. The instruction is given partly in the lecture rooms and partly in the drafting rooms, laboratories and field. A certain amount of the work is laid out for the summer vacation. The course of study in each department is general, and beyond the selection of his department the student has no opportunity to specialize.

### **The Degree of B. A. Sc.**

After the general course is finished the diploma of the school is granted and the student is at liberty either to enter the active life of his profession or to spend another year in special work. This year is called the fourth or post-graduate year. Graduates electing to proceed with their studies are allowed to select two subjects from an approved list, and are required to confine their whole attention to these subjects during the fourth year. The subjects on this list are such as require a large amount of time to be devoted to laboratory and other practical work. The advanced theoretical instruction is given either at the beginning or end of the working-day, in order not to break up the time allotted to practical work. During this year the student is required to prepare a thesis on some subject connected with his work. The practical examinations are held by the School, while the written examinations and the examination of the theses are held by the University. After complying with all requirements, the candidate receives from the University the Degree of Bachelor of Applied Science (B. A. Sc.).

### **Professional Degrees.**

Bachelors of Applied Science may, after three years spent in professional work, present themselves for the degrees of Civil Engineer (C. E.), Mining Engineer (M. E.), Mechanical Engineer (M. E.), or Electrical Engineer (E. E.), as the case may be, subject to the rules and regulations established by the University.

## FACULTY OF ARTS.

**Regulations Relating to Students, Terms and Examinations.**

1. The regular students include undergraduates of the University, and matriculants, *i.e.*, students who, though they have not passed the prescribed matriculation examination, are taking the full undergraduate course.

2. Students entering University College are required to produce satisfactory certificates of moral character and previous good conduct.

3. No student will be enrolled in any year, or be allowed to continue in attendance, whose presence for any cause is deemed by the Council to be prejudicial to the interests of the College.

4. Matriculated students are required to attend the courses of instruction and examinations in all subjects prescribed for students of their respective standing, and no student will be permitted to remain in the College who persistently neglects academic work.

5. The certificate required for admission to the University examinations will not be granted to students who have been reported to the Council for not conforming to the College or University regulations, or for improper conduct of any kind.

6. Matriculated students are required to reside, during the period of their attendance on lectures, in the College, or in houses selected by their parents or guardians, or approved by the President.

7. Men and women students, unless members of the same family, are not permitted to reside in the same lodging-houses.

8. Women students are under the supervision of the Lady Superintendent, whose directions as to conduct are to be observed.

9. All interference on the part of any student with the personal liberty of another, by arresting him, or summoning him to appear before any tribunal of students, or otherwise subjecting him to any indignity or personal violence, is forbidden by the Council. Any student convicted of participation in such proceedings will forfeit the certificate required for admission to the University examinations, and will render himself liable to expulsion from the University.

10. A student who is under suspension, or who has been expelled from the College or University, will not be admitted to the University buildings or grounds.

11. The constitution of every College or University society or association of students and all amendments to any such constitution must be submitted for approval to the College or University Council. All programmes of such societies or associations must, before publication, receive the sanction of the Council. Permission to invite any person not a member of the Faculty of the University or University College to preside at or address a meeting of any society or association must be similarly obtained. Societies and associations are required to confine themselves to the objects laid down in their constitution.

12. The name of the University or College is not to be used in connection with a publication of any kind without the permission of the University or College Council.

13. The Gymnasium and Athletic grounds are under the supervision of the President and a Joint Committee of the University and College Councils, who are authorized to make rules and regulations with regard to the use thereof.

14. Occasional students may be admitted to lectures on application to the President.

15. Certificates of attendance on lectures in any department during an academic year may be given to occasional students who have been regular in their attendance, and who have also passed the examinations in such department.

## FEES.

N.B.—All fees, with the exception of those for Matriculation, are payable to the Bursar, at his office in the main University building, between the hours of ten and one o'clock, except on Saturday.

### I. UNIVERSITY FEES.

#### General.

The following fees are payable :—

For Junior Matriculation (Part I.) . . . . .	Two Dollars.
For Junior Matriculation (Part II.) . . . . .	Five “
For Junior Matriculation (Parts I. and II. together) . . . . .	Five “
For Senior Matriculation . . . . .	Fifteen “
For Certificate of Matriculation Standing . . . . .	Five “
For each Supplemental examination . . . . .	Ten “
For the January Supplemental Examination . . . . .	Fifteen “
For each examination after Matriculation . . . . .	Fourteen “
For change of Faculty . . . . .	Five “
For admission <i>ad eundem statum</i> . . . . .	Ten “
For the Degree of B.A. . . . .	Ten “
For the Degree of M.A. (examination, \$10 ; degree, \$10) . . . . .	Twenty “
For admission <i>ad eundem gradum</i> (B.A. or M.A.) . . . . .	“ “
For registration for Ph.D. course . . . . .	Twenty-five “
For the Degree of Ph.D. . . . .	Fifty “
For dispensation from attendance at lectures in a federated College . . . . .	Five “
For certificates of Honor, each . . . . .	One “
For Library fee (annually) . . . . .	Two “

The fee for each examination after Matriculation shall be \$14, this regulation to include Supplemental examinations in cases where the full examination is taken, and does not arise in consequence of rejection at a previous examination.

The fee for a partial Supplemental examination and for a full Supplemental examination, which does arise in consequence of rejection at a previous examination, shall be \$10.

Matriculated undergraduates who are registered students of University College, or of any federated University, may attend lectures of University

professors and lecturers in the Faculty of Arts without payment of fees, except those imposed for laboratory work ; but such students must enter their names with the Registrar of the University.

### Laboratory Fees.

“A course in laboratory work” means the continuous course of instruction in laboratory or practical work offered to the student in any one year in any of the undermentioned subjects, namely, Physics, Chemistry, Mineralogy and Geology, Psychology, Biology (including Physiology, Zoology, Botany, and Histology), and any other separate subject in which laboratory work is or may be prescribed.

“A partial course of laboratory work” means a special course, or any subdivision, complete in itself, of a course of laboratory work as above defined.

“A matriculated student in Arts” means a student who is matriculated in the University of Toronto, and enrolled in University College or a federated University, and whose name is entered with the Registrar of the University of Toronto.

“An occasional student” includes every student in whose case the Senate of the University of Toronto is by law authorized to determine fees for courses of lectures in the University of Toronto.

Laboratory fees shall be divided into, (a) Fees for practical instruction in the laboratory, (b) Charges for supplies.

### Practical Instruction Fees.

The annual practical instruction fee for an occasional student attending a course, or partial course, of laboratory work shall be based on the lecture fee prescribed for occasional students by the Senate statute, namely :

For each course of not more than 15 hours .....	\$2 00
“ “ “ between 15 and 30 “ .....	3 00
“ “ “ “ 30 “ 50 “ ....	5 00
“ “ “ “ 50 “ 80 “ .....	7 00
“ “ “ more than 80 hours .....	8 00

The annual practical instruction fee for an occasional student attending a course, or partial course, of laboratory work, shall be ascertained by adding for the purpose of calculation, to the number of lecture hours in the same course, or partial course, the number of hours of laboratory work therein ; and by rating the aggregate lecture and laboratory fee for that course combined accordingly, as for example :—

Assuming the course of lectures to comprise fifteen hours, and the course of laboratory work to comprise fifteen hours, making thirty in all, the total fee for the course of lectures and laboratory work combined shall be that prescribed above for thirty lecture hours, namely, \$3.

### Charges for Laboratory Supplies.

Charges for supplies shall include laboratory materials and instruments used by or for the student, and ordinary wear and tear of instruments ; but not charges for waste, neglect and breakage, which are to be met out of a deposit to be fixed by the Professor.

The annual supply charges for a matriculated student in Arts shall be according to the following table:

	Chemistry.		Mineralogy and Geology.		Biology.		Physics.		Psychology.		Totals.

+ Students in these Departments, who take Biology in order to qualify as Specialists in Science, are required to pay the Laboratory fee in Biology of the first and second years in lieu of the Laboratory fee in Mineralogy and Geology of the third and fourth years respectively.

The annual supply charges for an occasional student shall be according to the following table :—

*A. Partial Course 1.*

Being that prescribed for students in the School of Practical Science in Civil Engineering :

Second Year, Physics .....	\$1 50
Third Year       “ .....	1 00

*B. Partial Course 2.*

Being that prescribed for students in the School of Practical Science in Architecture :

*D. Partial Course 4.*

Being that prescribed for matriculated students in Medicine :

	Chemistry.	Biology.
First Year .....	\$3 00	\$1 50
Second Year .....	3 00	2 75

The payment of fees shall not entitle any occasional student to be admitted to the laboratory work of a later year without having taken that of the earlier year or years, unless this requisite is dispensed with by the Senate on the recommendation of the Professor.

## Fees for Occasional Students in Arts, and Library Fees.

1. “A course of lectures” means the continuous course of instruction, excepting laboratory work, offered in the University Faculty to students in Arts in any one year in any of the undermentioned subjects, namely : History ; Italian and Spanish ; Phonetics ; History of Philosophy, Logic, Metaphysics and Psychology ; Political Science (including Political Economy, Jurisprudence and Constitutional Law) ; Mathematics ; Physics ; Chemistry ; Mineralogy and Geology ; Biology (including Physiology, Zoology, Botany and Histology) ; and any other separate subject in which instruction is or may be given by the teaching Faculty in the University of Toronto.

“A partial course of lectures” means any special course or any subdivision, complete in itself, of a course of lectures as above defined.

"A matriculated student in Arts" means a student in Arts who is matriculated in the University of Toronto and enrolled in University College or a Federated University, and whose name is entered with the Registrar of the University of Toronto.

"An occasional student" includes every student in whose case the Senate is by law authorized to determine fees for courses of lectures in the University of Toronto.

2. The annual fee for an occasional student attending a course, or partial course, of lectures shall be as follows :—

For each course of not more than 15 hours	.....	\$2 00
" " between 15 and 30 "	.....	3 00
" " " 30 " 50 "	.....	5 00
" " " 50 " 80 "	.....	7 00
" " more than 80 "	.....	8 00

3. Every matriculated or non-matriculated student proceeding to a degree in Arts shall pay, at the time of the entry of his name with the Registrar, an annual library fee of \$2.

4. No occasional or other student of any class shall be admitted to the library, save upon payment of an annual fee of \$2.

N.B.—All the above fees are payable in advance, and in the case of fees for lectures, if not paid during the month of October (or in the case of students attending in Easter term only, during the month of January), an additional fee of one dollar per month will be imposed until the whole amount is paid.

The fee for each examination must be paid at the time of application.

The fee for admission *ad eundem statum*, for change of faculty, for admission to a higher year on the certificate of the head of a federated college, for dispensation from attendance at lectures, or for certificates of honor, must be paid at the time of application.

---

## II. COLLEGE FEES.

---

Graduates in Arts, who during their undergraduate course were enrolled either in University College or in Victoria University, may attend lectures free in the College or University in which they were so enrolled.

For regular students in Arts, "a course of lectures" means a continuous course of instruction offered to matriculated students in Arts in any one year in any subject.

"A partial course of lectures" means any special course or any subdivision, complete in itself, of a course of lectures as above defined.

"A matriculated student in Arts" means a student who is matriculated in the University, and enrolled in University College or Victoria University, and whose name is entered with the Registrar of the University.

"An occasional student" includes every student, not being a matriculated student under the above definition, in whose case the Board of Trustees is by law authorized to determine fees for courses of lectures.

Every matriculated student in Arts shall, on each year's enrolment in University College or Victoria University, pay an enrolment fee according to the following table ; which fee shall include all instruction for which fees are by law chargeable, except laboratory supply charges and library fees :—

**Table.**

FIRST YEAR . . . . .	Any course or department . . . . .	\$36 00
SECOND YEAR . . . . .	Any course or department . . . . .	36 00
THIRD YEAR . . . . .	Chemistry and Mineralogy . . . . .	31 00
	Natural Science or Physics and Chemistry . . . . .	31 00
	Any other course or department . . . . .	36 00
FOURTH YEAR . . . . .	Physics and Chemistry, Chemistry and Mineralogy, or Physics . . . . .	31 00
	Biology . . . . .	26 00
	Any other course or department . . . . .	36 00

The annual enrolment fee of a matriculated student in Arts taking, under the regulations, more than one honor course, shall be \$36 only.

The enrolment fee of a matriculated student in Arts attending lectures for one term, or part of a term, shall be \$18.

The enrolment fee for students receiving dispensation from attendance at lectures in University College or Victoria University shall be \$5 for each term, in addition to the University fee of \$5. The payment of these fees entitles the student to supervision of "term work" prescribed in connection with his course.

The annual fee for an occasional student attending a course, or partial course, of lectures in University College or Victoria University shall be similar to the lecture fee prescribed by the Senate statute for occasional students, namely :

For each course of not more than 15 hours . . . . .	\$2 00
" " between 15 and 30 " . . . . .	3 00
" " " 30 " 50 " . . . . .	5 00
" " " 50 " 80 " . . . . .	7 00
" " more than 80 " . . . . .	8 00

The annual enrolment fee of an occasional student attending all the courses of lectures in any year shall be \$36.

For each Certificate of Honor . . . . .	\$1 00
---	--------

N.B.—All the above fees are payable in advance, and if not paid during the month of October (or in the case of students attending in Easter term only, during the month of January), an additional fee of \$1 per month will be imposed until the whole amount is paid.

## SCHOLARSHIPS, PRIZES AND MEDALS.

### I. University.

#### A. Matriculation Scholarships.

The scholarships hereinafter mentioned, with the exception of the Prince of Wales Scholarship and the Mary Mulock Scholarships, are provided from the endowment fund presented by the Honorable Edward Blake, ex-Chancellor of the University, and are known as the Edward Blake Matriculation Scholarships.

#### I.

There are, including the Prince of Wales Scholarship, nine Junior Matriculation scholarships for general proficiency in the four departments of Classics, Mathematics, Modern Languages and Science, and the sub-department of History.

These scholarships are of the following values :—

SCIENCE .....	{ Chemistry .....	400	1200
	{ Physics .....	400	
	{ Biology (Botany, Zoology) ..	400	
HISTORY .....			200

The marks obtained at the examination for Part I. shall not be taken into account in awarding any of the scholarships. The marks assigned to each of the subjects in the General course shall be as follows :—Latin, 200 ; Greek, 200 ; Mathematics, 400 ; English, 250 ; French, 125 ; German, 125 ; Chemistry, 75 ; History, 75.

All candidates for scholarships in one or more departments shall at the same examination pass in the other subjects prescribed for Part II., of the Junior Matriculation. The subjects of Part I., in which they are also required to pass, may be taken at the same or a previous examination.

A candidate who has been awarded a scholarship at a Junior Matriculation examination shall not be eligible for a scholarship at a subsequent Matriculation examination.

Saving the exception as to the Prince of Wales Scholarship, no one shall be entitled to hold more than one scholarship ; but anyone who would, but for this provision, have been entitled to a second scholarship shall be published in the lists and receive a certificate of honor.

Every candidate for a Junior Matriculation scholarship in the University of Toronto, shall, on application for examination, sign a declaration to the effect that he intends to proceed to a degree in Arts in the University of Toronto.

No scholarship shall be awarded save on condition that the candidate becomes a matriculated student in actual attendance in the University of Toronto.

Free tuition awarded shall be available on the following conditions :—For the first year on the award of the scholarship ; for any year after the first on proof that the claimant has passed his examination for the preceding year with first-class honors in at least one department.

In the case of candidates who obtained scholarships prior to 1896, free tuition shall be accorded on a second class standing.

In case in any year any scholarship be not taken, it shall be allowable to award such scholarship, or some part thereof, to a candidate who has shown special excellence in the examination in some other group, and has taken scholarship rank therein, but has failed to win a scholarship therein.

In case in any year any scholarship be not awarded, the money undisposed of shall be divided among the scholarships for the succeeding year.

The Board of Arts Studies may from time to time make and amend any regulations requisite to carry out the plan : such regulations shall be laid before the Senate at its next meeting, and may be from time to time amended by the Senate or referred back to the committee for reconsideration.

RESOLUTION PASSED BY THE JOINT BOARD, DECEMBER 28, 1895.

That examinations for University Scholarships be held at any centre where there is an examination for Matriculation, provided any additional necessary expenditure be met by the locality ; and that the appointment of presiding examiners receives the approval of the Joint Board.

**B. Undergraduate Scholarships.**

The following scholarships have been founded and endowed in the University, and are open for competition to all undergraduates in Arts, who are candidates for Honors in the departments and years to which they are assigned :—

No candidate shall be permitted to hold more than one scholarship ; but any one who would, but for this provision, have been entitled to a second scholarship, shall have his name published in the lists.

All undergraduate scholars must sign a declaration of intention to proceed to a Degree in this University, and must attend lectures in University College or Victoria University for the academic year immediately following such examination. The Senate however may, upon satisfactory reasons being shown, permit such scholar to postpone attendance upon lectures for a year. If at the end of the year a further postponement is necessary, special application must be made to the Senate. In every such case the payment of the scholarship shall likewise be postponed. The scholarships are paid in three instalments—on the fifteenth November, the fifteenth January and the fifteenth March ; and each scholar is required to send to the Registrar a certificate of attendance upon lectures at least three days before the date of each payment.

No scholarship will be awarded to any candidate who has been placed lower than the First Class in the department to which the scholarship is attached.

### C. Prizes in Books.

Four prizes in books, the gift of the Minister of Foreign Affairs for the Kingdom of Italy, are offered for competition among the students of Italian of the First, Second, Third and Fourth years, respectively. These prizes are awarded by the University Council.

The MINERALOGY and GEOLOGY Prizes, the gifts of Professor Chapman, are open for competition among students of these subjects in the Second and Third years, and are awarded by the Senate of the University. The value of the Second year prize is \$5, and of the Third year prize is \$10.

### D. Medals.

THE GOVERNOR-GENERAL'S Medals, the gift of His Excellency the Earl of Minto, are awarded by the Senate of the University under the following conditions :—

1. The Gold Medal shall be awarded to that candidate in the final examination for the B.A. degree who, taking not less than 66 per cent. in English (as defined below), and not less than 75 per cent. in some one of the following Honor departments :—(a) Classics, (b) Philosophy, (c) (d) Mathematics or Physics, (e) (f) Natural Science (either division), shall also take the best aggregate mark in the two subjects.

2. English shall be understood to mean only the papers (at present four in number) on later English Literature (from the end of the 15th century).

3. In order to obviate any unfairness arising from a different system of marking in different departments, the principle shall be always adopted of raising the marks of the best candidate in the first class of each department to the maximum, and those of the others in proportion, unless the examiners of any department report that the marks of the best candidate in their department are not of sufficient merit to be so raised.

4. The Registrar shall publish not only the name of the successful candidate, but also the names of all candidates who, by satisfying the above conditions, are eligible for the award.

5. The Silver Medal shall be awarded to that candidate in the Second year of the General course who, taking not less than 75 per cent. in this examination, takes also the highest aggregate of marks when the result of the First and Second year examinations in this course are added together, such examinations having been taken in two consecutive calendar years.

6. The discretion of the examiners (paragraph three above), as in the examination for the Gold Medal, shall apply also to this examination.

#### NATURAL SCIENCE.

The Cawthorne Medal, the gift of F. T. Shutt, M.A., awarded on the recommendation of the Natural Science Association.

#### MATHEMATICS.

The Glashan Gold Medal, the gift of J. C. Glashan, Esq., awarded by the University Council to the University College candidate of the Fourth year who stands highest in First Class Honors.

#### PHYSICS.

The Ottawa Gold Medal, awarded by the University Council to the University College candidate of the Fourth year who stands highest in First Class Honors.

This Medal is the gift of the following Alumni, residents of Ottawa: Otto Klotz, Esq., J. C. Glashan, LL.D., J. L. McDougall, M.A., C.M.G., W. Fitzgerald, M.A., Frederick Hayter, B.A., W. D. LeSueur, B.A., A. H. McDougall, B.A.

### E. Graduate Scholarships.

THE RAMSAY Scholarship in Political Economy, of the value of \$60, the gift of Mr. William Ramsay. This Scholarship is open for competition to all graduates or undergraduates who have been placed in the First Class in one of the Economic subjects of the Fourth year in the Honor department of Political Science (Third year in the Faculty of Law); but not more than two years must have elapsed since the competitor passed the examination above specified. The award is made upon an essay, the subject of which must be some question in Economics or Finance of interest to the commercial community in Canada, to be announced in May of each year, and the competition closes on the 15th of September thereafter, by which date the essays must be sent to the Registrar.

The subject for 1901 will be The History of Provincial Revenues since Confederation.

The following outlines are given by way of suggestion: (1) Division of Revenues at Confederation. (2) Growth of Provincial Revenues since 1867 and the sources (Public Domain, Licenses, Fees and Taxes). (3) Conclusions. Appendix—Latest Provincial Budgets collaborated.

The subject for 1902 is the Municipal History of any Town or City in Canada, the municipality to be selected by the competitor.

The following outlines are given by way of suggestion: (1) Sketch of city's or town's development. (2) Administrative organization of the municipality and relation to province. (3) The administrative work. (4) Its financial history, including its financial relation to the province. (5) Conclusions.

Authorities must be carefully stated in every case.

THE 1851 EXHIBITION Science Scholarship, of the value of £150 sterling, given by the Commissioners for the International Exhibition of 1851, is awarded once in two years by the University Council for research in some branch of Physics or Chemistry. Subject to a satisfactory report as to progress in study, it is ordinarily tenable for two years at home or abroad.

### F. Graduate Fellowships.

THE GEORGE PAXTON YOUNG Memorial Fellowship in Philosophy, of the value of \$400, will be awarded in June, 1901, by the University Council. The holder must be a Bachelor of Arts who has taken an Honor course in Philosophy. This Scholarship is tenable for one year, and the holder must devote his whole time to the study of some topic falling under the general term Philosophy. He may pursue his studies either in the University of Toronto, or in some other University approved by the University Council; but in either case he shall furnish to the University Council such evidence as may from time to time be required, that he is faithfully observing the conditions under which the scholarship was awarded. Applications must be in the hands of the Registrar on or before June 15th, 1901. Further particulars may be obtained from the Registrar.

THE ALEXANDER MACKENZIE Fellowships in Political Science, two of the value of \$375 each, the gift of the friends of the late Hon. Alexander Mackenzie. These fellowships are awarded annually by the University Council to graduates of the University of Toronto, and they are tenable for one year, but the Council may, at its discretion, award them for a second term. The holder of a Mackenzie Fellowship shall devote his time to the prosecution of special studies at the University of Toronto under the direction of the head of the department in which the fellowship is awarded. The sum of \$125 shall be paid to the holder of the Fellowship on the 15th October; a further sum of \$125 on the 15th January, provided that the progress of his studies is satisfactory to the Council at that date; and a final instalment of \$125 on the 15th April, or as soon thereafter as his thesis shall be accepted by the Council. During his tenure of the fellowship he shall not be permitted to pursue a professional or technical course of study, nor shall he engage in remunerative employment except by permission of the Council. He shall further conform to such other regulations as the Council may deem necessary for carrying out the object of special research for which these fellowships are designed. Any violation of the conditions under which the appointment is made shall operate to vacate the fellowship.

### G. The Flavelle Travelling Fellowship.

Through the liberality of J. W. Flavelle, Esq., of Toronto, the University Council is enabled to offer for competition in 1901 and 1903 a Travelling Fellowship, of the value of \$750 per annum, tenable for two years in the Modern History School of the University of Oxford, and awarded as follows :—In 1901 in the Department of Classics, in 1903 in the Department of English and History.

The object of the fellowship has been stated by the donor to be, "*in the first instance, to contribute something towards preparing and retaining in the country, if possible, a class of strong men, who may eventually find their way into public life, or at least be with us as the development of higher education in the Dominion requires their services: in the second instance, to encourage the study of history, ancient and modern.*"

The following paragraphs are extracts from the regulations governing the award :

- (1) The fellowship shall be open to men who have obtained first class honors in Classics, or "English and History," as the case may be, in at least the Third and Fourth years, but preferably during the whole of their course. Among the men thus qualified the fellowship shall be awarded to the man who stands first in ancient or modern history, as the case may be, as shown by his examinations. But the Board of Appointment (provided below) may by a vote, containing not more than one dissenting voice, pass over the candidate whose marks are highest in favor of one who, in their judgment, better meets the wishes of the donor as expressed in the words of the preamble "*in the first instance . . . . their services.*"
- (2) The fellowship shall be awarded in the month of June, and there sha'l be eligible for it members both of the class then graduating and of the class which graduated in the previous year, subject to the provisions of clause (1).
- (3) The fellowship shall be tenable only in the University of Oxford.
- (4) It shall be open to men only.
- (5) The fellow shall take advantage of the provisions made by the University of Oxford for Colonial students, and graduate in Oxford in the Honor School of Modern History.
- (6) Where graduates of different years are applying, the Board, if not unanimous in their choice, shall appoint a special examination, such as they think fit, for the purpose of selecting the best candidate, and shall give notice of such examination. The award shall then be made by a vote containing not more than one dissenting voice and subject to the provisions of clause (1) : but where all the candidates are of the same year no special examination shall be held.
- (7) Should a suitable man not be available in the department to which the fellowship by rotation falls, it shall be awarded in the other department on the same terms, and then alternate as contemplated.

Should no man be qualified in either department, the money shall accumulate, and be used for additional fellowships of the same kind and on the same terms.

- (8) The following shall constitute the first Board of Appointment :— Professors Hutton, Bell, Bain, Fletcher, Wrong, Robertson and Mr. Milner ; that is to say, three representatives of University College, three of Victoria College, and one of the University Arts Faculty. It shall be the duty of this Board to interpret and apply these clauses, to give notice of the fellowship and to call for applications.

## FELLOWSHIPS.

---

### University.

Tutorial Fellowships in Mathematics, Chemistry, Biology and Political Economy, of the annual value of \$500 each, are awarded annually. The selection is made from among graduates of the University. Each Fellow is appointed annually ; but he may be re-appointed for a period not exceeding, in all, three years.

Each Fellow is required to assist in the teaching and practical work of his department, under the direction of the Professor or Lecturer. The Fellows are selected with a special view to their aptitude for teaching, and their attainments in the department in which the appointment is to be made. Every Fellow on accepting his appointment comes under an obligation to fulfil the duties of his Fellowship during the Academic Year in which he is appointed, unless specially exempted.

Candidates must send in their applications annually to the Registrar, not later than the first day of June.

## REGULATIONS

AND

## CURRICULUM IN ARTS.

### Degree of Bachelor of Arts.

1. There are two ordinary modes of proceeding to the Degree of Bachelor of Arts, viz. : (1) by taking the General Course ; or, (2) by taking an Honor Course.

2. Candidates may enter the Faculty of Arts by passing either the Junior Matriculation examination or the Senior Matriculation examination.

3. The Junior Matriculation examination is held in July under the joint control of the University of Toronto and the Education Department of Ontario, at centres within the Province.

4. A Junior Matriculation examination is conducted by the Senate in September, at the University, and at such other places as may from time to time be determined upon.

5. The Senior Matriculation examination is held in May, June, and September, at the University ; but under certain conditions, the June examination may be held at local centres within the Province.

6. Junior and Senior Matriculation examinations will be held in June, at such places outside of the Province of Ontario as may from time to time be determined upon by the Senate. Applications for the appointment of local centres for holding such an examination must be made to the Registrar of the University not later than the fifteenth day of April in each year.

7. The examinations in September are open only to candidates taking the General Course.

### Junior Matriculation.

8. Candidates for Junior Matriculation must produce satisfactory certificates of good conduct, and of having completed the sixteenth year of their age.

9. All candidates for Junior Matriculation shall take the following subjects of the General Course :—English, Latin, History, Mathematics, and any two of the following :—Greek, French, German, Experimental Science (*i.e.*, Physics and Chemistry). The provisions of this section shall apply to all candidates for Junior Leaving or Junior Matriculation certificates who may have written at the examinations of 1899, or any previous year, and who desire matriculation standing.

10. The examination is divided into two parts, which may be taken at the same or separate examinations.

11. (a) Candidates for Part I. shall take the following subjects of the General Course :—Arithmetic, English Grammar, History of Great Britain and Canada ; candidates who select Experimental Science as one of their options shall take Physics in either Part I. or Part II.

(b) The Physics of the Third Form of the Examinations of the Education Department may be substituted for the Physics of this Part.

12. Candidates for Part II. shall take the following subjects of the General Course :—Latin, English Composition, English Literature, Ancient History, Algebra, Geometry, and any two of the following :—Greek, French, German, Chemistry.

13. Candidates for Honors and for Scholarships will be examined only on the Honor papers in a department ; but candidates who fail to obtain Honors may receive pass standing on these papers.

14. Candidates who have already passed Junior Matriculation, shall, if they again present themselves for examination at Junior Matriculation, be regarded as having passed Part I. only.

15. Candidates failing in one or more subjects of either Part may take at any one subsequent Examination held for that part, the subject or subjects in which they have failed.

16. For Pass, a candidate shall obtain one-third of the marks assigned to each paper. On each of the “ Authors ” papers not more than one-third of the marks shall be assigned to sight translation.

17. The ordinary annual examination for Pass and Honor Junior Matriculation shall commence in July, and applications therefor must be sent to the Education Department, through the Public School Inspector or the Registrar of the University, not later than May 24th. In the case of candidates for scholarships, applications must be sent to the Registrar of the University by the above-mentioned date. If the candidate desires to write at the University, the fee must accompany the application ; otherwise the fee must be sent through the Public School Inspector.

18. Applications from candidates outside of the Province of Ontario for the June examination must be sent to the Registrar of the University not later than the first day of May.

## Junior Matriculation Examination, 1903.

19. The subjects for Pass Junior Matriculation shall be taken at *one* examination, and shall be as follows : English Composition, English Literature, English Grammar, Algebra, Euclid, Arithmetic, History (British, Canadian and Ancient), Latin, and any *two* of Greek, French, German, Experimental Science (Physics and Chemistry).

20. The number of examination papers shall be as heretofore, except in History and Experimental Science, for each of which there shall be one paper, with two sections in each.

21. Candidates for honors and scholarships, who have already passed the Pass Junior Matriculation Examination, shall be exempt from the examinations in Arithmetic and English Grammar.

22. Candidates who have been starred in not more than *two* subjects at the Pass Junior Matriculation Examination shall complete the examination at one subsequent examination.

23. Candidates who have already passed Part I of the Pass Junior Matriculation or of the Junior Leaving Examination shall not be required to pass again in subjects thereof.

24. This scheme shall take effect at the Matriculation Examinations of 1903.

### Senior Matriculation.

25. The examinations for Senior Matriculation shall be held in May and September at the University of Toronto, and in June at the University of Toronto and such other centres as may be determined upon by the standing committee on examinations.

26. All candidates for Senior Matriculation in the General Course shall take the following subjects:—English; Latin; any two of the following languages, viz., Greek, French, German, Hebrew; Ancient History; Mathematics; Physics or Biology. Honor candidates for Senior Matriculation shall be subject to the same regulations as undergraduates of the First year.

27. Candidates who have passed the Senior Matriculation examination are subject to the same conditions regarding transference from the general course to an Honor course or *vice versa* as undergraduates who have completed their First year.

28. Candidates who present themselves in May will be examined in the papers of the First year examination, and the number and the standard of the examination papers and the regulations respecting the subjects of examination at the June examination shall be the same in each department as for the First year examination. The percentage for Pass at each of the examinations shall be one-third of the maximum of marks assigned to each paper. The percentage required for honors, shall be the same in each department in May and June as for the ordinary First year examination.

29. Candidates for this examination shall make application to the Registrar of the University not later than the fifteenth day of March for the May examination, and the fifteenth day of May for the June examination. Candidates for the June Senior matriculation, residing outside the Province of Ontario, shall make application to the Registrar of the University not later than the 1st day of May.

30. Applications for a local examination shall be made to the Registrar of the University by the authorities of a School or College, not later than the first day of May in each year.

31. The presiding examiner or examiners at each centre shall be appointed by the standing committee on examinations, and of these examiners, as many as may be found necessary, shall be appointed to read the dictation papers in French and German.

32. The fee for the presiding examiner at a centre shall be \$4.00 a day, and this fee and such other expense as may be incurred in connection with the local examination shall be paid to the persons concerned by the authorities of the School or College on whose application the examination is held.

33. The Board of Examiners for the June and Supplemental examinations shall be, as far as practicable, that appointed for the Junior Matriculation Supplemental examination in Arts.

### Matriculation Equivalent Examinations.

34. Certificates of having passed second or first class; Junior or Senior Leaving; or Forms II., III. or IV. examinations of the Education Department of Ontario will be accepted *pro tanto* for subjects of the General Course at any Junior Matriculation examination.

35. First Class, Senior Leaving, Form IV. Certificates, or a statement from the Education Department that the candidate has obtained in any subject or subjects, required for such certificate, not less than the percentage, for the time being, set by the Senate as that required for pass standing in the Faculty of Arts may be accepted *pro tanto* for such subject or subjects of the General Course at the Senior Matriculation and First Year's Examinations. Candidates presenting such certificates shall not be exempt from the examination in Ancient History prescribed for the First Year in the General Course.

36. Candidates presenting First Class, Senior Leaving, or Form IV. Certificates, covering the work of the First year or Senior Matriculation lacking one or two subjects may be admitted to standing in the General Course of the Second Year starred in such subject or subjects.

37. The standing of candidates for the whole or part of the examination for a higher grade of certificate than Senior Leaving shall be determined in each case by the Senate.

38. The examinations of the School of Practical Science in Mathematics, Physics, Chemistry, Mineralogy and Geology, may be accepted *pro tanto*.

39. Candidates presenting *pro tanto* certificates must attempt to pass at one time in all the subjects necessary to complete the entire examination and are eligible for scholarships and relative standing except in the case of candidates for Junior Matriculation honors and scholarships, who may present *pro tanto* certificates for Part I. only.

### Admission "ad Eundem Statum."

40. An undergraduate in the Faculty of Arts in another University may be admitted *ad eundem statum* on such conditions as the Senate may prescribe.

41. If such applicant be admitted to a lower standing in this University than he held in his own University, he may not compete for scholarships at the next ensuing examination; but if he obtain honors, he shall, at the next succeeding examination, enjoy the same rights and privileges with respect to obligatory subjects as an original undergraduate of this University who has passed an examination of the same merit.

42. The Local examinations for students, conducted by the University of Cambridge, are accepted *pro tanto* for Junior Matriculation.

## Supplemental Matriculation Examinations.

43. Supplemental examinations for Junior and Senior Matriculation will be held at the University about the middle of September, at which those who are rejected at previous examinations, as well as new candidates, may present themselves; but no honors or scholarships will be awarded at such examinations. The number and the standard of the examination papers, the regulations respecting the subjects of examination, and the percentage required for Pass, shall in each case be the same as at the ordinary examinations. Applications therefor must be sent to the Registrar of the University not later than 1st September.

## Matriculation Fees.

44. The fees payable are as follows :—

For Junior Matriculation, if Parts I. and II. are taken at the same time.....	Five Dollars.
For Junior Matriculation, Part I. ....	Two Dollars
For Junior Matriculation, Part II.....	Five Dollars
For Supplemental Examination in Junior Matriculation subjects in which the Candidate has failed, Two Dollars for each subject; total fee not to exceed .....	Five Dollars.
For Senior Matriculation.....	Fifteen Dollars
For Senior Matriculation on <i>pro tanto</i> certificate .....	Fifteen Dollars.
For <i>Ad eundem statum</i> .....	Ten Dollars.

The fee must be paid to the Bursar at the time of application for examination.

## Regulations Relating to all Undergraduates.

45. An undergraduate is a student (1) who has passed the Junior or Senior Matriculation Examination of this University, or (2) who has passed the Junior Matriculation Scholarship Examination of this University, or (3) who has registered the certificates of having passed the Matriculation Examination conducted by this University and the Education Department of Ontario, or (4) has been admitted *ad eundem statum* from some other University.

46. Undergraduates proceeding to the Degree of Bachelor of Arts must be enrolled either in University College or in Victoria University. They must also attend lectures on all the subjects of their course of study for the year, unless for sufficient reasons the University Council, on recommendation of the College in which they are enrolled, grants them a dispensation from lectures for the whole or part of the session. The fee for such dispensation shall be five dollars, and is additional to the enrolment fee. All applications for such dispensation for the Michaelmas Term must be lodged with the Registrar before October 1st, and for Easter Term before January 1st.

47. Undergraduates who are repeating the year without attendance on

lectures are required to apply for dispensation, but are not required to pay the dispensation fee.

48. In case a student who has won a scholarship at matriculation applies for dispensation from attendance for one or more of the years during which he is entitled to exemption from tuition fees, he shall be exempt from the usual fee for dispensation in lieu of tuition fees.

49. Every undergraduate must, before being admitted to any examination subsequent to that by which he enters the University, produce a certificate from the head of the College in which he is enrolled, to the effect that he has complied with all the requirements of that College affecting his admission to such examination, and no candidate shall be admitted to standing at any examination who has been reported by his College Council to have violated its regulations.

50. Notice of the time of commencement of the undergraduate examinations will be given annually in January.

51. Candidates in all the years are required to send to the Registrar of the University, at least six weeks before the commencement of each examination, an application for examination according to a printed form to be obtained from the Registrar. The fee for examination and, in the case of candidates for degrees, that for the degree, must be paid not later than April 15th.

## Regulations Relating to the General Course.

52. An undergraduate is entitled to the degree of Bachelor of Arts if in each year of his course he passes the examinations in the prescribed work of the General course.

53. Candidates in the General course in Arts must obtain at the annual examinations a minimum average of sixty-six per cent. in order to be placed in the first class in General Proficiency, and a minimum average of fifty per cent. in order to be placed in the second class. The candidates in these two classes shall be ranked in order of merit. All candidates failing to obtain fifty per cent. in each subject but obtaining not less than thirty-three per cent., shall be ranked as Pass candidates. The names of candidates in the General course in Arts who avail themselves of the theological options shall be placed in a list, separate from those who have not availed themselves of this privilege.

54. Candidates in the General course in Arts shall be arranged alphabetically in each subject in the annual class lists in three grades, A, B, and C; the minimum for Grade A shall be sixty-six per cent. of the marks, and for Grade B, fifty per cent.; all who pass with less than fifty per cent., but not less than thirty-three per cent., shall be placed in Grade C.

55. The name of a Pass candidate in Arts may be allowed to appear in the class lists of his year, provided there are not more than two subjects in which he has failed. These subjects may be among the obligatory subjects of the year, or they may be subjects attempted at a previous examination or examinations. Honor candidates may be starred in two subjects. General Proficiency candidates in Arts may be starred in one, but not in more than one subject of the General course on like conditions.

56. Honor candidates who have failed in one subject under the above regulation, and who in consequence have been starred in that subject, may repeat in May the whole examination at which they were starred, and similarly General Proficiency or Pass candidates who have been starred in one or two subjects, may repeat the whole examination either in September or in May, but such candidates shall not be eligible for scholarships. All candidates who do not exercise this option may present themselves for examination in the subjects in which they have been starred, either in September or in May, but on so presenting themselves, they shall be entitled to examination in those subjects only in which they have been starred. Honor candidates who are starred in two subjects shall be awarded no class standing and shall not be allowed to present themselves at any subsequent Honor examinations until they have passed in both of the subjects in which they have been starred. A supplemental examination will be held annually, in January, for those candidates only who have been starred. The fee for this examination is fifteen dollars.

57. Candidates of the Fourth year who have been starred in one or two subjects, but who have not succeeded in writing off these subjects at some previous examination, may be allowed to take this work at a special examination to be held in the latter part of April, or at the time of the annual examinations in May. Candidates taking advantage of this provision shall pay an additional fee of ten dollars. But in the case of English and Latin of the Third and Fourth years, a candidate shall not be considered to have written off his star, unless the Third year examination which he passes covers a different prescription of texts from that covered by his Fourth year examination.

58. When a candidate at an examination is starred in a subject which is one of two or more subjects between which an option exists at the said examination, the candidate at his supplemental examination may present himself in any one of such alternative subjects.

59. At the beginning of the Second, Third, or Fourth year a candidate may be transferred from the General course to an Honor course or *vice versa*, or from one Honor course to another Honor course, by passing an examination on such subjects, and by obtaining therein such a percentage as may be required by the Senate in view of the nature of the transfer granted. But transfer to an Honor course shall not be granted to any student who is starred in any subject of the General course.

60. A student in the General course who wishes to take honors in a department may be allowed to repeat his year, taking the work of the Honor department only if he so desires, and on passing with honors he shall be allowed to proceed in that department.

61. Undergraduates of any year, who have been rejected, or who have by sickness, domestic affliction, or other causes beyond their control been prevented from attending the Annual examinations in May, may present themselves for examination in September; but candidates who have failed to attend at the May examinations, must prove to the satisfaction of the Vice-Chancellor, before presenting themselves in September, the existence and sufficiency of the alleged cause of absence, and all such cases shall be subsequently reported to the Senate.

62. Undergraduates in the General course in the Third and Fourth years may, in lieu of one or more of the subjects prescribed for each of these years, take certain of the following subjects, namely, Biblical Greek, Biblical Literature, Apologetics, Church History, and Christian Ethics, according to the following schedule:—

THIRD YEAR....Biblical Greek *for* Classical Greek; Church History *or* Biblical Literature *for* Modern History; Apologetics *for* Physics.

FOURTH YEAR....Biblical Greek *for* Classical Greek; Biblical Literature *or* Church History *for* Modern History; Christian Ethics *or* Apologetics *for* History of Philosophy.

NOTE.—Candidates are allowed two of the three options in the Third, and all three in the Fourth year.

63. Undergraduates who exercise the theological options must present to the College in which they are enrolled certificates of having attended lectures (unless granted dispensation by the University) and of having passed examinations in the subjects so selected at an affiliated or federated College or University other than University College. These examinations must be taken in the same year as the corresponding University examinations, and be subject to the same regulations as to standard.

### Term Work in the General Course.

64. Reports of attendance at pass lectures in the First and Second years shall be made in all departments except those of Physics, Biology, Chemistry, and Geology, and marks for such attendance shall be assigned in connection with the May examination as follows:—

For attendance at four-fifths and over .....	20 marks.
“ “ “ two-thirds and over.....	13 “
“ “ “ one-half and over.....	7 “

65. No student attending less than one-half the lectures shall receive any marks for attendance.

66. Reports on term pass work in the First and Second years shall be made in all departments except those of Chemistry, Natural Science, and Physics. In the department of English four essays at least shall be required during the session from each student; and the reports on term work in that department shall be based on the essays. In other departments the report on term work shall be based on those parts of the work which the professor or lecturer may deem most appropriate as tests of proficiency. The maximum number of marks to be assigned for term work in connection with the May examination shall be thirty, except in the case of English, in which the term work shall count as eighty marks.

67. Students to whom the foregoing regulations apply must obtain on the May examination at least thirty-three per cent. of the examination marks; and must also obtain at least thirty-three per cent. of the aggregate number of marks assigned according to the following schedule:—

May examination .....	100
*Term work .....	30
Attendance .....	20
	<hr/>
Total .....	150

68. The Senate may, upon the report of the University or College Council concerned, based on the recommendation of a Professor or Lecturer, excuse registered students from term work and from attendance at lectures in any one or more subjects. Such exemption must be obtained at the beginning of each term, and no exemption from term work shall be allowed in the case of English.

\*English term work 80, and total 200.

### Regulations Relating to the Honor Course.

69. In this course there are eleven Honor departments, viz.: I. Classics; II. Modern Languages; III. English and History; IV. Oriental Languages; V. History; VI. Political Science; VII. Philosophy; VIII. Mathematics and Physics; IX. Natural Science; X. Chemistry and Mineralogy; XI. Physics and Chemistry.

70. Candidates shall not have the right to claim examination in more than two Honor courses after the first year.

71. An undergraduate is entitled to the degree of Bachelor of Arts, if in each year of his course he passes the examinations in the prescribed work of one of these departments, and also the subjects of the General course prescribed in connection therewith, at the respective times mentioned in the schedule at the head of each department.

72. In the annual class lists, the names of candidates who obtain honors in any department or subject shall be arranged in order of merit in three classes, those obtaining seventy-five per cent. and over of the total number of marks being placed in the first class, those obtaining sixty-six per cent., and less than seventy-five per cent. being placed in the second class, and those obtaining fifty per cent. and less than sixty-six per cent. being placed in the third class.

73. A candidate pursuing a course in an Honor department who falls below the third class in his department, shall not be allowed standing of the following year. But in the departments of Classics, Modern Languages, English and History, History, Political Science, Philosophy, Chemistry and Mineralogy, Physics and Chemistry, and Natural Science, candidates whose average is not less than third class, but who have fallen below third class in any one subject, may, on the recommendation of the examiners, be allowed to proceed as Honor candidates in the following year.

74. A candidate who competes for honors at the examination for Bachelor of Arts, and fails to obtain the requisite number of marks to entitle him to be classed in honors, may, on the recommendation of the examiners, be awarded a degree without honors; it being at the option of the candidate to accept the award of such a degree, or to wait until a subsequent examination, and again compete for a degree in honors.

75. An undergraduate who has obtained honors in any department may with the consent of the Senate be transferred to any other department, and

proceed therein, but as a prerequisite to obtaining the Degree of Bachelor of Arts, he must during his course have passed the examinations in the subjects of the General course required in the Honor department to which he is transferred.

76. Candidates in the honor subjects of Physics, Chemistry, Biology, Mineralogy and Geology, and Psychology will be ranked in the class lists on practical work done in the laboratories of the respective departments during the session ; and no candidate will be allowed to proceed to examination in any of these honor subjects unless he presents to the Registrar a certificate from the Professor that he has attained honor standing in the practical work of that subject.

77. In the departments of Philosophy, Mathematics and Physics, Physics and Chemistry, Chemistry and Mineralogy, and Natural Science, each candidate for honors must attend all examinations in the practical work of the year in which he presents himself for the University examination.

78. Undergraduates in the Honor department of Philosophy may, in the Third year, substitute for Modern History and Economics any two of the three following subjects, viz.: Church History, Apologetics, Biblical Literature. Undergraduates in the Honor department of Oriental Languages may, in the Third and Fourth years, substitute Biblical Greek for Classical Greek. Candidates exercising these options must present certificates of having attended lectures and passed examinations in the subjects so selected at an affiliated or federated College or University other than University College. These examinations must be taken in the same year as the corresponding University examinations, and be subject to the same regulations as to standard. These examinations do not count for honors.

79. In the Honor department of Philosophy two distinct examinations are held upon the two systems of Philosophy taught in the federated Arts Colleges.

### **Degree of Master of Arts.**

80. Candidates for the Degree of Master of Arts must have been admitted to the Degree of Bachelor of Arts, must be of the standing of one year from admission to the Degree of Bachelor of Arts, and must have sent in an approved thesis upon some subject in one of the departments in the Faculty of Arts. The thesis must be sent to the Registrar not later than 1st May.

### **Degree of Doctor of Philosophy.**

81. A candidate for the Degree of Doctor of Philosophy must have been admitted to a degree in Arts in the University of Toronto, must have pursued for at least two years the study of a major subject, must pass examinations on two minor subjects equivalent to first class honor standing for the B.A. Degree, and must present an approved thesis embodying the results of an original investigation. For details, see p. 194.

### **Admission "ad Eundem Gradum."**

82. A graduate in the Faculty of Arts in any University in Great Britain or Ireland (if his degree be not an honorary one) may be admitted to the same degree in the University of Toronto.

### History.

English History from the discovery of America to 1763.

General outlines of Greek History to the fall of Corinth.

General outlines of Roman History to the death of Augustus.

The Geography relating to the History prescribed.

One examination paper.

### Mathematics.

ALGEBRA : Elementary Rules ; Highest Common Measure ; Lowest Common Multiple ; Fractions ; Square Root ; Simple Equations of one, two and three unknown quantities ; Indices ; Surds ; Quadratics of one and two unknown quantities ; Theory of Divisors ; Ratio, Proportion, and Variation ; Progressions ; Notation ; Permutations and Combinations ; Binomial Theorem ; Interest Forms ; Annuities.

One examination paper.

GEOMETRY : Euclid, Books I, II, III, IV, and VI ; Definitions of Book V ; Deductions.

One examination paper.

TRIGONOMETRY : Trigonometrical ratios with their relations to each other ; Sines, etc., of the sum and difference of angles with deduced formulas ; Use of Logarithms ; Solution of Triangles ; Expressions for the area of Triangles ; Radii of circumscribed, inscribed, and escribed circles.

One examination paper.

PROBLEMS : One paper.

### Physics.

MECHANICS : Measurement of velocity ; uniformly accelerated rectilineal motion ; metr units of force, work, energy and power ; equilibrium of forces acting at a point ; triangle, parallelogram, and polygon of forces ; parallel forces ; principle of moments ; centre of gravity ; laws of friction ; numerical examples.

HYDROSTATICS : Fluid pressure at a point ; pressure on a horizontal plane ; pressure on an inclined plane ; resultant vertical pressure, and resultant horizontal pressure, when fluid is under air pressure and when not ; transmission of pressure ; Bramah's press ; equilibrium of liquids of unequal density in a bent tube ; the barometer ; air-pump ; water-pump, common and force ; siphon.

ELECTRICITY : Voltaic cells, common kinds ; chemical action in the cell ; magnetic effects of the current ; chemical effects of the current ; voltmeters ; electroplating ; astatic and tangent galvanometers ; simple notions of potential ; Ohm's law ; shunts ; measurement of resistance ; electric light, arc and incandescent ; current induction ; induction coil ; dynamo and motor ; the joule and watt ; electric bell ; telegraph ; telephone ; elements of terrestrial magnetism.

One examination paper.

### Chemistry.

Chemical Theory. The study of the following elements, with their most characteristic compounds, in illustration of Mendelejeff's Classification of the Elements : Hydrogen ; Sodium, Potassium ; Magnesium, Zinc ; Calcium, Strontium, Barium ; Boron, Aluminium ; Carbon, Silicon, Tin, Lead ; Nitrogen, Phosphorus, Arsenic, Antimony, Bismuth ; Oxygen, Sulphur ; Fluorine, Chlorine, Bromine, Iodine ; Manganese, Iron. Elementary Qualitative Analysis.

A practical examination shall be held in connection with this subject, a pure salt will be sent out for qualitative analysis, and the candidate shall be allowed the use of an analytical table.

One examination paper.

### Biology.

1. ELEMENTS OF ZOOLOGY : Thorough examination of the external form, the gills, and the viscera of some common fish. Study of the prepared skeleton of the same. Demonstration of the arrangement of the muscular and nervous systems and the sense-organs, as far as these can be studied without the aid of the microscope.

Comparison of the structure of the frog with that of the fish. The skeleton of the pectoral and pelvic girdles and of the appendages of the frog, should be studied, and the chief facts in the development of its spawn till the adult form is attained should be observed.

Examination of the external form of a turtle and a snake.

Examination of the structure of a bird.

Study of the skeleton, and also of the teeth of a cat or dog.

Study of the crayfish as a type of the Arthropods.

Comparison of the crayfish with an insect (grasshopper, cricket, or cockroach); also with a millipede and a spider.

Examination of an earthworm.

Study of a fresh-water mussel.

The principles of zoological nomenclature as illustrated by some of the common fresh-water fish, such as the sucker and herring, bass and perch.

Study of an amœba, or paramœcium as a type of a unicellular animal.

The modifications of the form of the body in vertebrates in connection with different methods of locomotion. The natural habits of the various animals examined.

2. ELEMENTS OF BOTANY: The examination will test whether the candidate has practically studied representatives of the flowering plants of the locality in which the preparatory school is situated, and representatives of the chief subdivisions of cryptogams, such as a fern, a lycopod, a horsetail, a liverwort, a moss, a lichen, a mushroom, and a chara.

An elementary knowledge of the microscopic structure of the bean and the maize. Attention will be given in the examination to drawing and description of parts of plants supplied, and to their classification. Comparison of different organs, morphology of root, stem, leaves and hair, parts of the flower, reproduction of flowering plants, pollination, fertilization, and the nature of fruit and seeds.

A practical examination shall be held in connection with this subject. The material for examination will consist of two plants, a microscopic section and an animal.

Two examination papers.

† Either Herodotus or Cicero's Letters must be read in the original: the other (with Thucydides) may be read in a translation.

DEPARTMENT OF POLITICAL SCIENCE.

---

*Additional Requirements:*—Candidates in this Department are required to take the following subjects of the General Course, in addition to the work prescribed below :

FIRST YEAR....English ; Latin ; any two of the following languages, viz., Greek, French, German, Hebrew ; Mathematics (including Permutations and Combinations, so far as necessary for the Binomial Theorem ; and the Binomial Theorem) ; Biology or Physics (Biology recommended) ; Ancient History.

SECOND YEAR....English ; Latin ; any two of the following languages, viz., Greek, French, German, Hebrew ; Logic and Psychology.

THIRD YEAR....English, Ethics.

*Term Work in Honors:*—The following term work, to be prescribed by the Professor of Political Economy and Constitutional History, is required in these subjects :

SECOND YEAR : Two essays in each term, in all four essays, and also a Term examination to be held before or shortly after Christmas vacation.

THIRD YEAR : Two essays in each term, in all four essays, and also a Term examination to be held before or shortly after Christmas vacation.

FOURTH YEAR : Two essays in each term, in all four essays, and also a Term examination to be held before or shortly after Christmas vacation.

In each year such term work and examination count for Honors in the annual examination.

---

### First Year.

Candidates for Honors in the Department of Political Science are required to take, in addition to the above subjects of the General Course, the full Honor course in one or other of the following Honor subjects in the First year : Latin ; Greek ; any two of the three languages ; English, French, German.

NOTE.—Students are recommended to take the Honor Latin in the First year instead of the Latin of the General course, in order that they may have the option of entering the History course in the Second year should they so desire.

## Second Year.

1. The Elements of Economics.
  2. Roman History to 266 B.C., Mommsen, Bks. I and II and Fustel de Coulanges' *La Cité Antique*.
  3. Mediæval History to 1300. (See Department of History for details).
  4. English Constitutional History to Magna Charta, including the study of the text of the principal constitutional documents.
  5. Mathematics (Elements of the Infinitesimal Calculus, with Elements of Analytical Geometry).
- 

## Third Year.

1. The Theory of Political Economy.
  2. Modern History from 1300 to 1763. (See Department of History for details).
  3. English Constitutional History from Magna Charta, including the study of the text of the principal constitutional documents.
  4. English Constitutional Law.
  5. Roman Law.
  6. History of English Law.
  7. Colonial Constitutional Law.
- 

## Fourth Year.

1. Economic History ; Public Finance ; Political Philosophy.
2. Modern History from 1763 to the present time (See Department of History for details).
3. History of Philosophy (Honor History of Philosophy of the Fourth year).
4. Jurisprudence.
5. Public International Law.
6. Federal Constitutional Law.
7. Canadian Constitutional History, including the study of the text of the principal constitutional documents.

Candidates may take either number 3 *or* numbers 4 and 5.

## DEPARTMENT OF PHILOSOPHY.

*Additional Requirements* :—Candidates in this Department are required to take the following subjects of the General course in addition to the work prescribed below :

FIRST YEAR.....English ; Latin ; any two of the following languages, viz., Greek, French, German, Hebrew (Greek and German recommended) ; Ancient History ; Mathematics ; Physics or Biology (Biology recommended).

SECOND YEAR.....Light ; any two of the following languages, viz., Greek, German, Latin, French, Hebrew (Greek and German recommended).

THIRD YEAR.....English or History ; Honor Economics (Pass s'tanding).

---

### Second Year.

LOGIC : Formal and Inductive : Scientific Methods.

PSYCHOLOGY : (a) Sensation, Thought, Emotion, Volition ; (b) Experimental, Introductory Course, Psychophysical methods, the senses of taste and smell, and the dermal and kinæsthetic Senses.

METAPHYSICS : Locke, Essay on the Human Understanding ; Berkeley, Principles of Knowledge ; Hume, Treatise on Human Nature, Book I.

---

### Third Year.

LOGIC : Scientific Methods ; J. S. Mill.

ETHICS : Theory of Ethics ; History of Ethics ; Essays on Ethical Topic.

HISTORY OF PHILOSOPHY : Ancient and Mediæval ; Cicero, De Finibus, Books I and II.

PSYCHOLOGY : (a) Experimental study of psychological optics and acoustics and the time and space relations of mental phenomena ; (b) the more important problems of General Psychology, with selected readings from Bain, Baldwin, James, Ladd, Sully, Tracy, Ward, Wundt.

---

### Fourth Year.

HISTORY OF PHILOSOPHY : Modern ; Special study of Kant's Critiques.

ETHICS : Aristotle, Nicomachean Ethics ; Kant's Ethical Writings ; 1901-02 Sidgwick's Methods of Ethics ; Essays.

PSYCHOLOGY : Practical work in the Laboratory.

**METAPHYSICS :—**

(a) Kant's Prolegomena (paragraphs 1-50). Aristotle's Metaphysics.

(b) (1901-1902). Descartes Meditations and Method; Spinoza, Ethic; Leibnitz, Nouveaux Essais; Lotze, Metaphysics; Wundt, System of Philosophy.

(c) (1902-03). Hamilton's Notes on Reid; Mansel; Comte, Positive Philosophy; J. S. Mill, Examination of Sir William Hamilton; Spencer's First Principles.

Essays on Metaphysical Topics.

Review of the work of previous years, and Essays.

**NOTE.**—Candidates from St. Michael's College may substitute Lorimer's Institutes of Law for Kant's Ethics, in Fourth year; and also Aristotle's Ethics, Bks. I-IV in the original, and one of Plato's Dialogues in the original, for the Experimental Psychology in the Fourth year.

---

**DEPARTMENTS OF MATHEMATICS AND PHYSICS.**

---

*Additional Requirements.*—Candidates in this Department are required to take the following subjects of the General Course in addition to the work prescribed below :

**FIRST YEAR.** . . . . English; Latin *or* Greek; French *or* German.

---

**First Year.**

Elementary Physics (Mechanics, Hydrostatics and Heat); Elementary Chemistry; Algebra, including Determinants and omitting Theory of Probability; Trigonometry (Plane and Spherical); Analytical Plane Geometry.

---

**Second Year.**

Elementary Physics (Electricity and Magnetism, and Acoustics); Physical Chemistry, with Laboratory work; Newton's Principia, sec. I; Differential Calculus; Integral Calculus; Solid Geometry; Elementary Analytical Statics and Particle Dynamics.

---

**Third Year.**

Elementary Physics (Light); Advanced Analytical Statics; Advanced Particle Dynamics; Hydrostatics; Geometrical Optics; Rigid Dynamics; Thermodynamics (elementary); Theory of Equations with Determinants continued from the First year; Laboratory Work.

**Fourth Year.**

Candidates are allowed to take either Division I or Division II in the Fourth year.

## DIVISION I.—MATHEMATICS.

Astronomy ; Differential Equations ; Higher Plane Curves with introductory course in Modern Geometry ; Quaternions with outlines of similar space analyses ; also any two of the following courses, the selection to be made by the Mathematical Department at the beginning of each year :—

1. Invariant Theory. 2. Theory of Numbers. 3. Theory of Substitutions. 4. Elementary Theory of Functions. 5. Elliptic Functions. 6. Tangential Co-ordinates or Trilinear Co-ordinates. 7. Modern Synthetic Geometry, as illustrated by Cremona's Projective Geometry, or Reye's Geometry of Position, or Lachlan's Modern Plane Geometry. 8. Theory of Probability.

## DIVISION II.—PHYSICS.

Elasticity ; Acoustics ; Physical Optics ; Thermodynamics (advanced) ; Electricity and Magnetism ; Method of Least Squares ; Laboratory Work.

NOTE.—The Education Department of Ontario accepts an Honor degree of the University of Toronto, obtained in the above course, as the non-professional qualification for specialist standing in the Department of Mathematics.

## DEPARTMENT OF NATURAL SCIENCE.

*Additional Requirements* :—Candidates in this Department are required to take the following subjects of the General course in addition to the Honor work prescribed below :

FIRST YEAR. . . . Latin or Greek ; English ; Mathematics ; French or German.

SECOND YEAR. . . . English.

THIRD YEAR. . . . English.

FOURTH YEAR. . . . English.

**First Year.**

Elementary Biology with Laboratory work, including the study of typical animals and flowering plants.

Elementary Physics (Mechanics, Hydrostatics, and Heat), including Laboratory work.

Elementary Chemistry.

## Second Year.

Zoology of the Invertebrata, with a practical knowledge of typical forms ; Structure of the Vegetative and Floral Organs of Phanerogamous Plants, the course to include Laboratory work ; Elementary Physiology ; Chemistry, with practical work ; Elementary Mineralogy, Lithology and Dynamical Geology, with practical work ; Physics (Acoustics, Light, Electricity and Magnetism) with Laboratory work.

---

## Third Year.

The candidate may select either of the two following divisions for examination :—

### DIVISION I.—BIOLOGY.

Zoology of the Vertebrata, with Laboratory and Museum work illustrative of this course ; Vegetable Physiology ; Structure and classification of Cryptogamic Plants, with practical knowledge of types ; Organic Chemistry, with Laboratory work ; Historical and Stratigraphical Geology and Palæontology, with excursions and Laboratory work.

### DIVISION II.—GEOLOGY.

Zoology of the Vertebrata, with Laboratory and Museum work illustrative of this course ; Palæontology of the Invertebrata and Palæophytology, with practical work ; Historical and Stratigraphical Geology ; Economic Geology ; Mineralogy, Elementary Crystallography and Determination of Minerals, with Laboratory practice ; Quantelative Chemical Analysis.

---

## Fourth Year.

The candidate may select either of the two following divisions for examination :—

### DIVISION I.—BIOLOGY.

Morphology and Embryology of Vertebrates, with special dissection of a typical Vertebrate Form ; Histology ; Bacteriology ; General Biology ; Physiology ; Physiological Chemistry ; Physiological Psychology.

### DIVISION II.—GEOLOGY.

Archaean Geology ; Glacial Geology ; Structural Geology ; Field work in Geology ; Physiography ; Meteorology ; Petrology (Megascopic and Microscopic) ; Palæontology of the Vertebrata ; History of Mineralogy ; Crystallography (Theoretical and Practical) ; Mineral Chemistry and Assaying.

Students in the department are required to submit a Mineralogical, Petrographical or Palæontological collection made during the previous holidays.

NOTE.—The Education Department of Ontario accepts an Honor degree of the University of Toronto, obtained in the above course, as the non-professional qualification for specialist standing in the Department of Science.

DEPARTMENT OF CHEMISTRY AND MINERALOGY.

---

*Additional Requirements:*—Candidates in this Department are required to take the following subjects of the General course in addition to the Honor work prescribed below :

FIRST YEAR. . . . . English; Latin; German or French; Algebra; Trigonometry.

---

**First Year.**

CHEMISTRY : Elementary Chemistry ; Physical Chemistry ; Laboratory work.

PHYSICS : Elementary Physics (Mechanics, Hydrostatics and Heat).

MATHEMATICS : Elementary Analytical Geometry.

---

**Second Year.**

CHEMISTRY : Inorganic Chemistry ; Physical Chemistry ; Elementary Organic Chemistry ; Laboratory work.

MINERALOGY : Theoretical and Practical.

PHYSICS : Electricity and Magnetism ; Light ; Acoustics ; Laboratory work.

MATHEMATICS : Elementary Differential and Integral Calculus.

---

**Third Year.**

CHEMISTRY : Advanced Organic Chemistry ; Physical and Inorganic Chemistry ; Laboratory work.

MINERALOGY : Spectrum Analysis ; Determinative Mineralogy ; Crystallography.

PHYSICS : Practical Electricity.

---

**Fourth Year.**

CHEMISTRY : History of Chemical Theory ; Organic and Inorganic Chemistry, including the study of selected Monographs ; Theory of Chemical Equilibrium ; Electro Chemistry.

MINERALOGY : Systematic Mineralogy ; Physical and Mathematical Crystallography ; Assaying (practical).

In the case of students who desire to obtain a "Specialists' Certificate in Science," the Biology of the First year of the Department of Natural Science must be substituted for the Mineralogy of the Third year; and the Biology of the Second year for the Mineralogy of the Fourth year.

NOTE.—The Education Department of Ontario accepts an Honor degree of the University of Toronto, obtained in the above course, as the non-professional qualification for specialist standing in the Department of Science.

## DEPARTMENT OF PHYSICS AND CHEMISTRY.

---

*Additional Requirements:*—Candidates in this Department are required to take the following subjects of the General course in addition to the work prescribed below:

FIRST YEAR . . . English; Latin or Greek; French or German; Trigonometry.

---

### First Year.

PHYSICS: Elementary Physics (Mechanics, Hydrostatics, and Heat); Laboratory work.

CHEMISTRY: Elementary Chemistry; Physical Chemistry; Laboratory work.

MATHEMATICS: Analytical Geometry; Algebra.

---

### Second Year.

PHYSICS: Electricity and Magnetism, Acoustics; Analytical Statics; Dynamics of a Particle; Laboratory work.

CHEMISTRY: Inorganic Chemistry; Physical Chemistry; Laboratory work.

MATHEMATICS: Differential and Integral Calculus; Solid Geometry.

---

### Third Year.

PHYSICS: Thermodynamics; Light; Laboratory work, including Practical Electricity.

CHEMISTRY: Organic Chemistry; Theory of Chemical Affinity; Laboratory work.

MATHEMATICS: Differential Equations.

### Fourth Year.

PHYSICS : Electricity and Magnetism ; Thermodynamics (advanced) ; Laboratory work.

CHEMISTRY : Organic Chemistry ; Chemical Thermodynamics ; Electro-Chemistry ; History of Chemical Theory ; Laboratory work.

NOTE.—The Education Department of Ontario accepts an Honor degree of the University of Toronto, obtained in the above course as the non-professional qualification for a specialist's certificate in Science, provided the candidate has also obtained Honor standing in each of the First and Second year examinations in Biology of the Department of Natural Science. The Education Department of Ontario accepts an Honor degree of the University of Toronto, obtained in the above course as the non-professional qualification for a specialist's certificate in Mathematics, provided the candidate has also obtained Honor standing in the following additional subjects of the Department of Mathematics and Physics, taken at not more than two examinations: Trigonometry (plane and spherical); Newton's Principia, Sec. I; Statics and Dynamics (advanced); Rigid Dynamics; Hydrostatics (advanced); Geometrical Optics (advanced); Elasticity; Hydrodynamics; Method of Least Squares.

## DEGREE OF PH.D.

The Degree of Doctor of Philosophy has been established for the purpose of encouraging research in the University of Toronto, and is conferred on the following conditions :—

1. The candidate shall be a graduate in Arts of the University of Toronto, and shall register in the University of Toronto as a graduate student. Graduates in Arts of other Universities who have been admitted *ad eundem gradum* in this University may also register. The Registrar shall not register any student unless he present a certificate of qualification from the professors and heads of that department in the University of Toronto, University College, and Federated Universities, from which he proposes to select his major subject. Such registration may take place at any time in the academic year.

2. The candidate shall after registration have pursued for at least two years the study of a special subject, to be termed the major subject, under the direction of the professor of such subject in the University of Toronto, University College, or Federated Universities.

3. Exemption from attendance for the first of the two years of study may be granted upon the report of the professor, but the candidate shall present satisfactory evidence of study in his major subject at another University during that year.

4. The candidate shall pass examinations in two other subjects, to be termed the minor subjects. He shall obtain a standing in the examinations in the two minor subjects equivalent at least to that required for second class Honors in the examination for the B.A. degree. The examination in either or both minor subjects shall be dispensed with in case the candidate has obtained first-class Honors in either or both of such subjects at the examination for B.A. in this University.

5. The candidate shall present a thesis on some topic in his major subject embodying the results of an original investigation conducted by himself.

6. The acceptance of the thesis shall be determined upon the report of the professors and heads of that department which includes the major subject, in the University of Toronto, University College and Federated Universities, and such report shall also state that the candidate has passed a satisfactory examination in his major subject. The candidate, after the acceptance of the thesis, shall furnish to the Registrar one hundred printed copies of such thesis together with the report thereon, before he receives the degree.

7. The annual fee for registration in the University of Toronto and University College is \$25, and the fee for the degree of Doctor of Philosophy is \$50.

8. The candidate shall select one of his minor subjects from the group to which his major subject belongs, and shall select his second minor as indicated in the annexed table.

The following is the list of major subjects arranged in groups :

## GROUP I. BIOLOGY.

1. Animal Morphology.
2. Animal Physiology.
3. Botany.

## GROUP II. CHEMISTRY.

1. Inorganic Chemistry.
2. Organic Chemistry.
3. Physical Chemistry.
4. Physiological Chemistry.

## GROUP III. PHYSICS.

1. Light.
2. Heat.
3. Electricity.
4. Sound.
5. Dynamics.

## GROUP IV. GEOLOGY.

1. Geology.
2. Mineralogy.
3. Palæontology.

## GROUP V. PHILOSOPHY.

1. Logic and Metaphysics.
2. Psychology.
3. History of Philosophy.
4. Ethics.

## GROUP VI. ORIENTAL LANGUAGES AND LITERATURE.

1. Hebrew Language and Literature.
2. Aramaic Language and Literature.
3. Arabic Language and Literature.
4. Assyrian Language and Literature.

## GROUP VII. POLITICAL SCIENCE.

1. Economic History.
2. Economic Theory.
3. Philosophy of Politics.
4. Constitutional History and Law.

Minor subjects also may be chosen from the following groups :

## GROUP VIII. MODERN LANGUAGES AND LITERATURE.

1. Old English.
2. Modern English.
3. Modern French.
4. Old French.
5. Modern German.

GROUP IX. LATIN AND GREEK LANGUAGES AND LITERATURE.

1. Greek Language and Literature.
2. Latin Language and Literature.
3. Greek Philosophy.
4. Roman and Greek History.

GROUP X. HISTORY.

1. Canada under the French Régime.
2. Canada under British Rule.
3. The American Revolution.

GROUP XI. MATHEMATICS.

1. Geometry.
2. Analysis.

The provisions of this statute may be extended to any other department in the University of Toronto, University College and Federated Universities, upon application of the head or heads of such department to the University or College to which he or they belong, and upon satisfying such governing body of the ability of their department to carry out the purposes of this statute.

Until the extension of the provisions of this statute to departments not at present included in the preceding enumeration of groups, the heads of such departments shall, when asked so to do, name subjects as second minors in their departments.

TABLE.

When the candidate selects his major subject from	He shall select his second minor subjects from
Group I.	Group II., III., IV., or V.
Group II.	Group I., III., IV., or XI.
Group III.	Group I., II., IV., V., or XI.
Group IV.	Group I., II., III., or V.
Group V.	Group I., II., III., VII., or IX.
Group VI.	Group V., VIII., IX., or X.
Group VII.	Group V., VIII., IX., X., or XI.

## Courses of Instruction in Arts.

---

The undergraduate courses of instruction in Arts, in the University of Toronto and the Colleges, are based upon the Curriculum, as above (pp. 67-106). The following statements regarding the scope and aim of the courses are added in cases in which such additional information is considered desirable, together with the names of the teaching staff for 1900-1901 :—

ALFRED BAKER, M.A. ....	<i>Professor.</i>
A. T. DELURY, B.A. ....	<i>Lecturer.</i>
H. J. DAWSON, M.A. ....	<i>Fellow.</i>
J. MCGOWAN, B.A., B.A.Sc. ....	<i>Fellow.</i>

Supplemental to the General course of the First year, embracing Euclid, Elementary Algebra and Trigonometry, a course is offered in Permutations, Combinations and Binomial Theorem, and also in Elementary Analytical Geometry of two dimensions, suitable for such as, in the Second year, wish to enter upon the study of Elementary Infinitesimal Calculus. The course in Elementary Analytical Geometry is valuable also for its own sake, as it establishes the more important properties of the Conic Sections.

In the Honor work of the First year the following text-books are recommended : Hall and Knight's Higher Algebra, C. Smith's Treatise on Algebra, Todhunter and Hogg's Trigonometry, Hobson's Trigonometry, Todhunter's Spherical Trigonometry, C. Smith's Conic Sections, Salmon's Conic Sections.

In the Second year the elementary course in Differential and Integral Calculus is designed to afford such knowledge of the character, methods and place in science of this important subject as educated men should possess, and also to enable students in Chemistry, Engineering, etc., to understand those of their text-books in which the Calculus is introduced.

A further course of lectures is given in the elements of Analytical Geometry and of the Infinitesimal Calculus, intended specially for students in Economics, who it is hoped will thus be in a position to follow recent developments in this science.

In the Honor work of the Second year the following text-books are recommended :—Williamson's Differential Calculus, Williamson's Integral Calculus, Kiepert's Differential-und Integral-Rechnung, C. Smith's Solid Geometry, Evans' Main's Principia, Frost's Principia. For the remainder of the work in the Second year, see Department of Physics.

Mathematical students in the Third year take Theory of Equations, including Determinants continued from the First year; text-book—Burnside and Panton. For the remainder of the work in the Third year, see Department of Physics.

In the work of the Fourth year the following text-books are recommended : Newcomb and Holden's Astronomy, Barlow and Bryan's Elementary Mathematical Astronomy, Godfray's Astronomy, Chauvenet's Astronomy; Godfray's Lunar Theory; Cheyne's Planetary Theory; Johnson's Differential Equations, Forsyth's Differential Equations; Page's Ordinary Differential Equations, Murray's Introductory Course in Differential Equations; Salmon's Higher Plane Curves; Kelland and Tait's Quaternions, Hime's Outlines of Quaternions, Tait's Quaternions; Elliott's Algebra of Quantics, Salmon's Higher Algebra; Mathew's Theory of Numbers; Netto's Theory of Substitutions; Durège's Theory of Functions, Forsyth's Theory of Functions, Harkness and Morley's Theory of Functions; Dixon's Elliptic Functions, Cayley's Elliptic Functions, Appell and Lacour's Fonctions Elliptiques; Papelier's Coordonnées Tangentielles; Ferrers' Trilinear Coordinates; Cremona's Projective Geometry; Rey's Geometry of Position translated by Holgate; Lachlan's Modern Pure Geometry.

By courtesy of the authorities of the observatory, students have access to and use of the astronomical instruments.

The Department is furnished with the admirable thread and plaster models of Brill for illustrating the teaching of Geometry of three dimensions.

### Physics.

JAMES LOUDON, M.A., LL.D. ....	<i>Professor.</i>
W. J. LOUDON, B.A. ....	<i>Demonstrator.</i>
C. A. CHANT, M.A., PH.D. ....	<i>Lecturer.</i>
J. C. McLENNAN, B.A., PH.D. ....	<i>Demonstrator.</i>
J. S. PLASKET, B.A. ....	<i>Mechanical Assistant.</i>
G. R. ANDERSON, M.A. ....	<i>Assistant.</i>

The work of instruction in Physics consists of courses of lectures and of practical work in the laboratories. The lectures include, (1) an introductory course for Medical students, (2) an elementary course illustrated by experiments in Mechanics, Hydrostatics, and Heat, as required by students of the First year in Arts, (3) a similar course in Optics, Electricity and Magnetism for students of the Second year in Arts, (4) a similar course on Acoustics and Physical Optics for students of the Third year in Arts, and (5) advanced courses on Mathematical Physics for Honor students in the Second, Third and Fourth years in Arts.

The elementary courses for students of the First, Second and Third years in Arts are also attended by students in Engineering, Architecture and other departments.

In the practical work of the Laboratory there are at present eleven courses, six elementary and five advanced, which have been arranged to meet the requirements of Arts students, Engineers, Architects, and candidates for specialists' certificates at the Education Department.

Facilities are also afforded in the Laboratories and workshop to Graduate students who desire to engage in research work.

*Text-books: General Physics:* Ganot's Physics; Hastings and Beach's General Physics. *Elementary Mechanics:* Lock, Mechanics for Beginners; Glazebrook, Statics and Dynamics. *Elementary Hydrostatics:* Glazebrook, Hydrostatics. *Elementary Heat:* Glazebrook, Heat; R. W. Stewart, Text-book of Heat. *Elementary Light:* Glazebrook, Light. *Elementary Electricity and Magnetism:* Poyser, Advanced Magnetism and Electricity; Silvanus Thompson, Elementary Lessons. *Advanced Mechanics:* Minchin, Statics; Routh, Statics; Tait and Steele, Dynamics of a Particle. *Geometrical Optics:* Jamin, Optique Géométrique. *Hydrostatics:* Besant. *Rigid Dynamics:* Loudon. *Acoustics:* Donkin. *Elasticity,* Williamson. *Physical Optics:* Preston, Theory of Light. *Thermodynamics:* Clausius, Mechanical Theory of Heat. *Electricity:* J. J. Thomson, Elements of Electricity and Magnetism. *Least Squares:* Merriman. *Practical Physics:* Loudon and McLennan.

*Works of Reference: General Physics:* Deschanel's Natural Philosophy (by Everett); Jamin's Cours de Physique; Violle's Cours de Physique; Daniell; Gallatly; Nichols and Franklin; Jones's Examples in Physics; Thomson and Tait's Natural Philosophy; Christiansen; Macfarlane's Tables; Chambers's Tables. *Elementary Mechanics:* Briggs and Bryan, Statics, Dynamics; Magnus; Loney, Dynamics; Garnett, Dynamics; Clifford; Greaves; Hicks. *Elementary Hydrostatics:* Loney, Mechanics and Hydrostatics; Briggs and Bryan. *Elementary Heat:* Jones, Heat and Light; Garnett; Tyndall; Balfour Stewart; Tait. *Elementary Light:* Jones, Heat and Light; R. W. Stewart; Tyndall; Tait; Wright, Light, Optical Projection. *Elementary Electricity and Magnetism:* Cumming; Larden; R. W. Stewart; Day, Exercises in Electricity and Magnetism. *Elementary Sound:* Catchpool; Tyndall; Zahm; Taylor, Sound and Music; Blaserna; Stone; Mayer; Capstick. *Advanced Mechanics:* Minchin, Statics; Routh, Statics; Ziwet; Todhunter, Statics; Besant, Dynamics; Williamson and Tarleton, Dynamics; Price, Infinitesimal Calculus; Resal; Appell, Traité de Mécanique rationnelle. *Geometrical Optics:* Aldis; Heath; Parkinson. *Hydrostatics:* Besant; Minchin; Greenhill. *Rigid Dynamics:* Routh; Pirie; Worthington, Dynamics of Rotation; Aldis. *Acoustics:* Rayleigh, Theory of Sound; Helmholtz, Sensations of Tone; Airy, Sound; Koenig, Quelques Expériences; Chladni; Radau. *Physical Optics:* Jamin; Verdet; Basset; Glazebrook; Lommel; Mascart. *Elasticity:* Lamé; Ibbetson; Love; Todhunter, History. *Hydrodynamics:* Lamb; Basset. *Heat:* Preston; Maxwell; Tait. *Electricity:* Entage; Maxwell; Mascart and Joubert; Gerard; Gray; Heaviside; Watson and Burbury;

Ebert; Du Bois; Foster and Atkinson's Joubert; Glazebrook; Webster. *Least Squares*: Merriman; Wright, Adjustment of Observations; Airy, Theory of Errors; Holman; Johnson; Comstock; Gauss. *Practical Physics*: Stewart and Gee; Glazebrook and Shaw; Kohlrausch, Physical Measurements; Witz; Ayrton, Practical Electricity; Kempe; Nichols.

### Mineralogy and Geology.

A. P. COLEMAN, M.A., PH.D. . . . . *Acting Professor.*

W. A. PARKS, B.A., PH.D. . . . . *Instructor.*

An elementary course in Geology is given in the Second year, and arrangements are made for the study of rocks and fossils. Lectures and laboratory work in Mineralogy, Petrology and Dynamical Geology, are provided for Honor students.

In the Third year, lectures are given in Historical and Stratigraphical Geology, Economic Geology, Mineralogy, Elementary Crystallography, Palæontology of the Invertebrates and Palæobotany. Practical work will be conducted in Geology, Mineralogy and Palæontology.

In the Fourth year, lectures are given in Physiography, Geology, Palæontology of the Vertebrates, Lithology, Meteorology and Crystallography. The practical work of the year comprises Excursions and other Geological work, Megascopic and Microscopic Lithology, Practical Crystallography, Mineral Chemistry and Assaying. It is expected that students in the Department will make a collection of minerals, rocks or fossils during the previous vacation.

*Text-books and works of reference*: Chapman's Minerals and Geology of Ontario and Quebec; Dana, Manual of Geology; Geikie, Text-book of Geology; Le Conte, Elements of Geology; Prestwich, Geology; Phillips, Ore Deposits; Kemp, Ore Deposits of the United States; Nicholson, Palæontology; Zittel, Handbuch der Palæontologie; Steinmann Döderlein, Elemente der Palæontologie; Dana, Mineralogy; Naumann, Mineralogie; Tschermack, Mineralogie; Chapman, Mineral Indicator and Blowpipe Practice; Rosenbusch (and Iddings) Microscopical Physiography of Rock Making Minerals; Zirkel, Lehrbuch der Petrographie; Groth's Physikalische Krystallographie; Davis' Elementary Meteorology; Reports of the Geological Survey of Canada.

Honor students of all years are required to pay laboratory supply fees in advance to the Bursar.

### Chemistry.

W. R. LANG, D.Sc., F.C.S. . . . .	{	Professor of Chemistry and Director of
		the Chemical Department.
W. L. MILLER, B.A., PH.D. . . . .		Associate Professor of Physical Chemistry.
F. B. ALLAN, M.A., PH.D. . . . .		Lecturer.
F. B. KENRICK, M.A., PH.D. . . . .		Lecturer.
MISS C. C. BENSON, B.A. . . . .		Fellow.
C. M. CARSON, B.A. . . . .		Lecture-Assistant.

The following courses of lectures on Chemistry will be delivered in the Chemical Laboratory :—

**INORGANIC CHEMISTRY :** 1. *Systematic.* An introductory course on descriptive Chemistry, and on the Atomic and Molecular theories, for First year Chemistry and Mineralogy, First year Physics and Chemistry, First year Natural Science, First year Mathematics and Physics, First year Medicine, and Second year Pass. 2. *Tutorial Class.* The Systematic is divided into sections which meet once a week for further instruction in Arithmetical Chemistry. Home work involving simple calculations is prescribed. 3. *Special.* A course is delivered one day a week during Michaelmas Term explanatory of laboratory work. 4. *Special.* A special course on Inorganic Chemistry for First year Chemistry and Mineralogy, and Physics and Chemistry.

**ORGANIC CHEMISTRY :** 1. The fatty and the aromatic compounds, for the Fourth year Physics and Chemistry, and for the Third year Chemistry and Mineralogy. 2. A more elementary course on the fatty compounds, with a few lectures explanatory of the Benzene theory, for the Third year Natural Science, Second year Medicine and Second year Chemistry and Mineralogy, and Third year Physics and Chemistry. 3. A course on Synthetic methods, and on Stereochemistry for Fourth year Chemistry and Mineralogy.

**HISTORY OF CHEMICAL THEORY :** For Fourth year Chemistry and Mineralogy, and Physics and Chemistry.

Special instruction will in addition be given to the students of the Departments of Chemistry and Mineralogy, and Physics and Chemistry, as occasion requires.

**PHYSICAL CHEMISTRY :** 1. *Elementary.* A course on the relations between Chemical and other forms of Energy, for Second year Chemistry and Mineralogy, Second year Physics and Chemistry, Second year Natural Science, and Second year Mathematics and Physics. 2. *Introductory.* Stoichiometry, Theory of Solutions, Introduction to Electrochemistry, etc., with elementary applications of the calculus to physico-chemical problems, for Second year Chemistry and Mineralogy, and Second year Physics and Chemistry. 3. *Theory of Affinity.* Velocity of reactions, the mass law, Electrochemistry, and elementary applications of thermodynamics to chemical problems, for Third year Chemistry and Mineralogy. 4. *Chemical Thermodynamics.* A general course on Energetics, with special application to chemical problems, for the Fourth year Chemistry and Mineralogy.

### Laboratory Regulations

Each student proposing to attend lectures or practical work in the Chemical Laboratory must apply for a ticket which will have marked on it the number of his seat in the lecture-room, of his hat rack, of his working place in the laboratory and of his locker. This ticket will be given only to students presenting their registration tickets, and no working place in the laboratory will be allotted until a deposit of three dollars has been made. Each student will

be held responsible for the seat, etc., allotted him, and no change may be made without the consent of the professor. At the close of the Easter term this ticket must be presented for certificate of attendance.

Each student is provided with a suitable note-book in which to keep an account of the work done by him during the year. These books will be examined from time to time, and marks will be assigned. The student's standing in practical Chemistry is based upon these marks, together with those assigned for the practical examinations of the term, and for written examinations on the work.

At the beginning of the term the following apparatus will be provided :—  
*For Qualitative Analysis:* A key; a test tube stand; twelve test tubes; a test tube cleaner; one mortar and pestle; one evaporating dish; two watch glasses; one crucible and cover; a pair of crucible tongs; a package of filter paper; two funnels; a Bunsen burner with rubber tubing; a sandbath and tripod; a blowpipe; a wash bottle;  $H_2S$  generator; a duster. *For Quantitative Analysis:* A key; five beakers; mortar and pestle; evaporating dish; two crucibles and covers; a pair of crucible tongs; a pair of weighing glasses; package of filter paper; two funnels; a Bunsen burner with tubing; an Argand burner with tubing; an exsiccator; a stand and ring; a wash bottle; a duster.

An account will be kept with each student; all apparatus broken or destroyed and all fines will be charged against his deposit, which must be renewed when exhausted.

The apparatus provided is intended for use in the laboratory only, and may not be removed from the building. At the close of the term's work it must be returned clean and dry.

### Biology.

R. RAMSAY WRIGHT, M.A., B.Sc. .... *Professor.*  
 A. B. MACALLUM, M.A., M.B., PH.D. .... *Associate-Professor of Physiology.*  
 E. C. JEFFREY, B.A., PH.D. .... *Lecturer on Biology.*  
 R. R. BENSLEY, B.A., M.B. .... *Demonstrator in Biology.*  
 JOS. STAFFORD, B.A., PH.D. ... *Fellow in Biology.*

The lectures and practical instruction in this subject are given in the University Biological Building.

The following arrangements will be in force for 1901-1902 :—

1. A course of elementary lectures on Biology will be given twice a week to prepare candidates for the University examination of the First year. For reference: Jeffrey Parker, Biology; High School Zoology; Atkinson, Elementary Botany.

2. An additional series of twenty-five lectures will be delivered to Honor Students of the First year and a course of practical lessons involving 100 hours' instruction will be given in connection with the above courses of lectures for such students. Each member of the class will be required to provide himself with a case of instruments and a watchmaker's lens, both of approved pattern.

3. Candidates for the Second year Honor examinations will attend special courses on the Zoology of the Invertebrata and the Anatomy and Classification of the Phanerogams during the Michaelmas Term. A series of lectures and demonstrations on selected topics in Physiology will be delivered during the Easter Term.

4. The practical course for Honor students of the Second year will be arranged so as to form a complement to the lectures on Animal and Vegetal Morphology, but the student is expected to have familiarized himself with certain aspects of the Canadian fauna and flora during the preceding long vacation. For reference: Parker & Haswell, Text Book of Zoology, Vol. I.; Spotton's Canadian Flora, or Gray's Manual; Vines' Text-book of Botany, 2 vols.; Van Tieghem's *Traité de Botanique*, 2nd ed., revised; Coulter's Seed Plants; Huxley's Lessons in Elementary Physiology (edition of 1900).

5. Honor students of the Third year will study the Zoology of the Vertebrata three days a week during the Michaelmas and part of the Easter Terms, and, during the remainder of the Easter Term, Cryptogamic Botany and Vegetable Physiology. They will also be required to do some collecting work during the preceding long vacation. Books of reference: Parker & Haswell, Text-book of Zoology; Lang, *Vergleichende Anatomie*; Vines' Text-book of Botany; A. B. Frank, *Lehrbuch der Botanik*; Van Tieghem, *Traité de Botanique*, 2nd ed., revised.

6. The practical course for Third year students will be devoted to the study of typical forms of Vertebrate animals and Cryptogamic plants.

7. Wiedersheim-Parker's Elements of Comparative Anatomy of the Vertebrata, Bunge's Physiologische Chemie (last edition), and Foster's Physiology, last English edition, are recommended for Honor students of the Fourth year, and the following works will be required in the practical course: Stöhr's Handbuch der Histologie; Parker's Zootomy; Foster and Balfour's or Milnes Marshall's Embryology; Halliburton's Essentials of Chemical Physiology.

Works of reference on Bacteriology and the other subjects specified in the University curriculum will be found in the laboratory.

8. Honor students of all years are required to pay laboratory supply fees in advance to the Bursar.

### History.

G. M. WRONG, M.A. .... *Professor of Modern History.*

In the lectures the more important movements will be discussed, and attention will be directed to the causes of social and political changes rather than to narrative history. Special emphasis will be laid upon the history of the British Empire.

#### *A. General Course:—*

The General course covers the history of Mediæval Europe in the Second year, and modern European and American history to the year 1763 in the

Third year. In the Fourth year European and American history since 1763 is studied in greater detail, and the course closes with an inquiry into the possibilities of a Philosophy of History. The following list of books has been made as brief as possible, and represents a minimum standard of reading :—

SECOND YEAR : Duruy, *Middle Ages*, or Emerton, *Introduction to Middle Ages* ; Emerton, *Mediæval Europe* ; Green or Gardiner on England.

THIRD YEAR : Lodge, *Modern Europe* ; Green or Gardiner on England ; Fiske, *Discovery of America*, chapters II, III, IV, V, XII ; Goldwin Smith, *United States* ; Roberts, *Canada* ; Bourinot, *Canada (Story of the Nations)*.

FOURTH YEAR : The books by the following authors set forth fully in the Fourth year Honor course should be read :—On *Modern History* : Morse Stephens, Macaulay, Fyffe or Seignobos, Green or Gardiner, Channing, Bourinot. On the *Philosophy of History* : Morris's Hegel. The *Philosophy of History* is so closely associated with anthropological and ethnological questions that students are recommended to take also the course of study prescribed in *Ethnology*.

*B. Honor Course :—*

Honor work in History is done in five of the Honor departments of the curriculum. In the Department of History the whole course of study on the curriculum in ancient, mediæval, and modern history is required during the four years, and this study is combined with that of political economy and constitutional law. In the Department of English and History the study of mediæval and modern history is combined with that of literature, both English and classical ; in the Department of Political Science, History is combined with economic and legal study, and in the Department of Classics with Greek and Latin literature. In the Department of Modern Languages History is allowed as an option for Italian or Spanish in the Third year, and together with Historical Grammar for Old English or Italian or Spanish in the Fourth year. Candidates desiring to qualify in the Education Department as specialists in Modern Languages and History are required to take the History option. The essays required must be based upon the study of some of the original authorities for a selected short period, and in judging them regard will be had to both their literary and historical merits.

The following list of works has been made as brief as possible, and represents a minimum standard of reading for the periods covered. The list applies in its entirety only to students in the Department of History. Students taking Honor History in connection with other departments can determine by reference to the curriculum what portions of the list apply to their work. For Constitutional History a list will be found in the Department of Political Science.

SECOND YEAR : *Mediæval History* : Hodgkin, *The Dynasty of Theodosius* ; Bryce, *Holy Roman Empire (to the Fall of the Hohenstaufen)* ; Duruy, *Middle Ages*, or Emerton, *Introduction to Middle Ages* ; Emerton, *Mediæval Europe* ; Green or Gardiner on England.

THIRD YEAR : *Modern History* : Bryce, *Holy Roman Empire (from the Fall of the Hohenstaufen)* ; Lodge, *Modern Europe* ; Symonds, *Short*

History of the Renaissance in Italy ; Green *or* Gardiner on England ; Seeley, Expansion of England ; Fiske, Discovery of America, chapters II, III, IV, V, XII ; Fisher, The Colonial Era (American History Series) ; Bourinot, Canada (Story of the Nations).

FOURTH YEAR: (a) *Modern History* : Tocqueville, France Before the Revolution ; Morse Stephens, European History, 1789-1815 ; Fyffe, Modern Europe, Period since 1814, *or* Seignobos, Political History of Europe since 1814 ; Channing, The United States of America 1765-1865 (Cambridge Historical Series) ; Green *or* Gardiner on England ; Bourinot, Canada (Story of the Nations) ; Morris, Exposition of Hegel's Philosophy of History (Griggs' Philosophical Classics).

(b) *Ethnology* : Keane, Ethnology ; Ripley, The Races of Europe. The lectures will be illustrated by maps, skulls, primitive implements, etc.

### Italian and Spanish.

W. H. FRASER, M.A. .... Associate-Professor.

E. J. SACCO ..... Special Instructor in Italian.

P. TOEWS, M.A., PH.D. .... Special Instructor in Spanish.

The courses in these subjects extend over four years, and are arranged with the object of giving the student, (1) a knowledge of the language of the present time ; (2) an appreciation of some of the more important masterpieces of the literature ; (3) a knowledge of the historical development of the literature ; and (4) an elementary acquaintance with the historical phonology.

FIRST YEAR ITALIAN.—Simple narratives are used as a basis for instruction in grammar, and for the acquisition of vocabulary and idiom. The understanding of Italian when read or spoken, and the expression of thought directly in Italian are regarded as fundamental, and hence oral practice forms a large part of the work throughout the year. Phonetic transcription is employed as a means of giving definiteness to the knowledge of pronunciation and orthography. Bacci e Gotti, *Le Glorie della Patria, per la terza classe*, and Baccini, *Cristoforo Colombo* are used for reading ; and Grandgent's Italian Grammar (Heath & Co.) is used as a book of reference.

FIRST YEAR SPANISH.—The course in Spanish is parallel in scope, object and method with that in Italian. H. Butler Clarke's *First Spanish Reader and Writer* (London, Swan, Sonnenschein & Co.) is used as a basis for practice in the language, and for instruction in grammar, vocabulary and idiom. Loiseaux' Spanish Grammar (Silver, Burdett & Co.) is used as a book of reference.

SECOND YEAR ITALIAN.—Bowen's Italian Reader is used as a basis for oral practice in the comprehension of Italian and for exercise in the reproduction of the substance of the text in Italian form. Constant practice is given in phonetic transcription and dictation, and in the understanding of unseen passages when read. Composition in Italian on familiar topics is required. Grandgent's Italian Composition (Heath & Co.) is used for additional work in composition and for more systematic instruction in the rules of construction. In the work of the Second year the use of a dictionary entirely in Italian

is recommended. Petrocchi's *Novo Dizionario Scolastico* (Milano, Fratelli Treves, price 7 francs) is the most suitable for this purpose.

**SECOND YEAR SPANISH.**—The course in Spanish is parallel in scope, object and method with that in Italian of the Second year. Garner's *Spanish Grammar* (American Book Co.) and Loiseaux' *Spanish Reader* (Silver, Burdett & Co.) are used as text-books. Exercises in phonetic transcription, dictation, composition and sight translation similar to those in Italian are required. The use of a dictionary entirely in Spanish is recommended. The *Diccionario Castellano, Campano Ilustrado* (Garnier, Paris, price 7 francs) is the most suitable for this purpose.

**THIRD YEAR ITALIAN.**—Attention is given principally to the systematic study of the history of literature from the origins up to the end of the fifteenth century and to the comprehension and interpretation of illustrative specimens of literature. Lectures on the subject are given, and ten cantos of Dante's *Divina Commedia* are read, together with copious extracts from Petrarca and Boccaccio, and shorter extracts from a number of writers of subordinate importance. Students are required to provide themselves with Dante's *Divina Commedia* (ed. Fraticelli, Firenze, Barbèra, recommended), and with Vol. I. of Torraca's *Manuale della Letteratura Italiana* (3rd ed., Firenze, Sansoni, 1894). In the work of the Third year the use of a dictionary entirely in Italian is recommended. Petrocchi's *Novo Dizionario Scolastico* (Milano, Fratelli Treves, price 7 francs) is the most suitable for this purpose.

**THIRD YEAR SPANISH.**—The course in Spanish is parallel in scope, object and method with that in Italian of the Third year. The period of literary history covered is that extending from the origins to about the death of Cervantes (exclusive of the drama). Ten chapters of Cervantes' *Don Quijote* and illustrative extracts from a number of writers of subordinate importance are read. Students are required to furnish themselves with a copy of *Don Quijote* (Kressner's edition, Vol. I, Renger, Leipzig, recommended), with the *Manual de Literatura de Giner de los Ríos, Primera Parte* (Madrid, Surez, 1899), and with Keller's *Altspanisches Lesebuch* (Leipzig, Brockhaus). For the work of the Third year the use of a dictionary entirely in Spanish is recommended. The *Diccionario Castellano, Campano Ilustrado* (Garnier, Paris, price 7 francs), is the most suitable for this purpose.

**FOURTH YEAR ITALIAN.**—The course is practically a continuation of that of the Third year, and similar methods are employed. Lectures are given on the history of literature from Ariosto, inclusive, to the present time. Considerable portions of Ariosto and Tasso are read, together with numerous illustrative extracts from writers of subordinate importance. The elements of historical phonology are briefly presented, and further instruction in this subject is given incidentally in connection with the readings in literature. Students are required to provide themselves with Vols. II and III of Torraca's *Manuale della Letteratura Italiana* (3rd edition, Firenze, Sansoni, 1895 and 1897 respectively). The use of a dictionary entirely in Italian is recommended. Petrocchi's *Novo Dizionario Scolastico* (Milano, Fratelli Treves, price 7 francs) is the most suitable for this purpose.

**FOURTH YEAR SPANISH.**—The course in Spanish is parallel in scope, object and method with that in Italian of the Fourth year. The period of literary history covered is that extending from the beginning of the 17th century to the present time, with the addition of the history of the drama from its origin. Calderon's *La Vida es Sueño* is read, together with numerous illustrative extracts from writers of subordinate importance. The elements of historical phonology are briefly presented, and further instruction in this subject is given incidentally in connection with the readings in literature. Students are required to provide themselves with a copy of *La Vida es Sueño* (Kressner's edition, Leipzig, Renger, recommended), with the *Curso de Literatura de Garcia Al-Deguer y Giner de los Rios* (Madrid, Administracion de la Biblioteca andaluza, 1889), and with Keller's *Altspanisches Lesebuch* (Leipzig, Brockhaus). The use of a dictionary entirely in Spanish is recommended. The *Diccionario Castellano, Campano Ilustrado* (Paris, Garnier, price 7 francs) is the most suitable for this purpose.

### Philosophy.

- J. G. HUME, M.A., PH.D. .... *Professor of History of Philosophy.*  
 A. KIRSCHMAN, M.A., PH.D. .... *Associate-Professor of Philosophy and Director of the Psychological Laboratory.*  
 F. TRACY, B.A., PH.D. .... *Lecturer on Philosophy.*  
 A. H. ABBOTT, M.A. .... *Assistant in Psychological Laboratory and Special Instructor in Philosophy.*

The work of this Department is pursued during the Second, Third and Fourth undergraduate years. The course embraces Logic, Psychology, Metaphysics, Ethics and History of Philosophy. In every case the work in Philosophy of the General Course is to be taken by Honor students, and will be counted along with the Honor work in determining their standing.

### LOGIC.

#### A. General Course :—

**SECOND YEAR.**—A course of lectures is given dealing with the scope and method of Logic ; the nature of Deductive and Inductive Reasoning, and their relation to each other ; the Definition of Terms ; the Laws of Thought ; the Forms of the Judgment and their mutual relation ; the Syllogism ; the Canons and Methods of Inductive inquiry ; the detection and rectification of ambiguities in reasoning and logical fallacies. Exercises in logical problems are given from time to time and corrected. Books recommended : Creighton, *Introductory Logic* ; Jevons, *Elementary Lessons in Logic* ; Fowler, *Inductive Logic* ; Hyslop, *The Elements of Logic*.

#### B. Honor Course :—

**SECOND YEAR.**—A brief course of lectures in the Easter Term in which honor students are introduced to the fundamental epistemological questions that underlie all Logic. Reading : Creighton, *Introductory Logic*, Part III.

**THIRD YEAR.**—A course is given in the study and criticism of Mill's System of Logic, the exposition of scientific methods, and the discussion of the philosophical presuppositions underlying theories of Induction. The ground covered in the lectures of the General course will not be taken up here, but will be presupposed. Books recommended: Mill, System of Logic; Bradley, Principles of Logic; Venn, Empirical Logic; Jevons, Principles of Science; Sigwart, Logik.

# PSYCHOLOGY.

## *A. General Course:—*

**SECOND YEAR.**—The lectures deal, in a general way, with the phenomena of consciousness, their description, correlation and classification; covering, in outline, the whole field of psychic phenomena. The course is designed to introduce the subject, to familiarize the student with fundamental principles, and lead him to observe his own mental states. Term work is required. Books recommended: Wundt, Grundriss der Psychologie (English translation); Höfding, Outlines of Psychology; Titchener, Primer of Psychology.

## *B. Honor Course:—*

**SECOND YEAR.**—An introductory course on Experimental Psychology is given, dealing with the senses of taste and smell, and the dermal and kinæsthetic senses. Special attention is given to the Psychophysical methods and their application. In this connection students are required to familiarize themselves with the elements of the Infinitesimal Calculus and Analytical Geometry. Books recommended: Wundt, Outlines of Psychology, Human and Animal Psychology; Ladd, Elements of Physiological Psychology; Scripture, The New Psychology.

**THIRD YEAR.**—(a) General: The lectures deal with such special problems as: Association, Memory, Attention, Emotion, Volition. Books recommended: Wundt, Outlines of Psychology, Human and Animal Psychology; Külpe, Outlines of Psychology; Bain, Senses and Intellect, Emotions and Will; James, Psychology; Baldwin, Handbook, The Mental Development in the Child and the Race; Ladd, Psychology Descriptive and Explanatory; Sully, the Human Mind; Stout, Analytic Psychology; Tracy, Psychology of Childhood (2nd ed.).

(b) Experimental: The lectures on experimental Psychology (three hours per week) deal with the chief problems of contemporary Psychology, in so far as they are accessible to exact experiment, special attention being devoted to the Psychology of the higher senses (Psychological Optics and Acoustics) and to the time-relations of Mental Phenomena. The practical work (one to two hours per week) in the laboratory is designed to afford the student an opportunity to become familiar with experimental methods. There is no text-book for this course; but as recommended books may be mentioned: Wundt, Physiologische Psychologie (4th ed.); Ladd, Elements of Psychology; Wundt, Human and Animal Psychology (English Translation by Titchener and Creighton); Külpe, Outlines of Psychology; Ribot, German Psychology of To-day; Sanford, Laboratory Course.

FOURTH YEAR.—The Fourth Year consists partly of a supplementary series of lectures on metaphysical problems in their relations to Psychology, and partly of experimental work in the laboratory. The students work in groups under the guidance of the Director of the Laboratory, or his Assistants, upon special experimental investigations. The subjects of these investigations, which are at the same time intended to lead to useful results and to make the students familiar with the nature and difficulties of exact research, are arranged at the beginning of the term. The students are required to acquaint themselves with the literature relating to their special subject, to keep a record of their investigations, and to hand in at the end of the Easter term a detailed statement of results obtained, and of their significance.

Graduates have full opportunity for independent investigations in the Laboratory.

#### METAPHYSICS.

##### *Honor Course :—*

SECOND YEAR: Theory of Knowledge—Honor students are required to read Locke's *Essay on the Human Understanding*; Berkeley's *Principles of Knowledge*; and Hume's *Treatise on Human Nature*, Book I. They are expected to write expository summaries of these works, and to discuss and criticize them in the class. It is the aim of the lectures to assist the student in making the transition from observation and analysis of mental phenomena to the reflective consideration of the underlying philosophical principles. Books recommended: Fraser, *Selections from Berkeley*, Locke and Berkeley (Blackwood's Series); Green, *Introduction to Hume*, *Prolegomena to Ethics* Bk. I Aikins, *The Philosophy of Hume*; Ward, *Psychology in Encyclopædia Britannica*, 9th ed.; Dewey, *Psychology*.

FOURTH YEAR.—Theories of Knowledge and Being: Several courses are given as follows: 1. A course of lectures setting forth the lecturer's views of the principles and methods of philosophical speculation, and showing the interrelation of Logic, Psychology, Metaphysics and Ethics. No text-books are prescribed in this course, but certain reading may be recommended from time to time in the lecture-room. 2. A careful study of Aristotle's *Metaphysics*, and Kant's *Prolegomena*. Kant's *Critiques* will be studied in connection with the class in *History of Philosophy* (See *History of Philosophy*, IV year). 3. Lectures on the chief problems of Philosophy, as they have been dealt with by representative thinkers: (a) For 1902 they will be based upon the Metaphysical works of Descartes, Spinoza, Leibnitz, Lotze, Wundt. (b) For 1903 these lectures will be based upon the works of Hamilton, Mansel, Comte, Mill and Spencer. 4. A seminary is held for the study of advanced Metaphysical problems.

In the seminaries papers are read and discussed by the members. Everything is done to encourage independent thinking on the part of the students. Graduates may become members of any of the seminaries in the Department of Philosophy by arrangement with the professor in charge.

HISTORY OF PHILOSOPHY.

*A. General Course :—*

FOURTH YEAR.—A course is given, intended as an introduction to the critical study of Philosophy. The student is led to trace the development of philosophical speculation from the beginning of Modern Philosophy up to the time of Kant; to discover the relation of the various thinkers to one another; to estimate the contribution made by each; and to note how inadequacies and errors were subsequently met and corrected. Books recommended: Weber, Windelband, Falckenberg, Schwegler.

*B. Honor Course :—*

THIRD YEAR.—Lectures are given on the History of Ancient and Mediæval Philosophy. The chief centre of interest is the Platonic Philosophy; but the Pre-Socratic and Post-Aristotelian periods are dealt with as fully as time permits; the former, as the essential prelude to the study of the Platonic Philosophy; the latter, as showing the various directions in which its influence was felt in later times. The influence of Christianity on philosophic thought; the main features of Scholasticism; and the preparation of the thinking world for Modern Philosophy, are considered. Special attention is given to connecting links, and the relation of the thinkers to one another. An extra hour a week will be devoted to a more special study of some of the more important Platonic Dialogues. Books recommended: Weber; Zeller; Ueberweg; Butler; Erdmann; Windelband; Ferrier; Schwegler; Benn; Tennemann; Burt; Mayor; Jowett's Plato; Grote's History of Greece (chapter on the Sophists); Aristotle's works.

FOURTH YEAR.—(a) Pre-Kantian Period: Honor students will attend the lectures on this period given to the students of the General course (see above), and the class reading selections in Metaphysics (see Metaphysics Fourth year). Books recommended: Erdmann; Ueberweg. (b) Kant: The development of the Kantian Philosophy, through the Critiques and Prolegomena, is followed. The *Kritik der reinen Vernunft* and the *Kritik der Urtheilskraft* are carefully studied in the class, essays by the students, are read and discussed, and lectures are given on Kant's relation to previous philosophers, the significance of his new method, the various links in his system and the positive and negative elements in his philosophy. Books recommended: Caird; Watson; Morris; Stirling; Mahaffy and Bernard; Adamson; Vaihinger; Erdmann; Riehl. (c) Post-Kantian Period: Lectures will trace the development of Idealism after Kant, sympathetic and antagonistic. Special attention is given to Fichte, Schelling, Hegel, Schopenhauer, Von Hartmann, Herbert Spencer and Wundt.

A seminary in the History of Philosophy is conducted for the reading and discussion of papers written by the students. Books recommended: (a) General Histories: Kuno Fischer; Windelband; Falckenberg; Ravaisson; Lewes; Morell; Külpe; Paulsen. (b) Special: On Hobbes, Croom Robertson; on Descartes, Kuno Fischer; on Spinoza, Pollock, Caird; on Locke, Berkeley and Hume, Green, Frazer, Selby-Rigge; on Leibnitz, Dewey, Latta; on

Scottish Philosophy, Seth, Murray, Bowen, McCosh ; on Kant (see above) ; on Fichte, Everett, Adamson ; on Schelling, Watson ; on Hegel, Wallace, Caird, Harris, Royce, Sterrett ; on Spencer, Watson, Collins ; on Schopenhauer and Von Hartmann, Bowen, Caldwell.

NOTE.—Candidates from St. Michael's College may substitute Lorimer's Institutes of Law for Kant's Ethics in the Fourth year; and also Aristotle's Ethics, Bks. I-IV in the original, and one of Plato's Dialogues in the original, for the Experimental Psychology in the Fourth year.

### Political Science.

JAMES MAVOR ..... *Professor of Political Economy and Constitutional History.*

A. H. F. LEFROY, M.A. .... *Professor of Roman Law.*

J. MCGREGOR YOUNG, B.A. .... *Professor of Constitutional and International Law.*

S. M. WICKETT, B.A., PH.D. ... *Lecturer in Political Economy.*

#### A. General Course:—

Lectures will be given as follows to those students who require to take Political Science in the General course.

THIRD YEAR.—*Constitutional History.* The elements of English Constitutional History. Books for reference: Fielden's Constitutional History; Henderson's Historical Documents of the Middle Ages; Taswell-Langmead, Constitutional History of England; Bagehot, The English Constitution; Dicey, the Law of the Constitution.

FOURTH YEAR.—*The Elements of Political Economy.* The lectures, text-books and examinations are the same as those prescribed for students taking the Second year Honor course. See below.

*Canadian Constitutional History.* See synopsis of this subject in Honor course below.

#### B. Honor Course:—

The special subjects of study in the Honor course in Political Science are economic history and theory, constitutional history, international and constitutional law, jurisprudence, history and philosophy with special reference to the growth of political ideas. The Honor course begins in the Second year in Arts and continues for three years.

Prior to entrance into the Honor course in Political Science, candidates must have passed the Honor examination of the First year in one or other of the following subjects: Latin; Greek; any two of the three languages, English, French, German.

SECOND YEAR.—*Economics.* The lectures give a general introduction to the study of modern political economy. The chief text-book is Marshall's Principles of the Economics of Industry, Vol. I. The following works will also be found useful: Bücher's Industrial Evolution, trans. S. M. Wickett;

side's Political Economy; Smart's Introduction to the Theory of Value; Devas' Political Economy; Ely's Introduction to Political Economy; Mavors' Economic History, Tables and Diagrams.

*English Constitutional History to Magna Charta.* The chief topics are the Hundred and County Courts, the Witenagemot, the Feudal System. The principal constitutional documents are required to be studied. A list of these documents is furnished to students. For reference, selected portions of Stubbs' Constitutional History, to be designated by the lecturer; Fielden's Constitutional History; Henderson's Historical Documents of the Middle Ages; Introduction to Stubbs' Select Charters; Freeman's Growth of the English Constitution; Bagehot's English Constitution; Wakeman & Hassall's Constitutional Essays (excepting Essay I); Taswell-Langmead's English Constitutional History.

*Roman History to 266 B. C.* Mommsen, Bks. I and II, and Fustel de Coulanges' La Cité Antique. See Department of Classics.

*Medieval History to 1300.* See Department of History.

*Mathematics.* Special class in the elements of the Infinitesimal Calculus with Elements of Analytical Geometry.

**THIRD YEAR.**—*History and Criticism of Economic Theory.* The course of lectures will present a systematic account of the development of the history of economic theory and a criticism of current economic theories of value, interest, rent, wages and international trade. The chief text-book for the work of the Michaelmas Term is Ingram's History of Political Economy, and for the work of the Easter Term, Marshall's Principles of Economics, Vol. I. Students are also expected to study Böhm-Bawerk's Capital and Interest, and The Positive Theory of Capital (transl. Smart); Wieser's Natural Value; Smart's Introduction to the Theory of Value. The following books will also be useful: Cossa's Introduction to the Study of Political Economy; Bonar's Philosophy and Political Economy; Nicholson's Principles of Economics; Keynes' Scope and Method of Political Economy, chaps. 1-3, 7, 9. Bastable's Theory of International Trade, and The Commerce of Nations; Adam Smith's Glasgow Lectures, ed. Cannan; Adam Smith's Wealth of Nations, ed. Nicholson; Ricardo's Works, ed. Gonner.

*Statistics.* A brief course of lectures will be given on methods of social investigation, with especial reference to statistical method, statistical organization and administration.

The chief text-book is Bowley's Elements of Statistics. Students are also referred to the article Statistique in Dictionnaire d'économie politique, or introductory chapter on Statistics in Levasseur's La population française. Compare in general Mayo Smith, Statistics and Sociology; Statistics and Economics; Mayr, Statistik und Gesellschaftslehre; Block, Traité théorique et pratique de Statistique.

*Modern History, from 1300 to 1763.* See Department of History.

*English Constitutional History from Magna Charta.* The lectures are in continuation of those of the Second year. They deal with the Growth of Parliament, and of Responsible Government. The books recommended are the same as those in the Second year.

*English Constitutional Law.* The lectures on this subject comprise a discussion of the Royal Prerogatives; the constitution and functions of the two Houses of Parliament, the constitution of the Executive Government; the rise of the Cabinet and its relation to the Crown and the two Houses of Parliament; the military forces of the Crown, the constitution of the judicial department of government and its relation to the Crown and to Parliament, and the rights and obligations of the subject, the leading cases, the constitutional statutes, and the conventions of the constitution are discussed. For reference: Dicey's Law of the Constitution; Hearn's Government of England; Traill's Central Government; Boutmy's Studies in Constitutional Law, Part I; Broom's Constitutional Law; Anson's Law and Custom of the Constitution.

*Colonial Constitutional Law.* The lectures on this subject trace the sources of Colonial Constitutional Law; the prerogatives of the Crown in the constitution of colonial governments; different forms of government; colonies by occupancy; colonies by cession and conquest; powers of Parliament in respect to the colonies; conventional limitations arising from local self-government. For reference: Creasy's Constitutions of the British Empire; Forsyth's Cases and Opinions on Constitutional Law; Todd's Parliamentary Government in the Colonies, as far as page 318; Tarring's Law in Relation to the Colonies.

*History of English Law.* The history of the English law from the Roman Conquest until the Norman Conquest; the Roman occupation; the Saxon invasions; the laws of the Confessor; the change effected in the law, especially of real property, by the Conqueror and his successors,—the introduction or extension of the feudal system; the difference between that system on the continent and in England; the creation of new tenures; the Great Charter and its frequent renewals, as showing the condition of the people, and the evils to be remedied; the great changes effected by the legislation of Edward I and Edward III; the creation of entailed estates; the struggle to obtain power to alienate them; legislation to restrict alienations in mortmain; the evasion of the law; the law giving power to devise lands, and the legislation of Elizabeth to prevent frauds upon creditors and purchasers; the abolition of feudal tenures by Charles II. The efforts in the reign of George III to ameliorate the criminal law, and the English Statutes after 1792 that have their counterpart in our Colonial legislation are discussed and explained. For reference: Reeve's History of English Law; Pollock and Maitland's History of English Law; Hale's History of English Law; Blackstone's Commentaries; R. Storry Deane's Students' Legal History; a collection of English Statutes, and the Revised Statutes of Canada, and of Ontario.

*History of Roman Law.* The lectures on Roman Private Law comprise a sketch of the history of the law from the time of the decemviri to the death of Justinian, giving an account of the growth of the unwritten law, of

judicial legislation to the suppression of the formulary system by Diocletian, and from that time to the death of Justinian, and treating of the statutory legislation during the Republic and under the Empire, and of the several attempts to form a code, finally terminated by the work of Justinian. The larger number of lectures is devoted to the substance of Roman Law during the reign of Justinian. The law of testamentary succession, the various kinds of wills, the duties of the heir, the gift of legacies, and the history of trust gifts and codicils are explained. The remedial processes for the protection and enforcement of rights are traced from the *legis actiones*, the changes effected by the formulary system, the summary jurisdiction of the prætor, the abolition of the formulary system, terminating in the *extraordinaria cognitio*. The series is closed by a discussion of the law as to specific performance of contracts; of the law as to frauds upon creditors; and an examination of the influence of Christianity upon Roman legislation. For reference: Muirhead's Historical Introduction to the Private Law of Rome; Sanders' Justinian; Institutes of Gaius, translated by Muirhead. The Digest, the Code, and the Novels should be consulted. Merival's History of the Romans.

**FOURTH YEAR.—Economic History.** The lectures will trace economic history from the early middle ages down to modern times, with special reference to England. Books recommended: Ashley's Economic History, Parts I, II; Toynbee's The Industrial Revolution; Seeborn's English Village Community; Vinogradoff's Villenage in England; Gomme, The Village Community; Gross' Gild Merchant, chaps. 1-4; Rogers' Six Centuries of Work and Wages, chaps. 1-6, 8-10; Cunningham's Growth of English Industry and Commerce (ed. 1890); Marshall's Principles, Bk. I, chaps. 2, 3; Jevons' State in Relation to Labour, chaps. 3, 4, 6, 7; Fowle's Poor Law, chaps. 1, 3, 4; D. A. Wells' Recent Economic Changes; Ely's Labour Movement in America, chaps. 3, 4; Webb's History of Trade Unionism; Menger's Right to Labour.

**Public Finance.** The lectures will deal with National and Local Finance, and with important questions of modern economic policy. They will discuss, among other topics: the History of Public Finance and of Financial Science; the Currency and Banking Systems of Great Britain, Canada and the United States; Public Debts and the Policy of National and Local Governments in relation to them; Methods of Extinction and Conversion of Debt; Sinking Funds; Public Domain—Lands, Forests, Minerals; Railroad Policy, its history in Europe and America; Principles of Taxation; Incidence of Taxation; Tariff Policy—outline of its history in Great Britain, Canada and the United States; Local Taxation in Canada and the United States. Books recommended: Bastable's Public Finance; Bastable's The Theory of International Trade; Seligman's The Incidence of Taxation; Seligman's Essays in Finance; Elliott's The Tariff Controversy in the United States; Cossa's Taxation; Dunbar's Theory and History of Banking; Walker's Money, Trade and Industry; Adams' Public Debts; Ely's Taxation; Hadley's Railroad Transportation; Mavor's English Railway Rates; Bagehot's Lombard Street; Jevons' Money; Leroy-Beaulieu's Science des Finances, Livre II, chaps. 4, 5, 9, 10; Giffen's Essays in Finance, 1st series, IX; Taussig's Tariff History of United States.

*Modern History from 1763 to the present time.* See Department of History.

*Political Philosophy.* History and Criticism of Political Theories. The following are recommended for study: Sidgwick's Elements of Politics; Pollock's History of the Science of Politics; Bonar's Philosophy and Political Economy; Ritchie's Principles of State Interference; Seeley's Introduction to Political Science; Mackenzie's Introduction to Social Philosophy.

*General Jurisprudence.* In lecturing on this subject, the attention of the student is directed to the definition and analysis of *law* and of *rights*, to the sources of law, to the classification of rights, to the consideration of antecedent rights *in rem* and *in personam*, to remedial rights, to adjective private law, to the nature of public law and its various divisions, to international law, and to the application of law. Students are recommended to read the following books: T. E. Holland, Elements of Jurisprudence; Austin's Elements of Jurisprudence (Campbell's Students' edition); Sir H. Maine, Ancient Law, and in his Lectures XII, XIII, Early History of Institutions. They may also refer to Sir W. Markby, Elements of Law; O. W. Holmes, Common Law; Sir F. Pollock, First Book of Jurisprudence; Sir H. Maine's works so far as not above specified.

*Public International Law.* Besides the elementary principles of International Law, the lectures comprise a discussion of the growth of International Law, its sources, and the characteristics which distinguish it from international morality. Also a discussion of the doctrine of non-intervention, of the Monroe Doctrine, and of the various treaties and conventions relating to Canada. Controversies raised by the Civil War in the United States. The Geneva Arbitration and the rights of neutrals. For reference: Wheaton's International Law (ed. Boyd); Hall's International Law, or Kent's International Law (ed. Aaby).

General Jurisprudence and Public International Law together are alternative to the Honor History of Philosophy of the Fourth year, for which see Department of Philosophy.

*Federal Constitutional Law.* The lectures deal with the origin of the United States Constitution and the relation of the federal government to the States; the federal institutions, legislative and executive and judicial, and the leading decisions of the Courts in reference to the same; rules of interpretation applied by the Supreme Court of the United States. The Constitution in Canada; rules of interpretation applied by the Judicial Committee in construing the Constitution in Canada. For reference: Houston's Constitutional Documents of Canada; Lefroy's Law of Legislative Power in Canada; Todd's Parliamentary Government in the Colonies, page 318 to the end of the volume; Clement's Constitution of Canada or Munro's Constitution of Canada; Cartwright's Decisions on the B.N.A. Act; Cooley's Principles of Constitutional Law in the United States; Pomeroy's Constitutional Law; Boutmy's Constitutional Law, Part II and III. On the Constitution of the United States; Story, Hare, Miller, and Bryce; Todd's Parliamentary Government in England (ed. Walpole).

*Canadian Constitutional History.* Character of French Settlement ; Nature of European Claims to Territory ; Government by Trading Companies ; Growth of Rule by Colonial Policy as distinguished from Trading Company Policy ; Establishment of Provincial Organization in 1663 ; the Sovereign Council ; Growth of the Superior Council ; Local Government ; Land Tenures ; Church and State ; the Conquest ; Treaty of Paris ; English Colonial Policy ; Struggle for Responsible Government ; Growth of Parties in Upper and Lower Canada ; Lord Durham's Report ; Union Act ; Quebec Conference ; Confederation ; Relation of Dominion to Great Britain ; Relation of Provinces to Dominion ; Comparison of B. N. A. Act with Constitutions of United States and of England ; Growth of Local Government in Ontario ; A list of the principal constitutional documents which are required to be studied will be furnished to students. For reference : Bourinot's *Constitutional History of Canada* ; Ashley's *Earlier Constitutional History of Canada* ; Parkman's works with special reference to the Old Régime ; Biggar's *Early Trading Companies of New France* ; Munro's *Constitution of Canada* ; Story's *Introduction to Constitution of the United States* ; Houston's *Canadian Constitutional Documents* ; Christie's *History of Lower Canada* ; Kingsford's *History of Canada* ; McEvoy's *The Ontario Township* (University of Toronto Studies in Political Science, 1st series, No. 1) ; Wickett, *City Government in Canada* (Pol. Sc. Quart. 1900).

*Term Work in Honors.* The following term work is required in subjects to be prescribed by the Professor of Political Economy and Constitutional History :—

SECOND YEAR : Two essays in each term, in all four essays ; and also a Term examination to be held before or shortly after Christmas vacation.

The first term essay of the Second year may be written during the preceding summer vacation. The essay is to be not more than 3,000 words and must treat of the industrial conditions, or some phase of those conditions, of the locality in which the student resides. The object of the essay is to lead the student to careful research. Authorities must be noted in every instance.

THIRD YEAR : Two essays in each term, in all four essays ; and also a Term examination to be held before or shortly after Christmas vacation.

FOURTH YEAR : Two essays in each term, in all four essays ; and also a Term examination to be held before or shortly after Christmas vacation.

In each year such term work and examination count for Honors as one paper in the annual examination.

*Summer Economic Work.* Students in Political Science are advised to study economic conditions in the localities where they reside during vacation. For the encouragement of summer economic work of this nature the Political Science Club offers for 1901 two prizes in books of the value of \$10 and \$5. Essays must be handed in to the Honorary President of the Club by the 15th of November.

The Departmental Library in Economics is open under certain conditions to all Honor students in the Department of Political Science. Tutorial classes

in Economics and in Constitutional History are held several times each week during the Michaelmas and Easter terms. Facilities for research are afforded to senior students and also to graduates who desire to prosecute the study of any of the subjects in the Department.

## A. General Course :—

FIRST AND SECOND YEARS. —An attempt is made to develop the understanding and appreciation of literature through the study of two plays of Shakespeare in the First year, and of selected poems of Nineteenth Century Writers in the Second year. Students are expected, in the case of Shakespeare, to master for themselves the explanatory notes of some good edition such as the Clarendon Press or Rolfe's.

Composition is taught in connection with the study of prose literature. The methods of the various forms of composition are investigated in selections from

good writers. An original essay on a subject set by the instructor is required of each student on or before each of the following dates: October 31st, December 15th, February 1st, and March 15th. If any articles or books are read in preparation for such essays, the titles of these and the parts specially made use of must be definitely specified in each essay. The marks assigned for these four essays count as term work at the final examination (80 marks out of 200).

**THIRD AND FOURTH YEARS.**—In these years the literature of a period is studied, and an attempt is made to enable the student not only to appreciate and understand the individual works selected, but also to grasp their relation to one another, and the way in which they give expression to the personality of the writer and the tendencies of the time.

*B. Honor Course :—*

The work prescribed in the General course is also incumbent upon Honor students, but a fuller and more advanced knowledge is expected than in the case of General students. The marks assigned for compositions during the term will count as one paper at the annual examinations.

The special Honor work is intended to broaden the knowledge and deepen the insight which the student may acquire in the General work. In the Third year, besides additional work in the period prescribed in the General course, the study of Old English is begun. In the Fourth year this last-mentioned work is continued, and a course on Historical Grammar is given. In literature, the student is expected to make a minute study of certain typical works, and to extend his acquaintance with the period by a careful reading of other prescribed books. The class work is devoted partly to a special examination of the prescribed selections, partly to an exemplification by lectures of the general characteristics of the various writers and periods.

*A. General Course :—*

In all the years special stress will be laid on grammar, pronunciation and translation into French, commencing in the First year with simple exercises in each of these subjects, and continuing with those of a more difficult character to the end of the Fourth year. In the First and Second years, particular attention will also be paid to careful translation from French into English; a short text in modern French will be read in class in each of these years. In the Third year the prose texts, and in the Fourth year the poetical and dramatic texts, belonging to various periods, which have been prescribed by the University, will be read and will be illustrated by such critical and historical lectures as may be necessary for their proper understanding and appreciation.

*B. Honor Course :—*

As in the General course, special stress will be laid, in all the years, on grammar, pronunciation and translation into French. In addition to these subjects there will, in the Honor course, be regular and continuous exercises in conversation and composition in French during the Second, Third and Fourth years. The study of literature will begin in the Second year, the period for this year being the Seventeenth century; the Eighteenth century will be studied in the Third year, and the Nineteenth century in the Fourth year. In each year appropriate critical and historical lectures will be given for the purpose of aiding students to thoroughly understand and appreciate the works, belonging to each period, which are prescribed by the University. During the Third and Fourth years, students will be expected to read systematically some good grammar of the French language. In these two years, also, lectures will be given on the History of the French language, the lectures to be illustrated in the Third year by a selection from the *Chanson de Roland*. Students of the Fourth year will be encouraged to undertake the independent study of topics in connection with the history of the language and literature.

A. E. LANG, B.A. .... *Associate-Professor.*

The courses in this subject comprise (1) the study of the literary language of classical authors of the 18th and 19th centuries; (2) practice in writing and speaking German as illustrative of and a means to the above-mentioned end; (3) the history of German literature; and (4) for the Honor courses the elements of the history of the language.

*A. General Course :—*

Practice in dictation, translation into German, and exercises in translation at sight, will be regularly given.

Students of the Third and Fourth years will read carefully the texts prescribed, and will have more advanced work in grammar, composition and sight translation. An outline of the literature prescribed will be given in lectures.

*B. Honor Course :—*

(a) Exercises in grammar and sight translation will be regularly given, as well as exercises in translation into German.

(b) Similar exercises of rather more advanced character will be given in the Second year. Students will also read carefully the texts prescribed.

In both the First and Second years an outline of literature as prescribed will be given in lectures.

(c) Honor students of the Third and Fourth years are expected to be familiar with the works of the modern authors prescribed, and lectures on the literature of the respective periods will be given, with illustrative references to the authors read.

In both Third and Fourth years exercises in sight translation, dictation, grammar and translation into German will receive much attention. Original essays in German will be required from time to time. Practice will also be given in conversation.

(d) In the Fourth year an outline of the history of the language will be given, according to a syllabus to be agreed upon by the instructors. The elements of Middle High German grammar and literature will be studied with special reference to the works prescribed.

### Oriental Literature.

#### UNIVERSITY COLLEGE :

J. F. McCURDY, PH. D., LL.D. . . . . *Professor.*  
R. G. MURISON, M.A., B.D. . . . . *Lecturer.*

#### VICTORIA UNIVERSITY :

J. F. McLAUGHLIN, M.A., B.D. . . . . *Professor.*  
A. P. MISENER, M.A. . . . . *Instructor in Hebrew.*

The Oriental course has the main object of affording an introduction to the study of the Semitic languages and literature and of Semitic history. On account of the importance of the literature of ancient Israel, the Hebrew language and the Old Testament in the original are made very prominent throughout the course, being taught in all the years and occupying almost as much time as all the other languages taken together. The aim of the course, more definitely, is to give the student a competent knowledge of the Hebrew text of the Bible and of the literature and history of the Semitic peoples. These ends are kept in view in the General course as well as in the Honor lectures.

For purely linguistic study the General course is confined to Hebrew and Biblical Aramaic, and is so arranged that, with two or three lectures a week throughout the four years, the student may gain some familiarity with the different kinds of literature in the Old Testament: narrative, historical, prophetic and poetical. The Honor course secures in its Hebrew department an intimate familiarity with the language and literary features of the Old Testament in all its divisions, and at the same time introduces the learner to the other important languages of the Semitic family. In the Second year of the curriculum, which begins the Honor course, the Aramaic is taken up in its two dialects, East and West Aramaic; in the Third year Arabic is the subject of study; and in the Fourth year the student is made acquainted with the Assyrian in the original cuneiform texts. In all the years care is taken not only to impart an exact knowledge of linguistic forms, but also to convey an accurate idea of the genius of the Semitic race and of the several peoples among them who in succession helped materially in the education of the world.

Thus, while Philology is duly studied for its own sake and as an indispensable instrument of research, the whole tendency of the discipline is to make it

subservient to the higher ends of literary and historical culture. The Oriental Seminary Room is well provided with maps and other illustrative material; and the library, although so lately founded, has already one of the best selections of Semitic literature, including inscriptional works, to be found in America.

A Seminary in Oriental languages will be held weekly for the benefit of advanced students, the work done in which will count as part of the sessional duties. Graduates of the University who may apply for admission may take part in the work of the Seminary. Class examinations in writing will be held at intervals during the year.

*Books Required for Term Work:* Davidson's Hebrew Grammar; Davidson's Hebrew Syntax; Driver's Hebrew Tenses; Davies' Hebrew Lexicon; Text of Old Testament with Massoretic Clavis; Weir's Short History of the Old Testament Text; Brockelmann's Syriac Grammar and Chrestomathy; Socin's Arabic Grammar and Chrestomathy; Baer and Delitzsch's Texts of Daniel and Ezra with Paradigms; King's First Steps in Assyrian; Delitzsch's Assyrian Grammar; Winckler's Assyrische Keilschrift-Texte; Zimmern's Vergleichende Grammatik der semitischen Sprachen; Robertson's Old Testament and its contents; Driver's Literature of the Old Testament; McCurdy's History, Prophecy and the Monuments; Encyclopædia Biblica; Articles in the Encyclopædia Britannica on Hebrew Language, Semitic Languages, Arabic Literature, Septuagint, Targum.

VICTORIA UNIVERSITY:

E. I. BADGLEY, M.A., B.D., LL.D. .... *Professor.*

A. *General Course:*—

THIRD YEAR.—(a) Theory of Obligation: Lectures on the scope and methods of Ethics, the relation of Moral Philosophy to Natural Science, The Moral

Ideal, Personality, Instinct, Desire, Motive, Volition, Freedom of the Will, Conscience, Duty, Responsibility, Sensational Theories, Intuitionist Theories, Transcendental Theories, Relation of Ethics to Theoretical Philosophy, Political Economy, and Religion. Essays will be written by members of the class, and examinations held during the term. Books recommended: Hyslop, Bowne, Seth, Muirhead, Calderwood, Pt. I., Chaps. I-IV; Green, *Prolegomena to Ethics*, Book II. (b) *History of Ethics*: The lectures cover the ground from Hobbes to the present time. Attention is given to fundamental standpoints rather than to details of doctrine. The interrelation of the various historical phases of Ethical thought are considered, the development of cardinal doctrines followed, and the chief representatives of the leading schools expounded. Books recommended: Sidgwick, *History of Ethics*; Bain, *Moral Science*; Watson, *Hedonistic Theories*.

*B. Honor Course:—*

THIRD YEAR.—(a) *Theory of Ethics*: The students in this course will make, under the guidance of the professor in charge, a special and careful study of Green's *Prolegomena to Ethics*. Lectures will be given to assist in the exposition, explanation, and estimation, of Green's position. (b) *History of Ethics*: This course is supplemental to, and given in connection with, the General course on the *History of Ethics*. The aim of the lectures is to set in a clear light the real significance of the problems occupying the attention of moralists, and to estimate the solutions that have been offered for these problems. Books recommended: Martineau, *Types of Ethical Theory*; Butler's *Sermons*; Mill, *Utilitarianism*; Spencer, *Principles of Morality*; Janet, *Theory of Morals*; Sidgwick, *Methods of Ethics*; Jodl, *Geschichte der Ethik*; Courtney, *Constructive Ethics*; Sorley, *the Ethics of Naturalism*; D'Arcy, *Short Study of Ethics*; Fairbrother, *Philosophy of T. H. Green*; Mackenzie, *Manual of Ethics*; Paulsen (Trans. Thilly.). (c) *Applied Ethics*: The class will meet once a week for the reading and discussion of papers written by members of the class. In these essays an attempt will be made to apply ethical principles to the investigation of social problems, such as Temperance, Charity, Socialism, etc. Books recommended: Spencer, *Man vs. State*; Ritchie, *Principles of State Interference*; T. H. Green, *Lectures on Political Obligation*, A. M. N., in Vol. II; J. G. Hume, *Value of a Study of Ethics*, *Political Economy and Ethics*, Socialism.

FOURTH YEAR.—In this year the Honor students will be expected to make a thorough study of representative Ethical writers of ancient and modern times, and also to undertake independent investigations into social problems of the present time, requiring for their solution the application of Ethical principles: Aristotle, *Nicomachean Ethics*; Kant, *Grundlegung zur Metaphysik der Sitten*; *Kritik der praktischen Vernunft*. In 1901-1902, Sidgwick, *The Methods of Ethics*. Essays: Application of Ethical principles in the examination of Problems in Political Economy, Sociology and Criminology.

UNIVERSITY COLLEGE.

### University College.

University College is, since the Federation Act of 1887, the complement, in the system of higher education provided by the State, of the University of Toronto. The State furnishes through University College instruction in those departments of the Arts Course in which it does not furnish instruction through the University. These departments are Greek, Latin, Ancient History, English, French, German, Oriental Languages and Ethics.

For the Faculty of University College, *vide* p. 14 above.

### University College Council.

THE PRINCIPAL.	PROFESSOR HUME.
PROFESSOR HUTTON.	PROFESSOR SQUAIR.
PROFESSOR MCCURDY.	PROFESSOR VANDERSMISSEN.
PROFESSOR ALEXANDER.	PROFESSOR FLETCHER.

*Registrar* ..... JAMES BREBNER, B.A.

*Superintendent of Women Students* ... MISS SALTER.

### Enrolment of Students.

All students of the University proceeding to a degree in Arts are required to enroll themselves in University College or in Victoria College.

The conditions precedent to enrolment in University College are determined by the Council of the College. Every student of the College must either be an undergraduate of the University (*vide* p. 70, Sec. 45), or, if he be an occasional student, must satisfy the College Council that he has sufficient knowledge of the subject in which he proposes to attend College lectures to do so with advantage.

### Discipline.

The College has full control of its students so far as concerns their attendance upon lectures in the courses provided

University College Y. M. C. A. Building.

by the College, and (2) their admission to the University Examinations. No student of the College will be received by the University for examination without a certificate from the College that he has complied with its regulations.

### **Student Societies.**

Various societies and associations, both of young men and of young women, have been organized for the promotion of Christian effort, social intercourse, literary and scientific activity. The Young Men's Christian Association has a building especially devoted to its purposes, in which a devotional meeting is held every Thursday, and a public meeting every Sunday, at which latter addresses are delivered by prominent Christian workers. There is also a Young Women's Christian Association, which meets weekly. The Literary and Scientific Society, whose membership is made up of male students, holds weekly meetings for discussion, the reading of essays, etc. This society furnishes a well-equipped reading-room for the use of students. The Women's Literary Society has similar aims and methods. Besides the above, there are several associations for the encouragement of special branches of study. These are the Classical Association, the Modern Language Club, the Oriental Association, etc. A paper devoted to literature and college news is published weekly, its staff consisting of representatives from various sections of the undergraduate body. For lists of officers of the various societies, see Appendix, p. 36.

### **Lodging and Board.**

Lodging and board are readily obtainable in numerous private boarding-houses within convenient distance of the University at a cost of from three dollars upwards for comfortable lodging with board; or rooms may be rented at a cost of from one dollar per week upwards, and board obtained separately at moderate rates. A list of accredited boarding-houses is kept by the Secretary of the University College

Young Men's Christian Association, and students are recommended to consult him with reference to the selection of suitable accommodation.

### **Dining Hall.**

There is attached to the University College a dining hall for the faculty and students. Rates for regular boarders, \$2.50 per week ; for single meals, 25 and 20 cents. All further information will be furnished by the Secretary of the House Committee, Dr. J. C. MacLennan, Dean's House, University College.

---

### **Regulations Relating to Students, Terms and Examinations.**

1. Students entering University College are required to produce satisfactory certificates of moral character and previous good conduct.

2. No student will be enrolled in any year, or be allowed to continue in attendance, whose presence for any cause is deemed by the Council to be prejudicial to the interests of the College.

3. Matriculated students are required to attend the courses of instruction and examinations in all subjects prescribed for students of their respective standing, and no student will be permitted to remain in the College who persistently neglects academic work.

4. The certificate required for admission to the University examinations will not be granted to students who have been reported to the Council for not conforming to the College regulations, or for improper conduct of any kind.

5. Matriculated students are required to reside, during the period of their attendance on lectures, in houses selected by their parents or guardians, or approved by the College Council.

6. Men and women students, unless members of the same family, are not permitted to reside in the same lodging-houses.

7. Women students are under the supervision of the Lady Superintendent, whose directions as to conduct are to be observed.

8. All interference on the part of any student with the personal liberty of another, by arresting him or summoning him to appear before any tribunal of students, or otherwise subjecting him to any indignity or personal violence, is forbidden by the Council. Any student convicted of participation in such proceedings will forfeit the certificate required for admission to the University examinations, and will render himself liable to expulsion from the College.

9. A student who is under suspension, or who has been expelled from the College or University, will not be admitted to the University buildings or grounds.

10. The constitution of every College society or association of students and all amendments to any such constitution must be submitted for approval to the College Council. All programmes of such societies or associations must, before publication, receive the sanction of the Council. Permission to invite any person not a member of the Faculty of the University College to preside at or address a meeting of any society or association must be similarly obtained. Societies and associations are required to confine themselves to the objects laid down in their constitution.

11. The name of the College is not to be used in connection with a publication of any kind without the permission of the College Council.

12. Occasional students may be admitted to lectures on application to the Principal.

13. Certificates of attendance on lectures in any department during an academic year may be given to occasional students who have been regular in their attendance, and who have also passed the examinations in such department.

14. All undergraduates are expected to wear the prescribed academic costume within the class rooms and buildings.

## Scholarships.

### A. Matriculation Scholarships.

## Victoria University.

---

VICTORIA UNIVERSITY was founded by resolution of the Conference of the Methodist Church in Canada, held in Kingston in August, 1830. The institution was opened for students on the 18th of June, 1836, with the Rev. Matthew Richey, M.A., as Principal. On the 12th of October, 1836, letters patent were issued by His Majesty King William IV., incorporating the institution as a seminary of learning for the Province of Upper Canada, under the name of "Upper Canada Academy."

In 1841 the Parliament of the United Provinces of Upper and Lower Canada, being now first constituted by Acts of the Imperial Parliament, with power to grant such a charter, at its first session, held in the city of Kingston, passed an Act to incorporate the Upper Canada Academy under the name and style of "Victoria College, with power and authority to confer degrees of Bachelor, Master and Doctor of the various Arts and Faculties," which Act was assented to by the Governor-General on the 27th of August, 1841.

On the 21st of October, 1841, the Rev. Egerton Ryerson, having been appointed Principal, opened the first college session under the enlarged charter.

In the year 1844 the Rev. A. McNab, D.D., succeeded the Rev. Dr. Ryerson as Principal, and occupied the office until 1849. At the close of his term the number of students in the college was 140.

In 1850 the Rev. S. S. Nelles, M.A., was appointed Principal, and addressed himself to the task of organizing and enlarging the College to the status and work of a University. In the year 1854-55 the Faculty of Medicine was added and established in Toronto. In 1860 the Faculty of Law was added, and in 1871 the Faculty of Theology.

In the year 1883-84 a Commission, appointed by the General Conference of the Methodist Church, arranged for the consolidation

of Albert College, Belleville, with Victoria College, Cobourg, and legal effect was given to this consolidation by Act of the Legislature of Ontario, 47 Vic., chap. 93.

The corporate name was by this Act changed to "Victoria University." The government of the University was vested in a Board of Regents, Chancellor, Vice-Chancellor, and Senate. To these bodies was given power to affiliate outlying colleges, and full university powers in all Faculties were continued. The Rev. S. S. Nelles, D.D., LL.D., as President, was *ex officio* first Chancellor, and William Kerr, K.C., LL.D., was elected Vice-Chancellor.

In 1887 the Rev. S. S. Nelles, D.D., LL.D., died, and the Rev. N. Burwash, S.T.D., was appointed President and Chancellor.

Under the provisions of the present charter the following colleges are affiliated in Arts with Victoria University: Albert College, Belleville; the Ontario Ladies' College, Whitby; Alma College, St. Thomas; Columbian Methodist College, New Westminster, B.C.

On the 12th of November, 1890, under the provisions of the Revised Statutes of Ontario, chap. 230, and the Acts amending the same, Victoria University was, by Proclamation of the Lieutenant-Governor, federated with the University of Toronto.

On the 1st of October, 1892, the Faculty of Victoria University occupied their new buildings in the Queen's Park, Toronto, and the federation of the Universities was practically consummated. The Faculty of Arts then assumed the work and relation of a College in the University of Toronto, providing instruction in all subjects assigned by the Federation Act to University College. In other subjects the students of Victoria University attend the lectures and laboratory practice of the University of Toronto, and receive their degrees under the statutory regulations of its Senate.

By the provisions of the Federation Act the President of Victoria University, a representative of the Senate of Victoria University, and five representatives of the graduates in Arts, become members of the Senate of the University of Toronto, and the graduates and undergraduates of Victoria University are granted the same standing and privileges in the University of Toronto.

Five hundred and seventy-seven graduates of Victoria University were admitted to standing and privileges of the degree of B.A. in the University of Toronto; two hundred and thirty-one to those of

M.A.; nine hundred and sixty three to those of M.D.; one hundred and twenty five to those of LL.B.; and forty to those of LL.D.

By the University Act of 1901, the electoral body in Convocation of Victoria University was made permanent, and was enlarged to include all graduates of the University of Toronto who, since 1892, have been enrolled in Victoria College in Arts.

The electoral body of Victoria University in the Convocation of the University of Toronto now consists of 807 graduates in Arts, besides the graduates in Law and Medicine, who form one body with those of the University of Toronto.

## FOR STUDENTS IN ARTS.

---

### Admission.

Students are admitted to Registration in the Faculty of Arts on having passed the Matriculation examination prescribed by the University of Toronto, or on giving the Faculty satisfactory evidence of their ability to pursue the course of study proposed. They are required to observe the general regulations of the University of Toronto and of Victoria University in regard to attendance on lectures and examinations.

### Examinations.

All students of Victoria University desiring to take the examination in Arts will present themselves at the annual examination of the University of Toronto.

The standing thus obtained gives the students of Victoria undergraduate rank in the University of Toronto as well as in Victoria University, and entitles them to compete for all University honors.

No student may present himself for any University examination subsequent to matriculation without producing a certificate of having complied with all the requirements of his college affecting his admission to such examination.

### Occasional Students.

Occasional students may be admitted to lectures on application to the President.

Certificates of attendance on lectures in any department during an academic year may be given to occasional students who have been regular in their attendance, and who have also passed the examinations in such department.

### Terms.

The Academic Year consists of two terms: the first (*Michaelmas*) extending from October 1st to December 21st; and the second (*Easter*) from January 7th to May 31st.

Attendance for eight terms is required by the University prior to the B.A. degree, unless the student has been admitted at Senior Matriculation, or *ad eundem statum*, or has received dispensation from the University Council.

The term will not be allowed to students who have been reported to the President by any of the Professors as neglecting to attend the required lectures, or have not conformed to the statutes and regulations of the College, or have been reported to the Faculty for bad conduct.

### Instruction.

Instruction is given in the various subjects of the Arts Course by the Arts Faculty of the University of Toronto and the Arts Faculty of Victoria University. In the division of the work of instruction between these Faculties the subjects are assigned as follows:—To the Faculty of the University of Toronto: Mathematics, Physics, Mineralogy and Geology, Biology, Chemistry, History of Philosophy, Logic, Comparative Philology, Italian and Spanish, History, Political Economy and Constitutional History, Constitutional and International Law, Roman Law, General Jurisprudence and History of English Law; and to the Faculty of Victoria University: Latin, Greek, Ancient History, English, French, German, Oriental Literature, Ethics. Instruction in the theological options is given by the Theological Faculty of Victoria University.

### College Examinations.

Matriculated students are required to attend all examinations prescribed by the Professors and Lecturers in their special departments.

Prizes and honors are awarded on the recommendation of the Professors and Lecturers, in accordance with the requirements prescribed by them in their several departments.

Occasional students are not required to attend the examinations, unless they are candidates for prizes or honors, or desire to obtain certificates of attendance.

### Fees.

The fees required to be paid by students enrolled in Victoria College are those prescribed by the Trustees of the University of Toronto. (See page 44.) Enrolment fees are paid to the College Treasurer; all other fees are paid to the Bursar of the University.

### Discipline.

All students enrolled in Victoria College are subject to the regulations as to discipline prescribed by the Council of the University of Toronto. (See pp. 33.)

Students are required to attend the lectures, as well as the examinations on all subjects necessary for students of their course and standing, and certificates of such attendance will be required as a condition of admission to examination by the University, unless dispensation has been obtained.

All interference with the personal liberty of the student, by arresting him, or summoning him to appear before any tribunal of students, or otherwise subjecting him to any indignity or personal violence, is forbidden by the Faculty. Any student convicted of participation in such proceedings will forfeit the certificate required for admission to the University examinations, and will render himself liable to expulsion from the University.

### Religious Services.

All students are expected to attend the public worship of God on the Lord's Day at such churches as their parents or guardians may prefer. Morning prayers will also be held daily in the Chapel, at which all students are expected to be present.

Other religious services will be held at suitable times, to which all students are cordially invited.

### Libraries, Museums, etc.

The Students of Victoria University have all the advantages of the following libraries, laboratories, etc.:

UNIVERSITY OF TORONTO LIBRARY, containing upwards of 68,000 volumes, is supplied with a reading room, a periodical room, several seminary rooms, etc., and is provided with the standard and current literature of all subjects taught in the University.

VICTORIA UNIVERSITY LIBRARY consists of a working collection of 13,531 bound volumes in the English, French and German languages and literatures, History, Philosophy, and the various departments of Theology. The Library is one of reference, and includes the loan of the Literary Society collection. For the list of Donors for the present year see page 166.

The LABORATORIES in the various departments of Science are well supplied with apparatus for work in the departments, and are situated in the buildings devoted to the subjects.

The MUSEUMS contain collections of specimens in Biology, Mineralogy and Ethnology arranged for the purposes of instruction.

In addition to the collection of the Museums of the University of Toronto, there is in Victoria University a Museum that is of particular value in the Department of Mineralogy.

### Residence

Students are required to board in such houses as are licensed by the Faculty, except students residing with their parents or with friends designated by their parents or guardians. A carefully selected list of boarding-houses, where board and rooms may be obtained at prices varying from \$3.00 to \$5.00 a week, is prepared each year by the Young Men's Christian Association. Students will be expected to preserve proper hours, and to maintain the conduct of Christian ladies and gentlemen.

### Campus and Woman's Residence.

The Board of Regents has purchased a block of land immediately north of the grounds occupied by the Victoria buildings, which gives ample space for a campus and a site for a ladies' residence. The erection of this residence, for which funds were provided by the late Hart A. Massey, Esq., will be undertaken this summer, and it is confidently expected that the building will be ready for occupancy in October, 1902.

The subsequent purchase of the house and grounds of the late Sir James D. Edgar supplies the University with a site and with a large, commodious building that it is hoped may prove to be the nucleus of a much-needed residence for male students.

### Physical and Voice Culture.

Classes in physical culture have been formed for lady students, and are conducted in rooms specially fitted up for the work, under the capable management of Mrs. Scott-Raff, F.C.M. The instruction given is recognized as meeting a long-felt want. Arrangements have been completed by the Methodist Woman's Educational Association to add, next year, classes in vocal culture and expression. These classes, together with the college lectures in English, French, German and Literature will be open to occasional students, and will form a desirable course of study for young women who do not contemplate a University degree. Full particulars may be learned from Mrs. A. R. Bain, Secretary of the Methodist Woman's Educational Association, Victoria College, Toronto, or Mrs. Scott-Raff, the Directress, Victoria College.

## Victoria University.

COURSES OF LECTURES  
AND  
METHODS OF INSTRUCTION.

---

WINTER SESSION, 1901—1902.

---

**Chemistry.**

*Professor:* W. R. LANG.

*Lecturers:* F. B. ALLAN, F. B. KENRICK.

*Lecture-Assistant:* C. M. CARSON.

All lectures and practical work will be given in the Chemical Building. The students of the First year attend a course of lectures, delivered three times a week in the large lecture theatre, on Inorganic Chemistry. This course embraces the study of the non-metallic and metallic elements and of their principal compounds, based on Mendelejeff's classification of the elements.

*Tutorial Classes:* In addition to the Lectures the class is divided into sections, each of which meets one day a week for further instruction in Arithmetical Chemistry.

*Text-Books:* Richter, Inorganic Chemistry. Newth, Inorganic Chemistry.

*Chemistry:* The instruction given in practical chemistry includes a systematic course of laboratory work including qualitative analysis of inorganic salts, acids and bases.

The students of the second year attend a course of lectures on Organic Chemistry, delivered twice a week. The principles of organic analyses and the basis on which the compounds of carbon are classified are explained, and the typical compounds and derivations of the "fatty" series specially described. An elementary study of the "aromatic" series is also included in the course.

*Text-Books:* Remsen's Organic Chemistry.

The laboratory work of the Second year includes elementary volumetric analysis, with special application to clinical

medicine and sanitary science, and the analysis of urine ; and qualitative analysis as applied in toxicology and medicine.

Students working in the laboratory are provided with the necessary apparatus on making a deposit of three dollars\* at the commencement of the session, which will be returned at the close of the session after the following charges have been deducted from it :—

- (1) The cost of all apparatus broken or destroyed.
- (2) Any fines for breach of laboratory rules.

No certificate will be given for the practical work unless the student has passed the practical examinations conducted during the session.

---

## Physics.

*Professor* : J. LOUDON.

*Lecturer* : C. A. CHANT.

The lectures on Physics will give a concise outline of the entire subject, and are intended to form a satisfactory foundation for future study in other branches of science.

The various parts will be treated in an experimental manner, and will be considered in the following order :—

### 1. MECHANICS :

General notions and terms, such as velocity, acceleration, mass, momentum, force, energy ; together with calculations to illustrate the laws.

### 2. HYDROSTATICS :

Pressures and their transmission, specific gravity, and general properties of liquids and gases.

### 3. SOUND :

General explanation of wave-motion, reflection and interference of sound, tuning forks, organ-pipes, strings, and the musical scale.

---

\*This is in addition to the fee of three dollars mentioned as "Chemical Laboratory Supply Fee," on page 213.

## 4. HEAT :

Thermometers, expansion, specific heat, latent heat, and other ordinary phenomena.

## 5. LIGHT :

Laws of reflection and refraction, mirrors, prisms, lenses, microscope and telescope, colour, double-refraction and polarisation.

## 6. ELECTRICITY AND MAGNETISM :

Laws of magnetism ; voltaic cell, chemical, magnetic and heating effect of the electric current ; induction, the induction-coil, dynamo, etc.

The lectures will be given in Room 16, Main Building (West Wing).

---

### Biology and Physiology.

*Professor of Biology* : R. RAMSAY WRIGHT.

*Professor of Physiology* : A. B. MACALLUM.

*Demonstrator in Biology* : R. R. BENSLEY.

1. Students of the First year will attend a course of lectures on general biology and elementary physiology, to be given three days a week throughout the session. This course of lectures is common to the Arts students of the First year, and is designed as an introduction to the whole range of biological studies. After a sketch of the scope and objects of these, the lectures will treat (1) of the fundamental principles of biology, as illustrated by the simplest animals and plants, (2) of typical forms of higher plants in ascending order, (3) of the structure and functions of the human body, and (4) comparatively, of the vertebrates and of the rest of the animal kingdom. Students are recommended to make use of the Biological Museum in connection with this course of lectures.

2. A practical course of fifty hours' duration, illustrating the above and serving as an introduction to the use of the microscope, will be conducted by the Demonstrator under the supervision of the Professor of Biology.

3. During the Easter term there will be given a series of thirty lectures and demonstrations on physiology to students of the First year.

4. The students of the Second year will attend throughout the session a course of lectures and demonstrations in advanced physiology. Each student will be expected also to repeat for himself, in the Laboratory, the more important demonstrations, and to facilitate this the class will be divided into groups, each of which will devote four hours a week throughout the session to experimental physiology. A record of the work so done from week to week by each student will be kept and at the end of the session this will be taken into consideration, along with the results of his examinations, in estimating his standing in the class lists.

Arrangements will also be made for holding, during the session, weekly class reviews on the subject matter of the lectures.

5. The instruction in embryology and histology will consist of forty lectures during the session, and a practical course involving fifty hours' work in the laboratory. The lectures on Embryology will be chiefly devoted to the development of the external form of the organs and of the tissues of the human body, but the necessary comparative data for the proper understanding of these will be supplied by reference to the embryology of the amphibia and the birds. The student may consult the large collection of models of embryology in the Museum, which are now furnished with explanatory labels designed to supplement the instruction given in the lectures. The lectures on Histology are designed to cover the general principles of Human Histology. The practical course will be conducted by the Demonstrator, and the student will have the opportunity of providing himself with a set of fifty typical specimens illustrative of embryology and histology, as well as of becoming acquainted with the methods employed in the preparation of these.

### **The Biological Museum.**

The University Biological Museum forms the central portion of the Biological Buildings. It is primarily intended as an educational Museum for the students taking biology as part of their University work. It is arranged in such a way as to facilitate the most elementary as well as the most advanced studies, each specimen, as far as possible, being furnished with a printed label indicating the most salient points which it is designed to illustrate. The Museum, however, being open every afternoon, is also of great interest to the general public and attracts even greater numbers of visitors than the old Natural History Museum in the University Building.

The public entrance to the Museum is situated in the west façade of the Biological Buildings, while the students gain access to the rooms through the eastern wing, in which the laboratories are located. The interior of the Museum, which occupies two floors, is sub-divided into four rooms, seventy-five by twenty-five feet in size, amply lighted by handsome windows on the north and south sides. Three of these rooms are devoted to Animal Biology, while the fourth, which is to be arranged for the illustration of Vegetable Biology, is temporarily fitted up for the accommodation of the Ferrier collection of minerals.

The public entrance opens into the north ground floor room, the wall-cases in which contain stuffed specimens of the various orders of Mammals, while the free-standing cases between the windows illustrate the comparative anatomy and development of that class. All the show-cases are constructed of iron and plate-glass, those destined for the exhibition of smaller specimens standing on wooden storage-cases, built of cherry and cedar, and containing skins and other specimens for private study. The south ground-floor room is devoted to the remaining vertebrate classes, the wall-cases containing stuffed specimens of birds, reptiles, batrachians and fishes, and the smaller cases between the windows containing specimens illustrating the comparative anatomy and development of these classes.

A handsome staircase decorated with busts of distinguished biologists connects the ground-floor and the first floor; a number of wall-cases in ascending series contains a small collection of fossils from all parts of the world, as a graphic illustration of the relative position of the fossiliferous strata, and of their characteristic remains.

The south first floor room contains illustrative specimens of all the remaining branches of the animal kingdom, the arthropods and molluscs being exhibited in the wall-cases and the table-cases standing in the alcoves of these, while the protozoa, sponges, coelenterates, echinoderms and worms are accommodated in the cases between the windows.

Although the Natural History Museum suffered considerable losses on the occasion of the University fire, these fortunately did not involve the large collection of models and specimens most useful from the educational point of view, while the generosity of public bodies and private individuals has largely repaired the losses referred to, so that the Museum will be found to constitute a most important addition to the instruction furnished in the lecture-rooms and laboratories.

### Anatomy.

*Professor, and Director of the Anatomical Department:* A. PRIMROSE.

*Associate-Professor:* H. W. AIKINS.

*Demonstrator:* F. N. G. STARR.

*Assistant-Demonstrators:* C. L. STARR, A. A. SMALL, W. J. MCCOLLUM,  
W. J. O. MALLOCH, S. W. WESTMAN, E. R. HOOPER,  
W. H. PIERSOL, W. J. WILSON.

**Lectures:**—A course of lectures will be given in the Biological Department for students of the First and Second years; in this course the structure of the human body will be described in a systematic manner; the various organs of the body will be examined with their more important relations and connections. In order that the course may be more comprehensive certain principles in general morphology and devel-

opment will be elucidated. The lectures will be illustrated by recent dissections, by wet and dry preparations and by drawings and diagrams. In the class-room a projection apparatus will be employed for the purpose of throwing upon a screen an enlarged view of photographs, taken from the valuable preparations which are displayed for study in the Museum. This greatly facilitates the demonstration of anatomical structure before a large class; plates of these preparations will be distributed among the students.

Tutorial instruction will be given to limited classes for the purpose of studying osteology, and for the demonstration of the structure of the central nervous system and the special sense organs.

A course of lectures will be given at the University Medical Building, in Gerrard street, for students of the Third and Fourth years. This course will consist of a systematic study of the regional anatomy of the human body as applied in the practice of medicine and surgery. The lectures will be illustrated by suitable preparations, and a series of demonstrations of landmarks will be conducted on the living subject.

Demonstrations:—A series of demonstrations will be conducted daily for students of the Second year. In this class the main facts in gross human anatomy will be demonstrated from recent dissections.

Dissection:—The dissecting-room will be open daily from 9 a.m. until 6 p.m. on Monday, Tuesday, Wednesday, Thursday and Friday, and from 9 a.m. till 1 p.m. on Saturday. Students will be required to conduct their work in a systematic manner and to conform to the regulations in force in the dissecting-room. One or more of the Assistant-Demonstrators will be in attendance at all times for the purpose of superintending the work of the students, and of giving instruction. Examinations will be conducted from time to time on the parts dissected, and marks allotted for the work done. Certificates for work in practical anatomy are granted to such students only as have obtained the requisite number of marks in the examinations.

The dissecting-room is admirably adapted for the purposes of practical anatomy. It is large and well ventilated, and is equipped in such a manner as to afford every possible comfort and convenience to the student. Each student is provided with a locker for his private use. A notable feature of the dissecting-room is the excellent light, the room being lighted from the roof through extensive sky-lights, and when sunlight fails, electricity is employed with equally good effect.

**Museum:**—In connection with the dissecting-room a series of preparations have been mounted for the purpose of study. The disarticulated bones of the skeleton are included in this collection, together with frozen sections of the human body; wet preparations, illustrating regional anatomy, are also provided. A valuable and instructive series of Steger's models of frozen sections by His are exhibited in the Museum, together with a complete series of dissections of the brain and other preparations. Cunningham's series of models illustrating the topographical anatomy of the brain have recently been obtained.

Arrangements are such that a student may obtain bones from the osteological store-room, which he may take home for a limited period, if he so desire.

A pamphlet will be issued containing directions for the guidance of students of the class in anatomy, with the regulations for the dissecting-room. This should be procured by all students enrolled in the Anatomical Department.

## **Materia Medica and Therapeutics.**

*Professor of Therapeutics:* J. M. MACCALLUM.

*Associate-Professor of Pharmacology and Therapeutics:* C. F. HEEBNER.

The course in therapeutics includes: 1. General Therapeutics or the nature and actions of remedies generally. 2. The various forms in which medicines are administered, and the channels through which they are introduced into the system.

3. Special therapeutics, of the more important medicines of the British Pharmacopœia, and of recent important but non-official medicinal substances.

There will also be dealt with such subjects as electricity in its application to disease, heat, cold, climate, massage, hydrotherapy.

Clinical Therapeutics:—Cases in the wards of the General Hospital and of the Hospital for Sick Children will be used to illustrate important points in special and general therapeutics.

The following subjects will be considered in the course on materia medica and elementary therapeutics:—

1. The exhibition of drugs. This subject will be discussed as to forms of drugs, and as to mode of administration.

2. Therapeutic terms and definitions, with such explanations as may be necessary to make their use in the subsequent lectures understood.

3. General pharmaceutical operations, as solution, maceration, digestion, percolation, etc., the preparation of ointments, extracts, infusions, etc., the comparative values of the various solving menstrua and bases, and the effect upon drugs of the different pharmaceutical methods used.

4. The general principles of posology, and modifying influences.

5. The art of prescribing. Instruction in this subject will be with a view to indicate the means of ensuring that mixtures may be therapeutically effective, free from incompatibility and pleasing to the eye and taste.

6. Crude drugs. Their nomenclature, source, physical and chemical characters, active principles, medicinal properties, dose impurities and adulterations, toxicological action, if any.

- (a) Inorganic drugs.
- (b) The carbon compounds.
- (c) Plant drugs.
- (d) Animal drugs.

7. Prepared Drugs. The official and important officinal preparations will be considered individually as to their strength, method of preparation, dose, etc.

The collection of specimens of crude and prepared drugs is complete in every respect. These specimens will be handed to the students for inspection, at each lecture, and then returned to the glass cases in the Reading Room, where they may be further inspected. Provision will be made whereby all students of the class may secure a complete set of specimens, at a moderate cost, for home study.

### Medicine.

*Professor of Medicine and Clinical Medicine* : A. MCPHEDRAN.

*Associate-Professors of Clinical Medicine* : W. P. CAVEN, W. B. THISTLE.

*Lecturers on Medicine and Clinical Medicine* : R. J. DWYER, R. D. RUDOLF.

*Lecturer in Clinical Medicine* : G. BOYD.

*Demonstrators* : A. R. GORDON, G. CHAMBERS.

The aim of the course will be the discussion of Internal Medicine in its more general aspects. The general principles of the various subjects treated of will be considered, tracing the relationship existing between etiology, morbid changes and symptomatology, and deducing therefrom the course of treatment that should be pursued ; the more important diseases will be fully dealt with. As far as possible, the course will be made to conform to that of the Clinical Department so that students may be able to apply the general principles discussed to the particular cases under observation. A course of lectures will be given on the physics of the various clinical phenomena.

The lectures will be illustrated by diagrams, hand-colored drawings, lantern slides, etc., and by preparations of morbid anatomy.

### Clinical Medicine.

As it is only by being brought into direct contact with patients that the student can gain a thorough knowledge of disease in its varying aspects, it is to the Clinical Department that he must devote the greater part of his time and energy in

order to become proficient in the subject. Ample opportunities will be afforded him in the large out-patient and in-door services of the Toronto General and St. Michael's Hospitals for the study of disease in the adult. The Hospital for Sick Children affords a varied field in children's diseases.

While as great a variety of cases as possible will be presented for examination, more importance will be attached to thoroughness in the study of cases than to the number observed.

In addition to the out-patient clinics and regular weekly lectures, students of the Third and Fourth years will be taken in classes into the wards for instruction at the bedside, and each student required, in presence of the class, to take part in the examination of patients, to interpret the significance of the symptoms presented, and detail the treatment indicated. They will be instructed in the use of instruments of precision, such as the thermometer, sphygmograph, ophthalmoscope, hæmometer, hæmocytometer, etc.

Students will act as clinical clerks, and will be required to take accurate and complete histories of the cases assigned to them; these histories will be criticised from time to time before the class and value assigned for the work done. By a recent enactment of the Senate of the University of Toronto, a record is made of this and other clinical work done by the student during the session and reported to the Senate at the end of the session; this report is accepted in lieu of a clinical examination, as it affords a much more accurate estimate of the student's attainments than can be obtained by any examination however thorough.

Small classes will be formed of the students of the Third year for the study of the methods of examination and the significance of symptoms.

#### **Clinical Laboratory.**

Daily instruction will be given in the Clinical Laboratory in the microscopical, chemical and bacteriological examination of blood, urine, sputum, stomach contents, etc.

Each clinical clerk will be required to make all such examinations in connection with the cases under his charge, and enter the result in his clinical records. The value of this work will be taken into account in estimating his standing in clinical medicine at the end of the session.

*Text-Books recommended* : Osler, Strümpell, Musser, Gibson and Russell.

*For reference* : Fagge's Principles and Practice of Medicine (latest edition), and Hirt on Diseases of the Nervous System.

---

## Surgery.

*Professor of Surgery and Clinical Surgery* : I. H. CAMERON.

*Associate-Professor of Surgery and Clinical Surgery* : G. A. PETERS.

*Associate-Professors of Clinical Surgery* : A. PRIMROSE, B. SPENCER,

L. M. SWEETNAM, H. A. BRUCE, W. OLDRIGHT, F. N. G. STARR.

*Demonstrators in Clinical Surgery* : C. L. STARR, W. MACKEOWN.

This course of lectures comprehends :—

1. The general principles of surgery, as based upon what is known of: (a) The natural history of diseases of a surgical character as they affect the human frame, as, for example, abscess, ulceration, mortification, tumours, etc.; (b) The processes of repair and regeneration taking place in tissues, which have been diseased, such as the healing of wounds, the expulsion of foreign bodies, as bullets, dead bone, etc.; and (c) The part played in the economy by micro-organisms, involving a consideration of the germ theory of disease.

### 2. Surgical Injuries.

(a) Of tissues, as fractures, dislocations, and injuries to nerves, blood vessels, etc.

(b) Of organs contained in the so-called cavities of the body, the brain, lungs and abdominal viscera.

3. Surgical diseases, as aneurism, varicose veins, calculus in the kidney or bladder, hernia, tuberculous diseases of joints, bones, testicles, etc., pyæmia, erysipelas, etc.

4. The correction of malformations, deformities and defects,

as club-foot, spinal curvatures, hare-lip, cleft-palate and other conditions usually classified under the headings of orthopædic and plastic surgery.

The course will be illustrated by plates and drawings, by specimens from the Museum and fresh specimens from the operating and post-mortem rooms, and by especial reference to clinical cases falling under the immediate observation of the students in the wards of the Hospitals.

### **Clinical Surgery.**

In teaching clinical surgery, an effort is made to give as much personal instruction to each student as possible, and whenever it is practicable he is permitted to make a careful examination of the patients brought before the class. In order to facilitate this the classes are made small, and are graded to some extent according to the degree of advancement of the students in their studies. Whenever dressings are done and apparatus applied in the presence of the classes, each step of the proceeding is explained by the surgeon and the clinical clerks and dressers participate in the actual work.

During his course, each student has an opportunity of acting as clinical clerk and dresser, thus being afforded facilities for coming into that immediate contact with the patient which is so important from the point of view of practice, and which lends so much additional interest to the cases in his charge.

The material available for the instruction of students is abundant, consisting of out-door and in-door patients in the Toronto General Hospital, St. Michael's Hospital, and the Hospital for Sick Children. In the last named institution may be found cases, in great numbers and varieties, illustrating all the diseases, deformities and defects, such as club-foot, hare-lip, hip-joint disease, Pott's disease, and other conditions met with most frequently in the young.

Special instruction is also given in the use of surgical appliances, splints, bandages, dressings, and the various details of minor surgery, and in the management of fractures and dislocations.

## Pathology.

*Professor of Pathology and Bacteriology* : J. J. MacKENZIE.

*Associate-Professor of Pathology and Bacteriology* : J. AMYOT.

*Laboratory Assistant in Bacteriology* : W. GOLDIE.

*Assistant-Demonstrators* : G. SILVERTHORN, W. J. WAGNER.

The course will embrace lectures on general and special pathology, together with demonstrations in both gross morbid anatomy and pathological histology. The lectures to the Third year will be mainly upon general pathology, and those to the Fourth year upon special pathology. Post-mortem examinations are performed by the Professor of Pathology or the Associate-Professor at the General Hospital, and the students of the Fourth year will be expected to take part in these. Gross demonstrations in addition to those in the Hospital Mortuary are given in the College class-rooms every week, and will be so arranged that Students of both Third and Fourth years may take advantage of them. The University having equipped a pathological laboratory in the school building, and a clinical laboratory in the General Hospital, every facility for microscopical work in tissues and fluids is afforded. At least seventy-five slides of morbid tissues are mounted by each senior student, and four hours of demonstration in microscopical work per week given in each year. Clinical clerks receive regular instruction in the analysis of urine, examination of blood, sputum, etc., in the Hospital Clinical Laboratory.

In Bacteriology, a course of lectures will be given, and every student will be required to work in the Bacteriological Laboratory for one month. The Assistant in Bacteriology will give all needed assistance to clinical clerks who may have to undertake bacteriological work in connection with cases under their charge in the Hospital.

---

## Hygiene.

*Professor: W. OLDRIGHT.*

The student is recommended to obtain from one of the works mentioned in the list of text books an elementary knowledge of the subject of each next succeeding lecture. The information thus obtained will be supplemented in the lectures, and fuller consideration will be given to those points which require special attention on account of differences of climate, population, occupations, social and political organization, and other circumstances in Canada. Students will also be guided in regard to sources of information and current literature relating to health work in this country.

In addition to the theoretical teaching, practical demonstrations will be given by means of various instruments. The following subjects will be embraced in the course: air, impurities and their effects, ventilation and heating; hygienic architecture; climatology; sewerage and disposal of refuse; water supplies; foods, dietaries, adulterations; occupations; physical and mental exercise and overwork; clothing; baths; contagion and infection, management of epidemics, quarantine; duties and functions of medical health officers and boards of health; vital statistics; sanitary legislation—federal, provincial and municipal.

### Museum of Hygiene.

In the Museum of Hygiene will be found apparatus and samples for teaching and illustrating the various branches of Hygiene, and exhibits contributed by manufacturers and other persons interested in the subject.

----

## Toxicology.

*Professor: W. H. ELLIS.*

A series of lectures and demonstrations on toxicology is given under the following heads:—

### THE NATURE OF POISONS.

Their properties, physical, chemical and physiological.

### THE OCCURRENCE OF POISONS.

In nature, in the arts, and in common life. Danger from poisoning incidental to particular callings. Genesis of poisons in the dead and in the living body.

### ANTIDOTES TO POISONS.

### THE DETECTION OF POISONS.

Identification of poisons in the pure state. Separation from organic matter.

Post-mortem examinations for poisons.

## Medical Jurisprudence.

*Professor:* B. SPENCER.

*Legal Lecturer:* HON. DAVID MILLS.

The course will embrace the discussion of the following subjects in their medico-legal aspects:—

Reports and written opinions; expert evidence; Coroner's Law.

The identity of the person—living and dead.

Death; its causes, signs, and period of occurrence. Apparent death; autopsy; exhumation.

Injuries to the person,—in connection with which will be considered wounds and other external injuries; blood-stains; suffocation, hanging and strangling; drowning and starvation.

Offences against chastity, including rape, criminal abortion and infanticide.

Live birth, legitimacy, congenital defects and feigned diseases.

Life insurance.

Malpractice.

Suicide.

Medical ethics.

## Mental Diseases.

*Extra-Mural Professors :* DANIEL CLARK, N. H. BEEMER.

The course of lectures will be chiefly clinical, and given at the Asylums. The subjects discussed will be of a practical nature as far as possible, and may be classified as follows:—

1st. Definitions and errors arising therefrom in the study of insanity.

2nd. The brain and its exceptional construction and functions.

3rd. The brain as an organ of the mind.

4th. Sanity and insanity in their relation to one another.

5th. Different forms of insanity, illustrated by patients.

6th. The moral treatment of the insane.

7th. The medical treatment of the insane in the various forms of their diseases.

---

## Gynæcology and Obstetrics.

*Professor of Gynæcology :* U. OGDEN.

*Associate-Professor of Gynæcology :* J. F. W. ROSS.

*Professor of Obstetrics and Pediatrics :* A. H. WRIGHT.

*Associate-Professor of Obstetrics and Pediatrics :* H. T. MACHELL.

As such very ample means are now furnished in other departments for the study of anatomy, physiology and pathology, the Professors of Gynæcology will devote their time altogether to the various methods of examination and diagnosis; the use and application of instruments; and the symptoms, diagnosis and treatment of diseases peculiar to women.

The disorders of menstruation, leucorrhœa, chlorosis, metritis in its various forms, tumours, displacements and diseases of the uterus and ovaries, lacerations of the cervix uteri and perineum, and abdominal surgery will be treated of and illustrated by large plates, casts and morbid specimens in the didactic course, while operative gynæcology will be fully demonstrated by the Professors in their clinics in the Toronto General Hospital.

There will be two separate courses in obstetrics; one for the students of the Third year in physiological obstetrics, and the other for students of the Fourth year in pathological obstetrics.

The Third year course in physiological obstetrics will include the following: anatomy and physiology of the female organs of reproduction; physiology of pregnancy; physiology, mechanism, and management of labor; management of the puerperal state; management of the infant.

The Fourth year course on pathological obstetrics will include: diseases of pregnancy, abortion and premature labor, dystocia, accidents before and after delivery, obstetrical operations, puerperal diseases, including septicæmia.

Practical demonstrations will be given on the phantom or cadaver, and diagrams, specimens, models, etc., will be used in illustrating the various subjects treated of in the two courses.

A special course of instruction in Disease in Children, will be conducted by the Associate-Professor of Obstetrics and Pediatrics. He will be assisted in the clinical work by other members of the Faculty who are on the staff of the Hospital for Sick Children.

The Hospital has now 425 beds, and during the year the number of in-patients under treatment has varied from 250 to 300. During last year about 3,300 patients were admitted, and 16,000 patients received treatment in the out-door department.

All the patients in the Hospital are, as a rule, suffering from acute medical or surgical disease; the chronic cases are generally sent to the Home for Incurables or House of Providence, and the convalescent patients are sent to the new Convalescent Home, recently erected on Wells's Hill.

### Clinical Teaching.

Clinical instruction is given in the various departments of the Hospital on all classes of patients.

I. *Theatre Lectures* :—Clinical Lectures are given daily, on patients brought from the wards to the large theatre, by the professors of clinical medicine and of clinical surgery to the students of the Third and Fourth years.

#### II. *Instruction in the Wards* :

(a) *Medicine and Surgery* :—A systematic course of bedside instruction is given to limited classes of students. Arrangements are such that each physician and surgeon or his assistant is in daily attendance for the purpose of imparting instruction at the bedside. By this means provision is made for continuous daily work in the ward, and students of both Third and Fourth years are required to avail themselves of it.

(b) *Gynæcology* :—Small classes of students receive instruction in diseases peculiar to women in the pavilion specially devoted to the treatment of such patients. These classes meet twice a week. Increased facilities have recently been provided for an out-door gynæcological clinic.

(c) *Obstetrics* :—In the Burnside Lying-in-Hospital, in which there are over 200 births a year, final students are permitted to witness and assist in the conduct of *labours*. Students are also allowed to make engagements with out-patients and to attend them in confinements at their own homes.

(d) Ophthalmology, Otology, Laryngology and Rhinology :—Diseases of the eye, ear, throat, and nose are studied in the wards of the Andrew Mercer Infirmary.

III. *Surgical Operations* :—Surgical operations are performed in the large theatre on Tuesday and Friday afternoons, or in cases of emergency at any time during the day or night when required. The theatre, which has recently been altered and enlarged, is capable of seating 600 students, and in the completeness of its arrangements is not excelled. The facilities afforded the students situated in all parts of the room for witnessing operations in all their details are unusually good.

IV. *Out-patient Clinics* :—The new addition to the Hospital for the accommodation of out-patients affords ample facilities for instruction in the important class of diseases which here pass under observation. A physician and a surgeon are in attendance daily, and instruction is given on the patients. The cases presenting themselves in the special departments of the Hospital devoted to diseases of the eye, ear, etc., are available in the same manner. There will also be an out-door clinic in gynæcology.

#### V. *Pathology* :—

(a) *Autopsies* :—These are performed at stated hours by the Professor, or the Demonstrator of Pathology. The examinations are conducted in a systematic way, and instruction on the morbid conditions found is imparted to the students. The bearings of the gross post-mortem appearances on the conditions previously found at the bedside are carefully investigated, and, when necessary, arrangements are made for further examination, microscopical and chemical. There are about 200 autopsies during the year. Recently the theatre in which autopsies are made has been completely remodelled and every facility is provided for conducting the examinations. The light is excellent and the room is capable of accommodating 150 students.

(b) The examination and analysis of the various fluids, excreta and pathological products of patients in the wards, are

conducted in the University hospital laboratory. Students are required to keep systematic records of the results obtained by these examinations.

(c) A series of lectures and demonstrations will be given by the Anæsthetist of the Hospital, H. C. Scadding, M.D., on the administration of anæsthetics. These lectures and demonstrations will be given to classes composed of a limited number of students. A fee of \$5 will be charged to each student who takes the course.

### **Clinical Clerks and Surgical Dressers.**

Clinical clerks and surgical dressers are appointed to act for limited periods. They are required to take complete histories of cases allotted to them, and to receive certificates for the same, as required by the Ontario Medical Council. Post-mortem clerks are appointed, and are required to make complete reports of all autopsies made in the post-mortem room, which is situated in the Hospital grounds. Clinical clerks and surgical dressers are also appointed in the departments of gynecology, ophthalmology, and otology.

### **Resident Assistants in the Hospital.**

Five resident assistants are appointed annually from the graduates in medicine of the University, and hold their positions for one year. They will have full opportunities for acquiring experience in the general and special wards of the Hospital, and during the session they will have charge under the physicians and surgeons in the general wards.

For the current year they are:—Messrs. F. A. Cleland, B.A., M.B.; W. H. Cronyn, B.A., M.B.; H. S. Hutchison, M.B.; A. J. G. MacDougall, M.B.; J. H. Trout, B.A., M.B.

This large Hospital, with 160 beds, is entirely devoted to disease in children. In the clinics, cases exemplifying the various diseases in infancy and childhood will be exhibited. Abundant opportunities for a personal examination of all cases will be afforded.

Resident assistants are appointed annually from the graduates in medicine of the University, and hold their position for the year. The opportunity thus offered for obtaining a practical knowledge of this very important department of medical practice is unsurpassed.

For the current year they are:—Messrs. A. B. Rutherford, M.B.; J. D. Chisholm, M.B.

### St. Michael's Hospital.

This institution is conducted as a General Hospital; where medical, surgical and obstetrical cases are admitted. The number of patients admitted last year was about 1,500. The accommodation has recently been enlarged by the addition of a new wing, so that there are now 160 beds. An operating

theatre has been provided, constructed with all the necessary modern equipment for the practice of antiseptic surgery.

Clinical instruction is given in this Hospital by those members of the staff who are also on the teaching staff of the University of Toronto. Opportunity is also provided for the study of Pathology. Post-mortem examinations are conducted systematically, so that students may avail themselves of the material in this department. Clinical clerks and surgical dressers are appointed from the students in attendance at the Hospital.

Resident assistants are appointed annually from the graduates in medicine of the University of Toronto.

For the current year they are: Messrs. H. R. Parent, M.B.; P. W. O'Brien, M.B.

### Fees.

Registration (payable once only) .....	\$ 5 00
The tuition fees for the first year amount to .....	100 00
The tuition fees for the second year amount to .....	100 00
The tuition fees for the third year amount to .....	100 00
The tuition fees for the fourth year amount to .....	100 00
Biological laboratory supply fee in first year .....	1 50
Biological laboratory supply fee in second year .....	2 75
Physiological laboratory supply fee in second year .....	2 00
Chemical laboratory supply fee in first and second years ....	3 00

The annual fee for instruction in medicine in each of the four years is \$100 if paid on or before November 1st of the session, or \$105 if paid in instalments. The first instalment of \$55 must be paid on or before November 1st, and the second instalment of \$50 on or before February 1st.

Students receiving instruction during the Fifth year are required to pay a fee of \$50. On the payment of this fee the student shall be permitted to attend all clinics and whatever didactic lectures he may desire: he shall also be permitted to take laboratory work on the payment of the laboratory fees.

But no student shall be admitted to any of the University laboratories or lecture-rooms until all the fees which may be due by him, for the session or term, have been paid.

Students who registered in the Faculty of Medicine before the year 1897 will be permitted to receive instruction in the University of Toronto on payment of the fees stipulated in the Calendar for the session 1896-97.

Students in the Fourth year will be required, in addition, to pay a fee of \$5 for the extra-mural class in Medical Psychology.

Fees connected with examinations and the granting of Degrees—

For Matriculation or Registration of Matriculation .....	\$ 5 00
For Annual Examinations (each) .....	10 00
For Examination in Practical Chemistry .....	0 50
For Admission <i>ad eundem statum</i> .....	10 00
For the Degree of M.B. ....	20 00
For the Degree of M.D. ....	20 00
For Admission <i>ad eundem gradum</i> .....	20 00

The fee for examination and, in the case of candidates of the Fourth year, that for the degree, must be paid to the Bursar not later than April 15th.

Tickets of admission to any of the courses of lectures or practical instruction will be issued by the Registrar of the University on payment of the fees, and the attendance of the students at such courses must be certified by the professors, lecturers, demonstrators or instructors, before such tickets will be received by the Registrar as entitling the possessors to proceed to examination.

Matriculated students or graduates in the Faculty of Arts, who have attended during the Arts course any course of lectures or of practical instruction of the character and duration required by the curriculum in medicine, may obtain certified

tickets for the same from the Registrar of the University in payment of the ordinary fee demanded from students in medicine.

Matriculated students or graduates in Arts in the department of Natural Sciences who are taking or have taken the Honour course in any subject in the Faculty of Arts which is or shall be held by the Senate equivalent to any of the subjects prescribed in the medical curriculum, may be permitted to take Practical Anatomy, on the payment of a fee of \$40; Anatomy, a course of lectures, \$20; Materia Medica, a course of lectures, \$15. Such students may also be permitted to present themselves for examination at the end of the session, provided they have duly registered as students in the Faculty of Medicine and possess the certificates required for the examination, as detailed in this Calendar.

Matriculated students or graduates in Arts in the department of Natural Sciences who have taken honors in any examination in the Faculty of Arts which is or shall be held by the Senate equivalent to any of the examinations prescribed in the medical curriculum, may obtain tickets for such qualifying classes attended by them without the payment of the corresponding fees.

Certificates of attendance on such lectures or demonstrations will only be given on the presentation of such tickets.

The Hospital fees—payable to the Hospital authorities—are as follows:—

Perpetual ticket .....	\$34 00
Annual ticket .....	14 00
Burnside Lying-in Hospital ..	8 00

### Undergraduate Scholarships.

The following scholarships are annually offered for competition amongst students who attend the Lectures of the University Medical Faculty:—

At First examination .....	one of \$50
“ .....	one of \$30
At Second examination .....	one of \$50
“ .....	one of \$30

Every student taking a scholarship is required to sign a declaration that it is his intention to pursue his medical studies for two or three years, according to the year in which he has taken such scholarship, and to proceed to a degree in the University of Toronto, and that he is not an undergraduate or graduate in the Faculty of Medicine of any other University.

No scholarship will be awarded to any candidate who has not obtained honors in the examination for which it is conferred.

Each scholarship is tenable for one year only, but a scholar of one year is eligible for the scholarship of a succeeding year.

The scholarships or medals are not open to those who are at the same time undergraduates or graduates in Medicine of another University.

No undergraduate in the Honor course, who shall have degraded into a lower year, shall be permitted at any ensuing examination to compete for medals or scholarships, except by special permission of the Faculty, to be granted only in case of illness or for other grave reasons.

---

### **Medals, Prizes, and Certificates of Honor.**

A gold medal and three silver medals the gift of the Faculty are offered annually for competition among those students of the Medical Faculty who are honor candidates for the degree of M. B., and will be awarded by the Senate on the recommendation of the Examiners.

---

### **Prizes in the Department of Medical Psychology.**

Dr. Daniel Clark, Superintendent of the Asylum for the Insane of Toronto, and Professor of Mental Diseases in this University, has offered two prizes, the first prize to consist of \$30 and the second prize of \$20, for the purpose of stimulating the students in their work in the Department of Medical Psychology. The awards will be made to the candidates who pass the best examinations on the subject of Mental Diseases.

---

### **Lectures on the History of Medicine.**

A special course of Lectures on the History of Medicine will be given by members of the Faculty of Medicine during the Session 1901-1902.

## **The University of Toronto Medical Society.**

This Society consists of the graduates and undergraduates enrolled in the Faculty of Medicine of the University of Toronto. It is under the patronage of the members of the Medical Faculty and its object is to deal with all matters pertaining to the general interest and welfare of the students, especially :

(a) To encourage interest in general medical science and literature, and in the pursuit of medical studies.

(b) To provide a supply of periodicals and magazines for the reading rooms.

(c) To be a means of communication between the Student body and the Faculty or any other body, when such communication is desirable.

---

## **University of Toronto Medical Students' Young Men's Christian Association.**

The association is divided into two sections; one for the Primary years, which meets in the building of the University Young Men's Christian Association; the other for the Final years, meets in the building of the Medical Faculty in Gerrard Street East.

The meetings are held weekly. The clergy and other prominent residents of the city frequently take part in the proceedings.

The objects of the association are to form a bond of union between medical students whose principles and aim in life are "Christian," and to render whatever practical assistance is possible to all medical students, especially those who are entering upon their medical studies. The Reception Committee of the association will be at the Union Station to meet and welcome all incoming students and to give any information and assistance that may be required. A list of suitable boarding houses will be available for the convenience of those who require it.

**Degree of M.B.**

The Degree of M.B. is given to candidates who have matriculated and who have attended during four sessions of at least eight months each the course of instruction as required by this curriculum, and who have passed four examinations taken in the following order : the First at the end of the first session ; the Second, at the end of the second session ; the Third, at the end of the third session ; and the Final, at the end of the fourth session.

---

**Entrance.**

Candidates for a degree must pass the Matriculation examination, unless (1) they possess a degree in Arts not being an Honorary Degree, from any Dominion or British University ; or (2) have already matriculated in the Faculty of Arts or in the Faculty of Law in this University ; or (3) have been registered as Matriculates in the College of Physicians and Surgeons of Ontario.

Before presenting themselves for examination, candidates must produce satisfactory certificates of good conduct, and of having completed the sixteenth year of their age.

The ordinary Annual Matriculation examinations (both Pass and Honor) will commence in the beginning of July.

Supplemental examinations for Matriculation will be held in the latter part of September, at which those who were rejected at the July examinations, as well as new candidates, may offer themselves ; but no honors or scholarships will be awarded at such Supplemental examinations.

The fee for the Junior Matriculation examination is five dollars, that is, two dollars for Part I, and five dollars for Part II, when taken separately, or five dollars for both parts taken at the same time, and must be paid when the application for the examination is made, according to the regulations issued by the Education Department, under whose superintendence this examination is now conducted. The fee for registration of exemption from the Matriculation examination is five dollars.

Candidates may delay Matriculation until any time before the Second examination for the degree of M.B. ; but no candidate will be allowed to compete

for relative standing, prizes or scholarships, until he has passed the Matriculation examination.

No fee will be charged for transferring from the Faculty of Arts to that of Medicine.

For subjects of examination at Junior Matriculation, Pass and Honor, see p. 92.

## Regulations Relating to Undergraduates.

Undergraduates are required to attend lectures, and receive practical instruction during each of four years, at any of the schools of Medicine recognized for this purpose by the University.

The Senate may accept certificates of attendance at the lectures and in the laboratories of affiliated institutions other than Medical Schools.

They are required to present certificates of attendance on the various courses of lectures and practical instruction required for each examination.

The annual examinations are styled the First, Second, Third and Final examinations, and are to be passed at the end of the First, Second, Third and Fourth academic years respectively.

Undergraduates below the standing of the Fourth year, who have been rejected or who have been prevented from attending the annual examinations, by sickness, domestic affliction, or other causes beyond their control, may present themselves for examination at the Supplemental examinations in September. Candidates at any examination who have passed in the majority of the subjects required may present themselves at the Supplemental examinations next ensuing, in the subjects in which they failed, and upon passing at such examinations, shall be allowed their year. Undergraduates of the Fourth year who have failed in not more than three subjects may present themselves for examination in the said subjects at the Supplemental examinations in September. Candidates who failed to attend at the annual examinations, must prove to the satisfaction of the Senate before presenting themselves in September, the existence and sufficiency of the alleged cause of absence. Candidates who were rejected must pay a fee of ten dollars, and those who did not attend a fee also of ten dollars, before offering themselves for the Supplemental examination.

Graduates in Arts of the University may enter at the Second examination, but will be required to take such subjects of the First examination as they have not taken in their Arts course, though in these subjects they shall not be required to take an Honor standing. In the case of Undergraduates in Natural Sciences, certificates of attendance on the second course of Practical Anatomy and on the second course of fifty lectures on Anatomy, may be presented with the certificates of attendance on the lectures of the Third year. (For list of equivalent examinations, see page 77.)

The fee for each examination is ten dollars, payable when the candidate notifies the Registrar of his intention to present himself.

Notice will be given annually, in January, of the days on which the exami-

nations for the year will commence. Every undergraduate who proposes to present himself at an examination must send to the Registrar a statement (according to a printed form which will be furnished) of the course he is taking, whether he intends to compete for Honors, and such other particulars as the printed form may indicate, together with the original certificates referred to in this statement. The work of the students in the Hospital wards and Laboratories throughout the year will be considered in determining standing at the various University examinations.

Certificates are required for the different examinations as follows :

First examination—

Of having attended :

In Anatomy, a course of at least 50 lectures.

“ Physiology, a course of at least 50 lectures and demonstrations.

“ Inorganic Chemistry, a course of at least 50 lectures.

“ Physics, a course of at least 25 lectures and demonstrations.

“ Biology, “ “ 40 “

“ Practical Chemistry, a course of at least 50 hours.

“ “ Biology, “ “ “ 50 “

“ “ Anatomy, a course of instruction during six months.

Second examination—

Of having attended :

In Anatomy, a second course of at least 50 lectures.

“ Physiology, a second course of at least 50 lectures and 50 demonstrations.

“ Organic Chemistry, a course of at least 50 lectures.

“ Materia Medica and Elementary Therapeutics, a course of at least 50 lectures.

“ Embryology and Histology, a course of laboratory instruction of at least 50 hours.

Practical Chemistry, a second course of laboratory instruction of at least 50 hours.

“ Practical Anatomy, a second course of instruction during six months.

“ Practical Pharmacy, a course of instruction during three months.

The results of the laboratory work in Physiology in the Second Year are taken into consideration in making up the standing of all students in that subject in the Class List. For those students who obtain their instruction in Physiology elsewhere, a practical examination in Physiology is held during the annual examinations.

Third examination—

Of having attended :

In Medicine, a course of at least 50 lectures.

“ Clinical Medicine, a course of at least 50 lectures.

“ Surgery, a course of at least 50 lectures.

“ Clinical Surgery, a course of at least 50 lectures.

“ Pathology, a course of at least 50 lectures.

“ Practical Pathology, a course of instruction of at least 50 hours.

In Physiological Obstetrics, a course of at least 50 lectures.

“ Medical Jurisprudence and Toxicology, a course of at least 50 lectures.

“ Materia Medica and Therapeutics, a course of at least 50 lectures.

Final examination—

1. Of having attended :

In Medicine, a course of at least 50 lectures.

In Clinical Medicine, a course of at least 50 lectures.

“ Surgery, “ “ 50 “

“ Clinical Surgery, “ “ 50 “

“ Pathology, “ “ 50 “

“ Practical Pathology, a course of instruction of at least 50 hours.

“ Obstetrics, pathological, a course of at least 30 lectures.

“ Gynæcology, a course of at least 50 lectures.

“ Topographical Anatomy, a course of instruction of at least 50 hours.

“ Hygiene, a course of at least 25 lectures.

“ Medical Psychology, a course of at least 12 lectures.

2. Of having conducted at least six labours.

3. Of proficiency in vaccination.

4. Of attendance for eighteen months in the wards of a public hospital having not less than 100 beds.

5. Of attendance for twelve months on the out-practice of a hospital, or dispensary, or with a registered practitioner.

6. Of having attended twelve autopsies.

(NOTE.—In respect to 2 and 3, certificates will be received from any registered practitioner.

## Subjects of the Different Examinations.

### FIRST EXAMINATION.

1. Physics.

2. Chemistry (Inorganic).

3. Biology.

### SECOND EXAMINATION.

1. Anatomy.

2. Physiology.

3. Embryology and Histology.

4. Materia Medica and Elementary Therapeutics.

5. Chemistry (Organic and Physiological).

### THIRD EXAMINATION.

1. Clinical Medicine.

2. Clinical Surgery.

3. Physiological Obstetrics.

4. Pathology.

The results of this examination will be considered in determining standing at the Final examination.

## FINAL EXAMINATION.

1. Medicine and Clinical Medicine.
  2. Surgery and Clinical Surgery.
  3. Obstetrics.
  4. Pathology.
  5. Therapeutics.
  6. Gynæcology.
  7. Medical Jurisprudence and Toxicology.
  8. Hygiene.
  9. Medical Psychology.
  10. Topographical Anatomy.
- 

**Examinations for Honors.**

Candidates taking seventy-five per cent. of the aggregate number of marks in the Pass and Honor papers of the First or Second examination, or of one or more of the groups of subjects in the Final examination will be placed in the Honor list.

Additional papers on all Pass subjects of an examination may be set for the Honor candidates.

The subjects of the Final examination are grouped for Honors as follows :

- Group I. 1. Medicine and Clinical Medicine.  
2. Pathology.  
3. Therapeutics.
- “ II. 1. Surgery and Clinical Surgery.  
2. Pathology.  
3. Topographical Anatomy.
- “ III. 1. Obstetrics.  
2. Gynæcology.  
3. Pathology.
- “ IV. 1. Medical Jurisprudence and Toxicology.  
2. Hygiene.  
3. Medical Psychology.

Only those candidates will receive their Degree with Honors who have obtained Honors in the First, Second and Final examinations.

## Equivalent Examinations.

Courses of lectures and examinations in the Faculty of Arts are accepted in the place of courses of lectures and examinations in the Faculty of Medicine, according to the following scheme :—

### FACULTY OF ARTS.

### FACULTY OF MEDICINE.

1. Honor course and examination in Second Year } equivalent to { course and examination in First Year Biology, and  
Biology.
2. Honor course and examination in Second Year } equivalent to { course and examination in First Year Inorganic  
Chemistry, and Physics of the Honor course } Chemistry and Physics.  
in Natural Sciences.
3. Honor course and examination in Third Year } equivalent to { course and examination in Second Year Chemistry  
Chemistry. } (with the exception of Chemistry applied to  
Physiology).
4. Honor course and examination in Fourth Year } equivalent to { course and examination in Second Year Physiology  
Biology. } and Embryology and Histology.
5. Attendance at the Honor course and examination in the Fourth Year Physiological Chemistry, in the Faculty of Arts,  
is equivalent to attendance at the course of and examination in Chemistry applied to Physiology of the Second Year in the  
Faculty of Medicine.

N.B.—Candidates who desire to compete for scholarships and medals are required to submit to the annual examinations in all the subjects of each examination, though otherwise entitled to partial exemption according to the preceding scheme ; and candidates not competing for scholarships or medals, who are entitled to exemption according to the preceding scheme, will hold the same rank in Honors in these subjects as they obtained in the equivalent examinations in Arts.

Students of the Fourth Year Natural Science course in Arts, who propose to offer themselves for the Second examination in Medicine, may defer the examination in *Materia Medica* to the Final examination.

### Degree of M.D.

Bachelors of Medicine of at least one year's standing, may obtain the degree of M.D. on the fulfilment of either of the following conditions:—

1. Having composed a thesis of approved merit on some scientific subject in the Department of Medicine, or
2. Having passed an examination in Clinical Medicine and Surgery,\* together with an examination in the History of Medicine. The text book is Baas' Outlines of the History of Medicine with special reference to Medicine amongst the Greeks and Romans, to the Alexandrine School of Medicine, to Arabic Medicine, and to European Medicine in the Middle Ages.

\* The examination in these subjects is additional to that required for the degree of M.B.

---

### Admission ad Eundem Statum

Undergraduates of other Universities applying for admission *ad eundem statum* must present certificates of having passed the examinations in the various subjects of this curriculum preliminary to the examination for which they desire to present themselves.

---

### Admission ad Eundem Gradum.

A graduate of any of the Universities in Great Britain or Ireland, if his degree be not an honorary one, may be admitted to the like degree in the University of Toronto. He must send in his certificate to the Registrar at least two weeks before the first meeting of the session of the Senate at which his application is to be brought forward.

---

### Fees for Degrees.

For the degree of M.B. ....	Twenty dollars.
For the degree of M.D. ....	Twenty dollars.
For admission <i>ad eundem gradum</i> .....	Twenty dollars.

The fee for the Bachelor's Degree must be paid to the Bursar not later than April 15th.

### The George Brown Memorial Scholarship in Medical Science.

Dr. A. H. F. Barbour, of Edinburgh, having placed a sum of money at the disposal of the University of Toronto, for the purpose of founding a Scholarship in Medical Science in memory of the late Hon. George Brown, the following regulations have been adopted with regard thereto:—

This scholarship shall be called the George Brown Memorial Scholarship in Medical Science and shall be awarded annually at the convocation for conferring degrees in medicine to the Bachelor of Medicine who shall have dis-

tinguished himself most during his Undergraduate course in the subjects of Anatomy, Biology, Physiology and Pathology.

The comparative value of the several subjects is to be estimated according to the following schedule :—

1st year—Biology.....	200
2nd year—Anatomy.....	300
Physiology.....	300
Embryology and Histology .....	100
4th year—Pathology.....	300
Total .....	1200

The award shall be made by a committee composed of the Professors in these subjects, and of the Examiners for the time being therein, who shall report as to the successful candidates, after having given due attention to the results of the Annual examinations, and to the character of the work done by the candidates in the University laboratories.

The holder of the scholarship during the year of tenure is required to engage in original research in any one of the laboratories of the University, on some subject bearing on the advancement of medical science—the laboratory providing the material for the investigation.

The scholarship is to be paid in two portions, two-thirds at the time of award and one-third six months later, on the holder giving a satisfactory report (to whomsoever the University may appoint) of the work he has already done.

A report of the research, when completed, is to be given to the University.

The value of the scholarship consists in the proceeds of one thousand pounds sterling, invested at the rate of interest secured by the University for such benefactions.

The scholarship is tenable for one year.

## The Reeve Scholarship in Medical Science.

Dr. R. A. Reeve has donated a sum of money to the University of Toronto for the purpose of providing a Scholarship of the value of \$250, to be awarded annually for four years. The Scholarship is designed to foster the spirit of original research and to promote the utilizing of the laboratories of the University for that purpose.

The conditions on which the Scholarship will be awarded are as follows :—

The Scholarship will be awarded to the candidate who shall have gained the highest standing at the Final Examination in Medicine in the University of Toronto in the following subjects :—

Medicine and Clinical Medicine.  
Surgery and Clinical Surgery.  
Obstetrics.  
Pathology.

The candidate shall agree to devote himself during the next ensuing year, under the direction of the Medical Faculty, to research work in the Physiological or Pathological Laboratory of the University, and also to act as Laboratory Assistant.

A report of the research, when completed, is to be given to the University, whose property it shall become; and it shall be published at the discretion of the University Council.

The Scholarship is to be paid in two portions, one-half on October 1st and one-half on February 1st. A report of the work accomplished by the scholar must be furnished before the final payment. This report will be presented to the Faculty, and must be approved as representing satisfactory work done up to date before the final payment is made.

The winner of the George Brown Memorial Scholarship shall not be eligible.

The subjects shall be valued as follows:—

Medicine .....	200 marks.
Clinical Medicine .....	200 “
Surgery .....	200 “
Clinical Surgery .....	200 “
Obstetrics .....	200 “
Pathology .....	200 “
Total .....	1200 “

### The Starr Medals.

The late Richard Noble Starr, M.D., devised certain property for the encouragement of post-graduate study in Anatomy, Physiology and Pathology, and in fulfilment of this object one gold and two silver medals, called the “Starr Medals,” are awarded annually to three candidates for the degree of M.D., who have shown by the theses which they have presented for that degree, that they have successfully pursued such study in any one of these subjects. The theses for which these medals are given must attain a standard approved of by the Board of Examiners, and the relative value of the theses will determine the rank of the candidates for the medals.

### Degree of Bachelor of Applied Science.

Candidates who have fulfilled the requirements of the Fourth year in the School of Practical Science are eligible for the degree of Bachelor of Applied Science in the University of Toronto under the following conditions and regulations :—

1. Candidates for the said degree shall hold the diploma of the School of Practical Science in any one of the regular courses of the said school, or shall be of the standing of the Fourth year in the Honor department of Chemistry and Mineralogy in the University of Toronto.

2. They shall have fulfilled the conditions relating to the Fourth or post-graduate year in the School of Practical Science, and shall present certificates of having done so to the Registrar of the University. Honors may be granted with such certificates by the Faculty of the School.

3. Each candidate shall prepare a Thesis based on the results of his Fourth year work in the said School of Practical Science for the approval of the University examiners. This Thesis must be sent to the Registrar not later than the first day of May, and is to be accompanied by all necessary drawings, specifications, tables and estimates. To pass in it a candidate must obtain 50 per cent., and to take Honors 75 per cent., of the marks assigned.

4. Candidates will be required to select two sub-divisions in any one of the following groups, and to pass such written and oral examinations on the subjects selected as may be prescribed by the University examiners.

- |    |   |  |
|----|---|--|
| A. | { | Astronomy.                                 |
|    | { | Geodesy and Metrology.                     |
|    | { | Architecture.                              |
|    | { | Strength and Elasticity of Materials.      |
| B. | { | Hydraulics.                                |
|    | { | Thermodynamics and Theory of Heat Engines. |
|    | { | Electricity and Magnetism.                 |
|    | { | Industrial Chemistry.                      |
| C. | { | Sanitary and Forensic Chemistry.           |
|    | { | Inorganic and Organic Chemistry.           |
| D. | { | Mineralogy and Geology.                    |
|    | { | Metallurgy and Assaying.                   |

The sub-division "Inorganic and Organic Chemistry" will be obligatory on all candidates who select group C.

To pass in each subject 33 per cent., and to take honors 66 per cent., of the marks assigned will be required.

5. The degree with honors will be conferred on candidates who obtain three out of the four honors possible.

Viz.—Certificate with honors .....(cl. 2.)

Thesis with honors .....(cl. 3.)

Honors in each subject of examination .....(cl. 4.)

6. Candidates are required to send to the Registrar of the University at least three weeks before the commencement of the annual examination an application for examination according to a printed form to be obtained from the Registrar, and at the time of making such application a fee of ten dollars must be paid to the Bursar.

7. The examination for the degree shall be held in April.

8. The fee for the degree shall be ten dollars, and shall be paid to the Bursar not later than the first day of May.

9. The ordinary time for conferring the degree shall be at the University Commencement in June. The degree may be conferred at any meeting of the Senate.

10. The thesis, drawings, and other papers accompanying them, shall be the property of the University.

11. In case any change be made in the conditions referred to in the second clause, such change shall be submitted to the Senate, and shall have no force so far as the said clause is concerned, unless approved by resolution of the Senate.

## Degrees in Engineering.

By a Statute of the University of Toronto, passed in 1896, graduates of the School of Practical Science may be admitted to degrees in Engineering upon the following terms :—

I. That all previous Statutes of the University relating to degrees or diplomas in Engineering be repealed.

II. That the following degrees be hereby established, viz., Civil Engineer (C. E.), Mining Engineer (M. E.), Mechanical Engineer (M.E.), Electrical Engineer (E. E.).

III. That the following be the conditions and regulations governing the conferring of the said degrees :—

1. A candidate for one of the said degrees shall hold the Diploma of the School of Practical Science and the degree of Bachelor of Applied Science of the University of Toronto, except in the case provided for in clause 11 hereunder.

2. He shall have spent at least three years after receiving the degree of Bachelor of Applied Science in the actual practice of the branch of Engineering wherein he is a candidate for a degree.

3. Intervals of non-employment or of employment in other branches of Engineering shall not be included in the above three years. It shall not be necessary that the several periods requisite to make up the said three years be consecutive.

4. Satisfactory evidence shall be submitted to the University Examiners as to the nature and length of the candidate's professional experience for the purposes of clauses 2 and 3.

The Examiners shall satisfy themselves by oral or written examinations in regard to the candidate's experience and competence.

5. The candidate shall prepare an original Thesis on some engineering subject in the branch in which he wishes a degree; the said Thesis to be accompanied by all necessary descriptions, details, drawings, bills of quantities, specifications, and estimates.

The candidate may be required at the option of the Examiners to undergo an examination in the subject of this Thesis.

6. Notice in writing shall be sent to the Registrar not later than the first day of February, informing him of the degree to which the candidate wishes to proceed, and of the title of his proposed Thesis, for the approval of the Senate.

7. The evidence under clause 4, and the Thesis, with accompanying papers described in clause 5, shall be sent to the Registrar not later than the fifteenth day of April.

8. The candidate shall be required to present himself for examination in the month of May at such times as may be arranged by the Registrar.

9. The fee for any one of the said degrees shall be twenty dollars, and shall be paid to the Bursar not later than the first day of April.

10. The Thesis, drawings and other papers submitted under clause 7 shall become the property of the School of Practical Science.

11. Candidates who graduated from the School of Practical Science before June, 1895, shall not be required to hold the degree of Bachelor of Applied Science.

## CURRICULUM IN DENTISTRY.

---

### Degree of Doctor of Dental Surgery.

#### Matriculation.

Candidates for the degree of Doctor of Dental Surgery must pass the Matriculation examination hereinafter mentioned, unless

1. They possess a degree in Arts (not being an Honorary Degree), from some recognized University ; or
2. Have already matriculated in the Faculty of Arts in this or some other University in Canada ; or
3. Are Matriculants in the College of Physicians and Surgeons of Ontario ; or
4. Have passed the Form III or Form IV Departmental Non-professional examinations in which the Latin option has been taken, it being understood that the equivalent examinations under titles no longer in force will be accepted.

Candidates not possessing any of the above named qualifications, will be required to pass the examination prescribed for matriculants in the Faculty of Medicine in this University, provided always that candidates registered as matriculants of the Royal College of Dental Surgeons of Ontario, shall be admitted matriculants in the Department of Dentistry.

#### Undergraduates.

Undergraduates (candidates for the degree) residents of the Province of Ontario, must have complied with all the requirements prescribed from time to time by the Board of Directors of the Royal College of Dental Surgeons of Ontario, for admission to examination for a certificate of license to practise Dentistry in Ontario.

Undergraduates (candidates for the degree), not resident in Ontario, must :

1. Have devoted at least three and one-half calendar years (not being engaged in any other business) to the study of Dentistry.
2. Must have attended at least three full courses of lectures, embracing all the subjects of the curriculum, of not less than five months each (exclusive of the time occupied in examination), and including the daily clinic at a dental school recognized by this University ; the last of which must be at the School of Dentistry of the Royal College of Dental Surgeons of Ontario.
3. Must have spent that portion of time, when not in attendance at lectures and clinics at the School of Dentistry, as students in the office of an approved dentist.

### Examinations.

Candidates for the degree must pass two examinations, an intermediate and a final, an interval of not less than one year intervening between them. Until further provision be made, a certificate of having passed the intermediate examination of the Royal College of Dental Surgeons of Ontario will be accepted by this University.

Candidates for the final examination, which will be held at a time fixed by the Committee on Examinations, must present to the Registrar satisfactory certificates, covering all the requirements relating to undergraduates as given above, and of having passed the intermediate examination. The subjects for intermediate examination shall be :—

- (a) Comparative Dental Anatomy.
- (b) General Histology.
- (c) Bacteriology.
- (d) Theory of Operative Dentistry.
- (e) Theory of Dental Prosthetics.
- (f) Dental Technique.
- (g) Dental Materia Medica and Therapeutics.
- (h) Principles and Practice of Medicine and Surgery as applied in Dentistry.
- (i) Anatomy.
- (k) Physiology.
- (l) Chemistry.

The subjects for final examination shall be :

- (a) Theory and Practice of Operative Dentistry.
- (b) Theory and Practice of Dental Prosthetics.
- (c) Dental Pathology.
- (d) Dental Histology.
- (e) Principles and Practice of Medicine and Surgery as applied in Dentistry.
- (f) Dental Materia Medica and Therapeutics.
- (g) General Anatomy and special Anatomy of Head and Neck.
- (h) Physiology.
- (k) Chemistry.
- (l) Jurisprudence.

(These Examinations will be written.)

- (m) Orthodontia.
- (o) Practical Operative Dentistry.
- (p) Practical Prosthetic Dentistry.

Candidates shall be examined in practical work from time to time, during the session of the Royal College of Dental Surgeons, on completion of the required work in the Infirmary and Laboratory of the College.

Candidates may take the final examination in Anatomy, Chemistry and Orthodontia, at the close of the Second college year, on payment of a fee of three dollars.

Supplemental examinations will be conducted under the joint auspices of the University and the Royal College of Dental Surgeons in October.

No candidate shall be considered as having passed the examination who has not obtained 60 per cent. of the marks allotted; nor shall a candidate be considered as having passed in any subject who has not obtained at least 40 per cent. of the marks allotted to such subject.

### Equivalent Examinations.

Examinations in the Faculty of Arts in the Department of Natural Science, Division 1, are accepted in lieu of examinations for the degree of Doctor of Dental Surgery, as follows:—

(a) Physiology and Chemistry of the Second year for the Physiology and Chemistry of the intermediate examination.

(b) Histology of the Fourth year for the General Histology and Bacteriology of the intermediate examination.

(c) Chemistry of the Third year and Physiology of the Fourth year for Chemistry and Physiology of the final examination.

### Fees.

The fee for matriculation shall be five dollars.

The fee for registration of a certificate accepted in lieu of said examination shall be five dollars.

The fee for final examination shall be ten dollars.

The fee for supplemental examination in any one or more of the final subjects, which may be taken at the close of the second year, shall be five dollars.

The fee for supplemental examination in one or more of the other final subjects shall be ten dollars.

The fee for the degree of D.D.S. shall be fifteen dollars.

No fee shall be charged for transference from any Faculty of the University to the Department of Dentistry.

The fee for admission *ad eundem gradum* shall be twenty dollars.

## CURRICULUM IN PHARMACY.

---

### Degree of Bachelor of Pharmacy.

#### Matriculation.

Candidates for the degree of Bachelor of Pharmacy must either :

1. Possess a degree in Arts (not an Honorary degree) from some recognized University, or
2. Have already matriculated in the Faculty of Arts, or the Faculty of Law, or the Faculty of Medicine in this or some other University in Canada, or
3. Be matriculants in the College of Physicians and Surgeons of Ontario, or
4. Have passed the Primary or the Junior or Senior Leaving examinations of the Education Department of Ontario in which Latin has been taken.

Provided always that all candidates registered as apprentices of the Ontario College of Pharmacy, or who have received the diploma of the College of Pharmacy up to the first day of July, A.D. 1898, shall be admitted as matriculants in the Department of Pharmacy on payment of the registration fee of five dollars.

#### Regulations.

Undergraduates (candidates for the degree), resident in the Province of Ontario must have complied with all the requirements prescribed from time to time by the Council of the Ontario College of Pharmacy for admission to examination for a diploma licensing to practise Pharmacy in Ontario, and must have received from the Registrar of the Ontario College of Pharmacy a certificate of having passed the Final examination of that College.

Candidates for the degree, not resident in Ontario, must have devoted at least four years (not being engaged in any other business) to the study of Pharmacy, being apprenticed during that time to a regularly qualified Pharmaceutical Chemist ; must have attended the full courses of lectures, embracing all the subjects of the curriculum, the length of each course being not less than that required from time to time by the Council of the Ontario College of Pharmacy, and including practical work at some College of Pharmacy recognized by this University ; the last of which courses must be at the Ontario College of Pharmacy.

All candidates who have, prior to August 15th, 1892, received the diploma of the Ontario College of Pharmacy shall not be required to conform to the above, but shall be allowed their degree on passing the examination on the subjects hereinafter given.

### Examinations.

Candidates for the degree must pass an examination to be held in the month of May of each year—hour and date of commencing to be hereafter given—must present to the Registrar satisfactory certificates covering all the requirements relating to undergraduates as given above, and of having passed the final examination of the Ontario College of Pharmacy.

The subjects of the examination shall be as follows :

1. Botany and Microscopy.
2. Theory and Practice of Chemistry and Toxicology.
3. Materia Medica, including Posology and Pharmacognosy.
4. Theory and Practice of Pharmacy, including Interpretation of Prescriptions and Dispensing.

These examinations shall be partly written, partly oral, and partly practical.

No candidate shall be considered as having passed the examination who has not obtained fifty per cent. of the marks allotted ; nor shall a candidate be considered as having passed in any subject who has not obtained at least forty per cent. of the marks allotted to such subject.

### Fees.

For matriculation or registration of matriculation .....	\$ 5 00
For annual examination (each) .....	10 00
For each practical examination .....	0 50
For the degree Phm.B. ....	10 00

No fee shall be charged for transference from any faculty of this University to the Department of Pharmacy.

## CURRICULUM IN AGRICULTURE.

---

The course for the degree of Bachelor of the Science of Agriculture extends over a period of four years.

The work of the first two years is embraced in the course prescribed for the Associate Diploma of the Ontario Agricultural College (see College circular); and the work outlined below proceeds from the Associate standing and extends over a period of two years.

### Admission to Third Year Standing.

An Associate of the Ontario Agricultural College is admitted to Third year standing and allowed to proceed with the work of the Third and Fourth years, provided—

1. He has taken rank in his Associate course satisfactory to the College Staff.

2. He passes examinations on the following subjects :

ALGEBRA : Through quadratics.

EUCLID : Books 1, 2, and 3.

MENSURATION.

A graduate or undergraduate in Arts or Science of any reputable University, having had the necessary training in farm work, may proceed to the degree, upon presenting satisfactory certificates of standing and passing examinations on those Associate subjects not covered by his certificates.

The work done previously by such a candidate will be accepted *pro tanto* for any part of the work prescribed for the degree.

### Examinations and Degrees.

All Third year examinations are conducted by the College; also the Fourth year examinations in French and German. The Final, or Fourth year, examinations in English and on all the Special, or Honor, Courses are conducted by the University of Toronto.

The B. S. A. degree is granted by the University of Toronto.

### General Course.

All candidates for the degree are required to take this course.

With the exception of English, French and German, the subjects in the General Course are concluded in the Third year. The work in the languages extends through the two years.

### **Agriculture.**

General Field Agriculture. Text-book—Fertility of the Land (Roberts).

### **Chemistry.**

1. Inorganic. 2. Organic. 3. Agricultural, and laboratory work, as outlined in sections 1 (*b*), 3, 4 (*a*) in the Chemistry division of the option of Chemistry and Physics.

### **Geology.**

1. LECTURES : A general review of the subject, referring particularly to the geology of Canada ; the economic products ; the formation of soils ; and the action of various dynamic agencies.

2. MUSEUM STUDIES : Identification of the common minerals, rocks, and fossils.

### **Botany.**

1. SYSTEMATIC : Lectures and laboratory work on the chief orders of flowering plants, including grasses ; collecting and mounting 10 species of grasses, 50 species of weeds, and 25 species of weed seeds.

2. PHYSIOLOGICAL : A study of the vital activities of the plant—absorption, circulation, assimilation, metabolism, and transpiration ; plants in relation to their surroundings.

### **Hygiene.**

PERSONAL HYGIENE : Age, sex, temperament, habits, and hereditary tendencies.

FOODS AND DRINKS : Preservation of food, adulterations, and diseases produced by bad food.

Epidemic diseases and diseases of animals in relation to the health of man.

DISINFECTANTS : Various kinds and methods of disinfection.

HEATING AND LIGHTING : Materials and methods ; effects on the air.

VENTILATION : Principles of.

WATER SUPPLY : Sources, collection, distribution, storage, and purification.

DRAINAGE AND SEWERAGE : Dry earth and conservancy systems.

### **Optics.**

Lectures on light, including a study of the polariscope, microscope, telescope, and sextant.

### **English Literature and Composition.**

#### **THIRD YEAR.**

1. Writing of Essays on subjects assigned.

2. SHAKESPEARE : Macbeth.

3. MILTON : L'Allegro and Penseroso.

4. Selections from Eighteenth Century Poets (Ward), Vol. 3, as follows :

GREY : *Elegy written in a Country Churchyard.*

GOLDSMITH : *The Deserted Village.*

BURNS : *To a Mouse, The Cotter's Saturday Night, A Bard's Epitaph, To Mary in Heaven, and A Man's a Man for a' That.*

#### FOURTH YEAR.

1. MILTON : *Lycidas.*

2. Nineteenth Century Poets :

WORDSWORTH : *Tintern Abbey, The Solitary Reaper, and Intimations of Immortality.*

BYRON : *The Ocean, The Isles of Greece, and She Walks in Beauty.*

SHELLEY : *Adonais.*

BROWNING : *Prospice, and the Lost Leader.*

TENNISON : *Locksley Hall, The Passing of Arthur, and In Memoriam.*

3. *The History of English Literature (Pancoast).*

#### French and German.

Grammar, prescribed texts, and easy translation at sight.

### Special Courses.

Every candidate for the degree is required to take one of the following Special Courses, in addition to the General Course outlined above :—

#### I.—Agriculture.

Students intending to take this course must present a certificate of having spent two years at practical work with a good farmer, and submit to a practical test at the discretion of the Professor of Agriculture.

##### MAJORS :

1. GENERAL FIELD AGRICULTURE : Text-books—*The Fertility of the Land (Roberts) and Agriculture (Storer).*

2. Cattle, Sheep, Swine, Horses—Characteristics of the principal breeds ; lectures and practical work in judging.

3. POULTRY : Feeding and management.

4. Principles and Practice of Stock-breeding. Text-book—*Stock-breeding (Miles).*

5. Feeding and Management of Live Stock. Text-book—*Feeds and Feeding (Henry).*

##### MINORS :

1. Botany, sections 1 and 5 (a) and (c) in the option of Biology.

2. Entomology, sections 1 and 2 in the option of Biology.

3. Bacteriology, sections 1, 2, 3, and 8 in the option of Bacteriology.

4. Forestry, section 5 in the option of Horticulture.

5. Chemistry, sections 3, 6, and 7 in the option of Chemistry and Physics.

6. Physics, sections 2, 3, 4, 5, and 7 in the option of Chemistry and Physics.

## II.—Dairying.

### MAJORS :

1. DAIRY PRACTICE : A factory course previous to entering on the senior year ; a full Dairy School course during the senior year ; additional lectures and practical work in dairying.

2. Bacteriology, sections 1, 2, 3, and 7 in the option of Bacteriology.

### MINORS :

1. Live stock, sections 2 (omitting sheep and horses), 3, 4, and 5 in the option of Agriculture.

2. Chemistry, sections 3, 6, and 8 in the option of Chemistry and Physics.

3. Physics, sections 2, 3, 4, 6, 7 and 8 in the option of Chemistry and Physics.

## III.—Horticulture.

Students intending to take this course must present a certificate of having spent at least one year at practical work with a good fruit grower, market gardener, or florist, and a recommendation from the College Horticulturist as to ability and proficiency in the practice of horticulture during the first two years of his College course.

### MAJORS :

1. FRUIT GROWING : Theory and practice in connection with the growing and management of Canadian fruits.

2. VEGETABLE GARDENING : Theory and practice in the production and handling of vegetable crops.

3. FLORICULTURE : Care and management of plants in flower beds and borders, and in the window garden.

4. LANDSCAPE GARDENING : A study of the principles and methods involved in beautifying private and public grounds.

5. FORESTRY : The importance of forests, the forestry question in Ontario, methods of re-forestation, and the management of timber lands.

TEXT-BOOKS : The Principles of Fruit Growing (Bailey) ; The Vegetable Garden (Green) ; Flowers, and How to Grow Them (Rexford).

### MINORS :

1. Botany, sections 1, 2, 3, 4, 5 (a) and (b) in the option of Biology.

2. Entomology, sections 1 and 2 in the option of Biology.

3. Chemistry, sections 3, 6, and 7 in the option of Chemistry and Physics.

4. Physics, sections 2, 4, 5, and 7 in the option of Chemistry and Physics.

## IV.—Biology.

### Botany.

### MAJORS :

1. SYSTEMATIC : Lectures and laboratory work on the chief orders of flowering plants, including grasses. A mounted collection of 100 plants, and 25 specimens of weed seeds.

2. **STRUCTURAL** : Lectures and laboratory work on the organs of the plant.
3. **PHYSIOLOGICAL** : A laboratory course in which each student determines for himself the life processes of plants.
4. **HISTOLOGICAL** : Mounting, examining and drawing vegetable cells and tissues.
5. **FUNGI AND PLANT PATHOLOGY** : (a) A laboratory course with occasional lectures in which are studied the injurious fungi affecting orchard, garden, greenhouse, and farm crops ; (b) a collection of 25 injurious fungi ; (c) occasional excursions for collecting field fungi.
6. **CRYPTOGAMIC** : A laboratory study of the chief types covering the Thallophytes, Bryophytes, and Pteridophytes.

### **Entomology.**

1. **SYSTEMATIC** : A laboratory course in the identification and classification of insects. Students to make their own collections.
2. **ECONOMIC** : A special study of injurious and beneficial insects. The life-histories of many species to be worked out in the insectary.

### **Zoology.**

1. **INVERTEBRATE** : A laboratory course with lectures on the chief types.
  2. **VERTEBRATE** : A laboratory course with lectures on the chief types.
  3. **HISTOLOGY—METHODS** : Inbedding, cutting, mounting, and study of specimens.
  4. **PHYSIOLOGY** : A lecture course in connection with the dissection of the types.
- TEXT-BOOKS** : Gray's Manual of Botany ; McDougall's Experimental Physiology ; Vines' Student's Text-book ; Huxley and Martin's Biology ; Parker's Zootomy ; and Comstock's Manual for the Study of Insects.

#### **MINORS :**

1. Bacteriology, sections 1, 2, and 3 in the option of Bacteriology.
2. Chemistry, section 7 in the option of Chemistry and Physics.

## **V.—Bacteriology.**

#### **MAJORS :**

1. **MICROSCOPICAL METHODS** : Examination of living bacteria, aniline dyes, special staining methods, preparation of morbid specimens, embedding, microtomes, and section cutting.
2. **CULTIVATION METHODS** : Principles of sterilization, apparatus, preparation of culture media, and plate and test tube cultivations.
3. **BIOLOGY OF BACTERIA** : Chemical composition, nutrition, form, classification, circumstances affecting growth, products of growth, chromogenic, zymogenic, septic, and pathogenic bacteria. Toxines and antitoxines, immunity, attenuation of virus, protective inoculation, serum, and therapy.
4. **INFECTIVE DISEASES** : Disinfectants and antiseptics ; anthrax—sympto-

matic anthrax, and malignant oedema ; tuberculosis ; glanders ; typhoid fever ; swine fever ; cholera ; hog cholera ; chicken cholera ; tetanus ; rabies ; diphtheria ; cow pox ; smallpox ; actinomycosis ; influenza ; plague ; etc.

5. Examination of air, water, soil, and foods.

6. THE BIOLOGY OF YEASTS : Organized and unorganized ferments ; high and low fermentation ; impure yeasts ; diseases of wine and beer ; nitrification ; technical mycology.

7. DAIRY BACTERIOLOGY : The relation of bacteria to dairying ; the fermentations of milk ; pure culture system in butter-making ; pasteurization and sterilization ; the bacteriological analysis of dairy products.

8. AGRICULTURAL BACTERIOLOGY : The relation of bacteria to agriculture.

#### MINORS :

1. Zoology, sections 1, 2, 3, and 4 in the option of Biology.

2. Botany, section 6 in the option of Biology.

## VI.—Chemistry and Physics.

#### MAJOR :

1. INORGANIC CHEMISTRY : Course of lectures, with experiments.

2. ORGANIC CHEMISTRY : (a) Preparation of organic compounds ; (b) lectures

3. AGRICULTURAL CHEMISTRY : The constituents of plants ; germination ; plant development ; functions of leaves and roots ; composition of the atmosphere and the soil ; soils in relation to cultivation and plant growth ; nitrification ; farm-yard and artificial manures ; application of manures ; manurial constituents in crops ; composition of cereals, legumes, and roots ; rotations ; crop residues ; composition of the animal body and fodders ; resorption ; circulation ; respiration ; digestibility and nutritive value of fodders ; formation of flesh and fat ; feeding for work, maintenance, fat, milk, and growth ; feeding standards ; rations ; albuminoid or nutritive ratio ; recent investigations.

4. LABORATORY WORK :

(a) Qualitative analysis.

(b) Gravimetric analysis.

(c) Volumetric analysis.

(d) Vapor density and boiling point determinations.

(e) Method of organic analysis.

5. Polariscopes and sugar determinations.

6. Analysis of water, soils, manures, fodders, dairy products, etc.

7. CHEMISTRY OF INSECTICIDES AND FUNGICIDES : Preparation of white arsenic, arsenites, arsenates, ammonia, copper sulphate, oxide and hydride of lime, copper carbonate, sodium carbonate, potassium sulphide, and acetate of copper ; physical and chemical properties of the substances used in the preparation of insecticides and fungicides ; the preparation of insecticides and fungicides and the examination of their physical and chemical properties.

8. DAIRY CHEMISTRY : Composition of milk, butter, cheese, and whey ; determinations of specific gravity of milk ; determinations of total solids, moisture, ash, fat, casein, albumen, and sugar in milk, butter, cheese, and whey ;

milk adulterants ; determination of the melting point of butter ; distinction between butter and oleomargarine ; recent investigations and results.

TEXT-BOOKS : Agricultural Chemistry (Warington) ; Inorganic Chemistry (Remsen's Advanced Course) ; Organic Chemistry (Remsen) ; Organic Preparations (Gatterman) ; Testing Milk and its Products (Farrington and Woll).

Specialists in Chemistry and Physics must take sections 1, 2, 3, 4, 5, and 6.

### Physics.

1. HEAT, LIGHT, AND ELECTRICITY : Practical work in electricity and electrical machinery.

2. THERMOMETRY AND CALORIMETRY : Latent heat of fusion and evaporation ; specific heat of solids and liquids ; vapor pressure ; etc.

3. Physics of heat engines, with special reference to the theory and working of the steam engine.

4. METEOROLOGY : Taking and recording observations with the instruments ; laboratory determinations of meteorological conditions.

5. SOIL AND PLANT PHYSICS : Capillarity, osmosis, diffusion, surface tension, and the analysis and examination of typical soils.

6. MECHANICAL REFRIGERATION : Principles and methods.

7. Ventilation and heating.

8. DAIRY PHYSICS : The physical properties of milk and its products.

TEXT-BOOKS : Heat (Glazebrook) ; Elementary Meteorology (Davis).

*Notes regarding Special courses. In all Special courses :—*

1. A record of each student's practical work throughout the course will be kept.

2. A record of each student's reading, as tested from time to time, will also be kept.

3. Practical, as well as written, examinations will be held whenever such examinations are practicable.

4. Each student is required to prepare a Thesis on some branch or department of the work in his special course. The subject is to be chosen by the end of the Third year, and submitted for the approval of the Staff. The Thesis must be based chiefly on original investigation, and the work be done in the Fourth year. It must be typewritten on letter-size paper, and handed to the committee of adjudication on or before the first of April.

## CURRICULUM IN MUSIC.

---

Degree of Bachelor of Music.

The Degree of Bachelor of Music (Mus. Bac.) will be conferred by the University of Toronto upon students of Music, on compliance with the requirements of the curriculum in Music which may from time to time be prescribed by the Senate.

---

Matriculation.

The candidate for the Degree of Bachelor of Music must pass the following examination of the University for a certificate of proficiency in general education :—

## I. ENGLISH.

ENGLISH GRAMMAR : The main facts in the development of the language. Etymology and Syntax, including the logical structure of the sentence and the inflection, classification and elementary analysis of words.

COMPOSITION : An essay to which special importance will be attached, on one of several themes set by the examiners. In order to pass in this subject, legible writing, correct spelling and punctuation, and proper construction of sentences are indispensable. The candidate should also give attention to the structure of the whole essay, the effective ordering of the thought, and the accurate employment of a good English vocabulary. About two pages of foolscap is suggested as the proper length for the essay ; but quality, not quantity, will be mainly regarded.

LITERATURE : Such questions only shall be set as may serve to test the candidate's familiarity with, and intelligent and appreciative comprehension of, the prescribed texts. The candidate will be expected to have memorized some of the finest passages. In addition to the questions on the prescribed selections, others shall be set on a "sight passage" to test the candidate's ability to interpret literature for himself.

## 1902.

SCOTT : Lay of the Last Minstrel ; SHAKESPEARE, Julius Cæsar.

## 1903.

COLERIDGE : The Ancient Mariner.

WORDSWORTH : Michael, Influence of Natural Objects, Nutting, Expostulation and Reply, The Tables Turned, The Solitary Reaper, Ode to Duty, Elegiac Stanzas, To Rev. Dr. Wordsworth, "She was a Phantom of Delight," To the

Cuckoo, The Green Linnet, "Bright flower whose home," To a Skylark (Ethereal minstrel), Reverie of Poor Susan, To My Sister, "Three years she grew," September 1819, Upon the Same Occasion.

The following twelve sonnets: "Two voices are there," "Scorn not the Sonnet," "A flock of sheep that leisurely," "Earth hath not anything," "It is not to be thought of," "Fair Star of Evening," "O friend! I know not," "Milton! thou should'st," "When I have borne in memory," "Brook! whose society," "Tax not the saint," "They dreamt not of a perishable home."

SHAKESPEARE: Merchant of Venice.

### 1904.

TENNYSON: Lady of Shalott, Lotur Eaters, Oenone, The Epic and Morte d'Arthur, Ulysses, "You ask me why," "Of old sat Freedom," "Love thou thy land," St. Agnes' Eve, "Break, break, break," Sir Galahad, "Tears, idle tears," and the six interlude songs from The Princess, The Brook, Ode on the Duke of Wellington, Charge of the Light Brigade.

## CURRICULUM FOR DIPLOMA IN GYMNASTICS AND PHYSICAL DRILL.

A diploma will be granted to students of the University who shall have completed to the satisfaction of the Senate the following courses for teachers of Gymnastics and Physical Drill :—

- I. A theoretical course embracing anthropological measurements and the general methods adopted to improve the physical condition of the student.
- II. A practical course embracing the following exercises :—

### FOR MEN.

1. (a) Horizontal Bar.  
(b) Parallel Bars.  
(c) Vaulting Horse.
2. Rifle exercise and military drill.
3. Club-swinging and dumb-bells.
4. Fencing, single-stick and quarter-staff.
5. Boxing and wrestling.

Of these, 1 and 2 to be compulsory, together with any one of 3, 4 or 5.

### FOR WOMEN.

1. Exercises for the chest and upper extremities.  
(a) Dumb-bells and bar-bells.  
(b) Club-swinging and basket-ball.

### **St. Michael's College.**

St. Michael's College was established in 1852 by the Basilian Fathers from Annonay, France, at the request and under the patronage of the Most Rev. Dr. De Charbonnel, then Bishop of Toronto. For four years the College occupied the wing of St. Michael's Palace, on Church street. In 1856, a more suitable edifice was erected on the present site, part of which was the gift of the late Hon. John Elmsley. Since that time the building has been more than doubled, and the chapel enlarged and improved.

The object of the institution is to impart a thorough Catholic training, moral and intellectual, so as to fit young men for any position in life which they may wish to occupy.

The studies advancing steadily with the educational progress of the country, it was deemed advantageous for those studying for the liberal professions to have the College affiliated with the Provincial University. In 1881 this affiliation was effected upon a basis similar to that of several of the Catholic Colleges of England and Ireland with the University of London.

The course of study comprises, besides an Elementary department, three others, viz., Commercial, Classical, and Philosophical. In the latter department lectures are delivered in the subjects of the department of Philosophy as prescribed by the curriculum of the University of Toronto.

Special lectures are also delivered upon the History required in the curriculum of the University.

### Wycliffe College.

Wycliffe College was founded in 1877, being known at first as the Protestant Episcopal Divinity School. It was incorporated in 1879. In 1885 it was affiliated with the University of Toronto, and federated in 1890 upon the proclamation of the Federation Act.

Its object is the Theological training of candidates for the ministry of the Church of England in Canada and for the foreign Missionary field. Its work and methods are based upon the position of "distinctive Evangelical teaching" in Theology.

In the University and University College its students receive instruction in the prescribed subjects of the Arts Course, as preliminary to the special study of Theology. The Theological Course extends over a period of three years, and leads up to the degree of B.D.

The first two years of the Theological Course may, however, be taken concurrently with the Arts work of the University by means of the Theological options, and by following the schedule laid down in the calendar of the College.

The first building of the College was erected in 1882. The work is now carried on in the building completed in 1891, contiguous to the Queen's Park, and in proximity to the main building of the University of Toronto, with rooms for forty-four students, lecture rooms, library, chapel, dining hall, etc. Students have access to the University library, gymnasium, etc.

## Knox College.

Knox College was established at Toronto in 1844, as a theological seminary in connection with the Synod of the Presbyterian Church in Canada (Free Church), which had been organized in the same year. In 1858 it was incorporated by Act of Parliament. In 1861, in consequence of the union of the Synod of the Free Church and that of the United Presbyterian Church, as the Synod of the Canada Presbyterian Church, Knox College and the Theological Institute of the United Presbyterian Synod were united.

After several changes of location the present buildings on Spadina Avenue were erected in 1875. Knox College was affiliated with the University of Toronto in 1885, and federated in 1890, upon the proclamation of the Federation Act. In the University and University College such of its students as are not proceeding to a degree receive instruction during three sessions in English, Latin, Greek, History, Logic, Chemistry, Biology, Physics, Mental and Moral Philosophy and Hebrew. Most of the entrants in Theology, however, complete a regular University course. The course in Theology extends over three years. A number of scholarships and prizes are offered for competition in each year. Theological options may be taken by students of the University in their Third and Fourth years.

### THEOLOGICAL FACULTY.

The Faculty of Theology in Victoria University was established in 1871 for the purpose of training candidates for the ministry of the Methodist Church. Its classes and degrees have, however, always been open to candidates for the ministry in any Church.

Instruction is provided in the various courses of study leading up to ordination in the Methodist Church, viz., the Ordinary Course, the Course for Graduates in Arts, and the B.D. Course. The first-named course pre-supposes matriculation in Arts, the last two pre-suppose graduation in Arts.

Undergraduates in Arts, whether candidates for the ministry or not, have the privilege of taking certain subjects in Theology as theological options in their third and fourth years.

For further information as to courses of study, fees, honors, prizes, scholarships and regulations, see the Calendar of Victoria University, or apply to the Dean of the Faculty, Rev. Professor F. H. Wallace, M.A., D.D.

### **The School of Practical Science.**

The Legislative Assembly during the Session of 1877 gave its sanction to the establishment of a School of Practical Science on the basis proposed in the memorandum of the Minister of Education confirmed by the Lieutenant-Governor-in-Council on the 3rd day of February, 1877.

By the scheme thus approved of, the Government effected an arrangement with the Council of University College whereby the students of the School of Practical Science enjoyed full advantage of the instruction given by its professors and lecturers in all the departments of science which were embraced in the work of the School.

This arrangement was brought to an end in 1899 by the transfer of the departments in science above referred to from University College to the University of Toronto under the operation of the University Federation Act.

In order that the students of the School might continue to enjoy the advantage of instruction in the above departments, the Senate of the University of Toronto passed a Statute in October, 1889, affiliating the School to the University, which Statute was confirmed by the Lieutenant-Governor in Council on the 30th day of October, 1889.

By an Order in Council, approved by the Lieutenant-Governor on the 6th day of November, 1889, a Principal was appointed, and the management of the School was entrusted to a council composed of the Principal as chairman, and the Professors, Lecturers and Demonstrators appointed on the Teaching Faculty of the School.

There are five regular Departments of Instruction, in each of which Diplomas are granted, viz. ;—

1. Civil Engineering (including Sanitary Engineering).
2. Mining Engineering.
2. Mechanical and Electrical Engineering.

4. Architecture.

5. Analytical and Applied Chemistry.

The instruction given in each of these Departments is designed to give the student a thorough knowledge of the scientific principles underlying the practice in the several professions, and also such a training as may make him immediately useful when he commences active professional work.

**Diploma.**

The regular course in each department is of three years' duration, and leads to the Diploma of the School. The instruction is given partly in the lecture room and partly in the drafting rooms, laboratories and field. A certain amount of work is laid out for the summer vacation. The course of study in each department is general, and beyond the selection of his department the student has no opportunity to specialize.

**Degree of B.A. Sc.**

After the general course is finished the Diploma of the School is granted, and the student is at liberty either to enter the active life of his profession, or to spend another year in special work. This year is called the fourth or post-graduate year. Graduates electing to proceed with their studies are allowed to select two subjects from an approved list, and are required to confine their whole attention to these subjects during the fourth year. The subjects on this list are such as require a large amount of time to be devoted to laboratory and other practical work. The advanced theoretical instruction is given either at the beginning or end of the working day, in order not to break up the time allotted to practical work. During this year the student is required to prepare a thesis on some subject connected with his work. The practical examinations are held by the School, while the written examinations and the examination of the theses are held by the University. After complying with all requirements, the candidate receives from the University the degree of Bachelor of Applied Science (B.A. Sc.).

### Professional Degrees.

Bachelors of Applied Science may, after three years spent in professional work, present themselves for the degrees of Civil Engineer (C.E.), Mining Engineer (M.E.), Mechanical Engineer (M.E.), or Electrical Engineer (E.E.), as the case may be, subject to the rules and regulations established by the University.

### Faculty of Applied Science and Engineering.

By a Statute of the Senate of the University of Toronto, passed on December 14th, 1900, the teaching staff and examiners of the School of Practical Science, together with the examiners for the degree of B.A.Sc. and professional degrees in Engineering, were constituted *ex officio* the Faculty of Applied Science and Engineering of the University of Toronto.

The Statute is as follows :—

By the Senate of the University of Toronto,

*Be it enacted :*

1. That the Faculty of Applied Science and Engineering be hereby established.

2. That the courses and examinations of the School of Practical Science leading to the Diploma of the School and to the special certificates of the school, together with the courses and examinations leading to the degrees of Bachelor of Applied Science (B.A.Sc.), Civil Engineer (C.E.), Mining Engineer (M.E.), Mechanical Engineer (M.E.), and Electrical Engineer (E.E.), be the curriculum and examinations of the University in the said faculty.

3. That the members of the teaching staff of the School of Practical Science be the members of the teaching staff of the University in the said faculty.

4. That the examiners of the School of Practical Science, whether members of the teaching staff of the said school or otherwise, together with the examiners for the degrees named in clause 2, be the examiners of the University in the said faculty.

5. That the regular students of the School of Practical Science in the first, second, third and fourth years respectively be the undergraduates of the University in the corresponding years in the said faculty.

6. That the non-regular, occasional and special students of the School of Practical Science be the non-regular, occasional and special students of the University in the said faculty.

7. That the provisions of this Statute apply, as far as may be, to all graduates of the School of Practical Science and to all graduates of the University in Applied Science and Engineering.

8. That no liability shall be incurred by the University of Toronto for the support or maintenance of the faculty hereby established.

### Trinity Medical College.

This Medical College was organized in 1850, and at first formed the Medical Faculty of the University of Trinity College. In 1856 it ceased to be a Faculty of that University. It has been in affiliation with the University of Toronto since 1877, in which year it was incorporated by a special Act of the Legislature, as an independent medical teaching body. In 1887 its name became what it now is—by an amendment to the Act of Incorporation—creating it “a college” and making other desirable changes in the Act. Its curriculum embraces all the subjects required by the College of Physicians and Surgeons of Ontario.

College Building, 93 College Street, Toronto.

The Royal College of Dental Surgeons was affiliated with the University of Toronto in 1888, and shortly thereafter an examination for the degree of Doctor of Dental Surgery was instituted in the University. For Curriculum, see p. 237.

## Ontario College of Pharmacy.

The Council of the College of Pharmacy, the bi-ennially elected governing body of the practising pharmacists of the Province of Ontario, began in 1882 to give instruction in the various subjects necessary for license for druggists. The College building, situated in St. James' Square, was erected in 1886, and the Faculty re-organized and extensive additions made to the buildings in 1891. In the same year affiliation was entered into with the University of Toronto. For Curriculum, see p. 240. For details as to laboratory and other courses, preliminary qualifications, etc., see Annual Calendar of the College, which may be had by addressing Isaac T. Lewis, Registrar-Treasurer, Ontario College of Pharmacy, Toronto, Ontario.

### Ontario Agricultural College.

The institution known as the "Ontario Agricultural College and Experimental Farm" is situated about a mile to the south of the city of Guelph, in the centre of an extensive agricultural and noted stock-raising district, readily accessible by rail from all parts of the province. The farm consists of 550 acres, about 400 of which are cleared. It is composed of almost every variety of soil, and hence is well suited for the purpose for which it was selected.

The instruction given at the institution is embraced under two heads, a course of study and a course of apprenticeship. The latter is required of all First and Second year students in the autumn, winter and spring terms, during which they are employed in rotation in each of six departments of practical farm labour. The regular course of study is for two years, at the end of which time an Associate Diploma is granted by the College.

Students who reach a certain standing in the theoretical and practical work of the Associate Course may remain two years longer, with a view to obtaining the degree of Bachelor of the Science of Agriculture (B.S.A.) in the University of Toronto, with which Institution the Agricultural College has been affiliated for advanced examinations and degrees since 1888. For Curriculum, see page 242.

## Toronto Conservatory of Music.

---

EDWARD FISHER, MUS. DOC., *Musical Director.*

---

The Toronto Conservatory of Music, incorporated in 1886, is affiliated with the University of Toronto, and its buildings are situated at the corner of College Street and University Avenue.

Each season of forty weeks opens on September 1st, and closes with the following June. The courses of study for graduation extend over a period of three or more years, according to the proficiency of the student. Students are prepared for University Examinations leading to degrees in Music. According to the terms of affiliation existing between the Conservatory of Music and the University of Toronto, students who have passed the First and Second Examinations in Theory will be exempted from the First University Examination; and students holding the Theory Diploma of the Conservatory will be exempted from the First and Second University Examinations in Music. For particulars of these Examinations see the Curriculum, page 249, of this Calendar.

## Ontario Veterinary College.

This institution was established in 1862, for the purpose of providing facilities for instructing in Veterinary Science. After various changes in buildings and equipment, necessitated by the increasing number of students, the present College building, situated at 40 Temperance Street, was erected in 1889. Affiliation with the University of Toronto took place in 1897. A curriculum of study leading to a degree is under consideration by the Senate.

## HISTORICAL SKETCH.

The movement which ended in the establishment of the University of Toronto as the centre of the educational system of the Province of Ontario originated with General Simcoe, the First Governor of Upper Canada, who repeatedly expressed his conviction, both before his departure from England and also during his term of office (1792-1796), that the best interests alike of the Government and of the inhabitants demanded the establishment of a University in Upper Canada. It was not, however, during his administration that the project assumed a definite form.

In 1797 the Legislative Council and House of Assembly in a joint address to King George III. asked "that his Majesty would be graciously pleased to direct his Government in the Province to appropriate a certain portion of the waste lands of the Crown as a fund for the establishment and support of a respectable Grammar School, in each district thereof; and also a College or University for the instruction of youth in the different branches of liberal knowledge." To this address a favorable answer was transmitted, and the acting Lieutenant-Governor, the Hon. Peter Russell, was directed to determine the manner and character of the appropriation. In accordance with this request the Executive Council of Upper Canada reported on the 1st December, 1798, that an appropriation of 500,000 acres would be sufficient for the support and maintenance of four Grammar Schools and a University. For the foundation of the latter nothing was done until 1827, when a Royal Charter was granted for the establishment at or near York, as Toronto was then called, of a College "with the style and privileges of a University," to be called "King's College," having for its endowment that portion of the grant of "waste lands" originally provided for the University in the report above referred to. These lands were in 1828 exchanged for 225,944 acres of Crown Reserves.

Owing not only to the character of the endowment, which required time for its realization in a form yielding an annual revenue, but also owing to the terms of the charter, which required all the members of the Faculties to be adherents of one particular religious denomination, the opening of the College was delayed for fourteen years. In consequence of public representations on the sectarian character of the College, all religious tests were abolished by an amended charter which passed the two Houses of the Provincial Legislature and received the Royal Assent in 1837. In 1842 the affairs of the University had assumed such a condition as to render its organization possible, and Faculties of Arts, Medicine, Law, and Divinity were established. In that year the erection of the College Building was begun on the eastern portion of the site of the present Legislative Buildings. In 1843 the first matriculation of students took place, and inaugural addresses and lectures were delivered on the 8th and 9th June of that year.

The agitation which resulted in the amended charter of 1837 had continued after the opening of the College in 1842, owing to efforts made to defeat the purpose of the amendment, and in 1849 an Act of the Legislature effected important modifications in the constitution of King's College whereby all instruction in Divinity was discontinued, and a larger measure of public control of the affairs of the University instituted, through the formation of a Senate, of which a number of the members were appointed by the Crown. The name was now changed from that of the University of King's College to that of "The University of Toronto."

Three years afterwards the University underwent a further transformation, by which the Act of 1853 abolished the Faculties of Medicine and Law, and divided its functions between the two newly organized corporations of the "University of Toronto" and "University College." To the Senate were assigned the duties of framing the curriculum, holding examinations and admitting to degrees in Arts, Law and Medicine, while to the President and Professors of University College, as a distinct and independent corporation with special powers, were assigned the teaching in Arts and the entire discipline and control of students. The models followed in the reorganization of the Universities, it was claimed, were the University of London and University College, London, both of which had then been only recently established. For thirty-four years, the University of Toronto and University College performed the functions respectively assigned to them by this Act.

During the early years of the University it experienced repeated changes in its local habitation. The faculty and students of King's College were at first temporarily accommodated in the Parliament Buildings until the erection of the east wing of King's College admitted of the occupation of their own building. From this they were anew transferred to the old Parliament Buildings in 1853, when, by a special Act, the site of King's College was appropriated for the proposed new buildings for the use of the Parliament of Upper and Lower Canada. On the return of the Legislature to Toronto, in 1856, the Faculty resumed the occupation of the old King's College Building, while one formerly in use by the Medical Faculty, situated on the site of the present Biological Building, was being adapted for their occupation. There accordingly the work of the College was carried on, pending the erection of the new University buildings. These buildings were begun in 1856, and on October 4th, 1858, the top stone of the main tower was placed in position by Sir Edmund Head, the Governor-General, an old Oxford professor, the value of whose sympathy and support at this critical period in the history of the University cannot be over-estimated.

For thirty-four years the constitution of the University of Toronto and of University College remained unchanged. Other collegiate bodies, principally denominational schools of theology, entered into affiliation with the University, and, with regard to their especial requirements, the course of study in Oriental Languages was augmented, but the Faculty of University College continued to do the work of instruction for nearly all the students in Arts who presented themselves for examination. The candidates for examinations and degrees in

Medicine were trained in medical schools in affiliation with the University, and for degrees in Law the examinations were based upon text-books prescribed by the Senate, without teaching.

In 1887 both the University of Toronto and University College were remodelled by the University Federation Act. The main object of renewed legislation was to secure a more uniform standard of higher education by the union of the various denominational universities of Ontario with the Provincial University. Since the proclamation of the Act, Victoria University at Cobourg, representing the Methodist body, has entered into federation with the University of Toronto. The governing body of this institution is now represented on the Senate of the University of Toronto, its graduates elect representatives to the same body, and by the removal of the faculty and students of Victoria University to Toronto, where college buildings have been erected to the north of Queen's Park, the Union of the two universities has been effected. Under the Federation Act, the theological colleges also, formerly in affiliation with the University of Toronto, have become federated colleges, and enjoy increased representation on the Senate.

The Faculty of University College, by the Act of 1887, consists of professors and lecturers in Classical Languages and Literature (including lecturers in Ancient History), Oriental Languages, English, French, German, and Moral Philosophy. All other portions of the Arts course are assigned to the Faculty of the University of Toronto, of which the lectures are made equally available to the students of University College, and those of all federating universities and colleges. For the maintenance of certain of the departments of science on a scale demanded by modern methods of research, special provision has been made by the erection of new and the enlargement of old buildings. In the new Biological building every facility is now provided for practical training in Biology and Physiology. The Chemical Building was completed in 1895, and affords similar facilities for practical work in Chemistry.

A Faculty of Medicine in the University of Toronto was established immediately upon the passing of the Act in 1887, and teaching is imparted in all branches of medical science. All the advantages of the Faculty of Arts are available for the students in Medicine, and the laboratories of the scientific departments are utilized equally by students in both faculties.

In 1888 a stimulus was given to the study of scientific methods of farming by the affiliation of the Ontario Agricultural College, and the adoption of a curriculum of study for the degree of Bachelor of the Science of Agriculture. Similarly an examination for the degree of Doctor of Dental Surgery was instituted, as a consequence of the affiliation of the Royal College of Dental Surgeons of Ontario. The College of Pharmacy was subsequently admitted to affiliation, and a curriculum in Pharmacy prescribed. On the affiliation of the Toronto College of Music, a curriculum of study was prepared for the degree of Bachelor of Music. The School of Practical Science was affiliated in 1889, and graduates of the School are specially eligible on certain conditions for the degrees of Bachelor of Applied Science and of various degrees in Engineering in the University. By a recent enactment of the Senate a

curriculum was prescribed leading to the degree of Bachelor and Doctor of Pedagogy. In 1897 a course of study was established leading to the degree of Doctor of Philosophy in certain of the Arts departments. In 1897 also the Ontario Veterinary College was affiliated.

On February 14th, 1890, the main University building was partly destroyed by fire. In the reconstruction thereby rendered necessary, opportunity was afforded for important improvements in lighting, heating, and ventilation. Considerable extension was effected in the numbers, capacity and equipment of the lecture-rooms and laboratories. A new library building was erected on plans embracing the most recent improvements suggested by the experience of leading Universities in the United States and elsewhere. A building for the accommodation of the Gymnasium was erected in 1892, and additions to it were completed in 1894 for the accommodation of student societies.

## Library Restoration Fund.

After the destruction of the University Library in 1890, a sum amounting to upwards of \$40,000 was subscribed by individuals and organizations to aid in replacing the loss. In the Calendar of 1898-99 will be found a complete list of amounts paid into this fund by the various subscribers up to 1st May, 1898.

The following subscriptions have been received since May, 1898 : Professor McCurdy, \$60 ; S. B. Sinclair, M.A., \$20.

## Donations of Books.

Since the destruction of the University Library by fire in 1890, upwards of 30,000 volumes have been presented by various persons and organizations. For a complete list of these, see Appendix to Calendars of 1894, 1895, 1896, 1897, 1898, 1899 and 1900. The following donations have been received between May, 1900, and May, 1901 :—

## UNIVERSITY EXTENSION.

The following statute, relating to University extension work, was passed by the Senate in April, 1894 :—

1. A standing committee of seven members of Senate shall be appointed annually for the purpose of carrying on "University Extension" work of a kind similar to that carried on under the same designation in connection with the Universities of Cambridge and Oxford.

2. The Committee shall have authority to appoint a secretary, define his duties, and fix his remuneration.

3. No part of the expense incurred for teaching and examining done at "local centres" of instruction, or for secretarial work done under the authority of the Committee, or for any other purpose connected with University extension, shall be a charge on the ordinary revenue of the University.

4. It shall be the duty of the Committee, subject to ratification by the Senate, to appoint teachers and examiners for approved or prescribed courses of study at local centres, and to grant certificates to such students as may have passed the final examination in each course, and complied with other conditions prescribed from time to time by the Committee.

5. It shall be the duty of the secretary to keep a register, in which shall be entered the name and address of each student who obtains a certificate, with a description of the course of study in which he has passed, and such other particulars as the Committee may from time to time order to be inserted.

## STUDENT SOCIETIES.

### Young Men's Christian Association.

The Y.M.C.A. of University College was organized in 1873, and incorporated in 1892. The Association had no permanent quarters until the erection of the present building in 1886.

The Canadian Colleges Mission in connection with the Y.M.C.A. seeks to interest the Students of the University in the different phases of Foreign Missionary work, and contributes to the support of Rev. J. Campbell White, M.A., who works as general secretary among the students of the University of Calcutta. The C.C.M. includes now nearly all the institutions of higher learning in Canada, and issues a monthly paper devoted to the discussion of missionary topics.
